# COMBAT

The combat in *Xenosaga EPISODE II* is complex, but can be mastered by breaking it up into easily digestible chunks, each of which can be learned in turn. Follow the topics in this section step-by-step, then use each aspect of combat together with the others to inflict serious damage on the foes in this game.

## THE BASICS

In the very simplest sense, combat follows a turn-based system. The speediest characters go first and more often based on the AGL stat. During your character's turn, time—for the most part—freezes while making a selection. Time begins again after making a selection for the round.

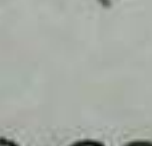

Simply press the  button to access the combat menu. It should be noted that not every option is available to each character, or at all times. While all of the information can be a bit overwhelming, it's easier to take it step-by-step, starting with the next section. The first part of this section assumes that you are fighting with normal characters; combat in the giant mechs, known as A.M.W.S., is covered in more detail later in this section.

## URNS AND STOCK

As mentioned previously, combat is turn-based and is a result of a character's innate speed and some random chance to determine the order of turns. Don't get too accustomed to a particular pattern though, as the turn order will occasionally be altered by more advanced aspects such as Boosting and Event Slots. For now though, let's focus on the characters' turns and what can be done in each.

The bottom-right corner of the screen lists icons showing which characters are set to take the next few actions. Characters in the battle party are represented by their profiles, while enemies have a generic icon based on their type. One to four character turns are set up in advance and each icon disappears as the represented combatant takes a turn. The next row of icons does not appear until the last of the set is finished. Therefore, you'll know whose turn is next for most of the fight, but you'll be left guessing after a number of turns in combat.

At the start of each character's turn, he/she gets the chance to act. Attacks can be performed with two  or  attacks in any combination, each of which comprises its own special Technique (see the "Characters" section for details), while  attacks take the entire action. Pressing  brings up the combat menu and access to Ether skills, Items, and other advanced abilities, any of which uses up the action for one turn and the battle moves on to the next character.

This is relatively simple so far, but note the Stock Gauges below the characters' portraits. This is where extra turns' worth of actions are held. Rather than using a character's abilities for the turn, the "Stock" option can be used from the combat menu to add Stock to this gauge. This basically charges one of the three sections on a character's gauge.

Each section of the gauge marks one full action, with a maximum of three held in reserve. In addition, a character may also gain an extra charge in his or her gauge when performing a Break, which is explained in more detail later in this section. Think of the Stock Gauge as a bank of extra attacks when that character's turn comes around.

A well-Stocked character can damage an enemy in more interesting ways compared to the default actions or attacks allowed at the beginning of a turn. Choices from the combat menu, such as using Items or Ether, consume the current action and automatically end the turn, while normal  $\triangle$  and  $\square$  attacks can be used for the first attack in a turn but don't draw from the Stock Gauge. After the first normal attack, Stock can be used to create

a chain of attacks, possibly knocking the enemy Down or into the Air, or triggering another one of the character's set Techniques. Stocking also allows the use of deadly Double Attacks or, in the case of KOS-MOS, Special Attacks against the enemy.

## ENEMY TYPES, WEAKNESSES, ZONES, AND BREAKS

That's the basic order of things, but it's important to understand the foes in the game. There are three broad enemy types in this game: *Biological*, *Gnosis*, and *Mechanical*. The main difference that this makes in combat is that specific types of Ether skills may have restrictions on which enemy types they affect. Therefore, some characters are more or less useful in each area, depending on how their abilities have been assigned.

There is a broad range of individual species within each of the three general enemy types, each of which has its own specific weaknesses. These can be revealed through trial and error, through use of the "Analyze" Ether skill, or by making use of the handy "Enemy Data" section of this guide. In general, Biological enemies tend to be weak versus Fire and Pierce attacks, Mechanical enemies are usually weak against Thunder attacks, and Gnosis tend to be weak versus Aura attacks.

To exploit the weakness of an enemy, use a corresponding attack or Ether skill. When the cursor is placed over an Ether to cast, a description of any elemental attribute (Beam, Aura, Thunder, Fire, Ice) or physical attribute (Pierce, Slash, Strike) is displayed. Each character's attacks have various attributes as well, corresponding to the icons displayed next to each attack button in the lower-left corner of the battle screen. For example, most of Ziggy's attacks have the Fire/Strike attributes and are physical in nature, while MOMO's attacks have the Pierce attribute and are Ether-based.

Each character also has a list of Techniques comprised of specific combinations of normal attacks. These attacks are listed in each character's "Tech" screen under the Main Menu.

Along with different weaknesses, the different species may have other traits that help separate them from the crowd. Some enemy species can fly, which makes them vulnerable to certain attacks like Jr.'s gun or MOMO's bow, while keeping them safe from Ziggy and chaos' ground attacks. Check the "Enemy Data" chapter for each specific enemy type to see what it can do.

Along with the elemental and attack type weaknesses, each enemy has a set of Zones that can be used against it. The different Zones, referred to as A, B, and C, correspond to areas on the foe's body. For example, one type of enemy may be weak when attacked in Zone B followed by Zone C.

When attacking the enemy, specific button presses hit specific Zones on an enemy. Learn which buttons strike which zones, then use the enemy's weak Zones against it. The weak Zones will be displayed in red in the upper-left corner of the battle screen during an attack. Pay attention to the weak Zones of an enemy while you're attacking. If a Zone comes up white, on your next turn try attacking another Zone on the enemy to get the right combo.

The Level 1 Class C "Memory" skill is very useful in this regard, as the game will remember the enemy's weak Zones for you, so the next time you encounter the same enemy, its weak Zones will already be displayed in the lower-right window. When the combination of attacks is used in the correct order to strike an enemy's weak Zones, this is called a "Break." At this point, a character may gain an extra charge in his/her Stock Gauge to use in a follow-up ◎ attack, or to store for later. This is called a Break Bonus.

ENEMY DATA

WALKTHROUGH

APPENDICES

When an enemy is in the Break state, it takes 1.5 times the normal damage. In addition, a follow-up ◎ attack may knock the enemy into the air or onto the ground. Ziggy and chaos can “Down” enemies by knocking them onto their backs, while Jin and KOS-MOS send enemies flying into the air. Enemies on the ground will rise on the next turn (not counting Boosted turns), while enemies in the air slam into the ground and into the Down state on the next turn. Any enemy, whether in an Air or Down state, regains its normal position when its own turn comes around.

When an enemy is in the air or on the ground, any attacks cause 2 times the normal damage, so it's usually a good idea to use a Break and knock-down in conjunction with the following topic: “Boosting.”

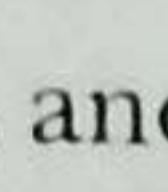

### ENEMY TACTICS

*Enemies can also put party members into an Air or Down state, which increases the effectiveness of Boosted enemy attacks. Avoid being ripped to shreds by Boosting to interrupt the enemies' chain of attacks, which is covered in the next section.*

## BOOSTING

The Boost gauges are in the bottom-right corner of the screen. They include the battle party's boost gauge above the turn icons and the enemy's gauge below them. Each party shares a gauge between its members. It fills slightly when one of the team members makes an attack. When the Boost gauge fills up all the way to the right, the number 1 appears to the right of the gauge and it begins to fill up again from the left. Each gauge can go up to a maximum of three, unless the special Boost Max item is being used.

When a party's gauge goes above zero, the Boost ability can be used. To utilize this feature, hold down the R1 or R2 buttons to bring up a small window with three boxes. Any character who is capable of Boosting at that moment appears in one of the three windows, each of which corresponds to a button (from left to right , , and ). While still holding the R1 or R2 button, press the button linked to a character's icon to Boost that character.

A Boosted character can interrupt the normal flow of combat and take an extra turn after the current character is finished. Boosted attacks link together with prior attacks to count as one combat turn. This can create longer chains of Zone combinations. Enemies can Boost as well, so it's a two-way street. Foes tend to delay slightly before triggering a Boost action, so be quick with attacks and your character's Boosts to keep an enemy from taking these extra actions.

Characters can only use a Boost when their party has a 1 or higher in the Boost gauge. When a character Boosts, the party's gauge drops by one number. In addition, a character can only Boost when not currently acting and when he or she doesn't appear in the current lineup of upcoming turns. Finally, only one character can Boost at a time from either group. For example, if the enemy manages to trigger this ability, the party is cut off until that Boosted character takes its action.

As mentioned previously, Boosting is useful for taking advantage of an enemy's Down or Air state, getting in additional powerful attacks before the enemy can recover. As expected, it's also good for unleashing extra attacks to finish off an enemy before it can make another attack. These aren't the only uses though, by any means.

### THE RIGHT TIMING

*Especially since the Air state is tricky and doesn't allow all characters to attack an airborne enemy, it's important to learn to time Boosts just right. When a character is ready to knock a foe to a Down position, wait until the character is the last in the turn lineup before knocking the enemy to the ground, Boosting with the other characters in turn to let them each take their shots at the downed foe. KOS-MOS and Jin can knock an enemy into the air. Have them Boost just before the last character in the lineup, then let the enemy drop to the ground and start Boosting from there. Each case takes its own peculiar timing, especially once the enemies get tougher and require characters to link attacks with Boost just to get to the Break state. However, as the player gets more familiar with the system, it becomes easier to handle any odd patterns that may be involved with an enemy's defeat.*

CHARACTERS

ITEMS

SKILLS

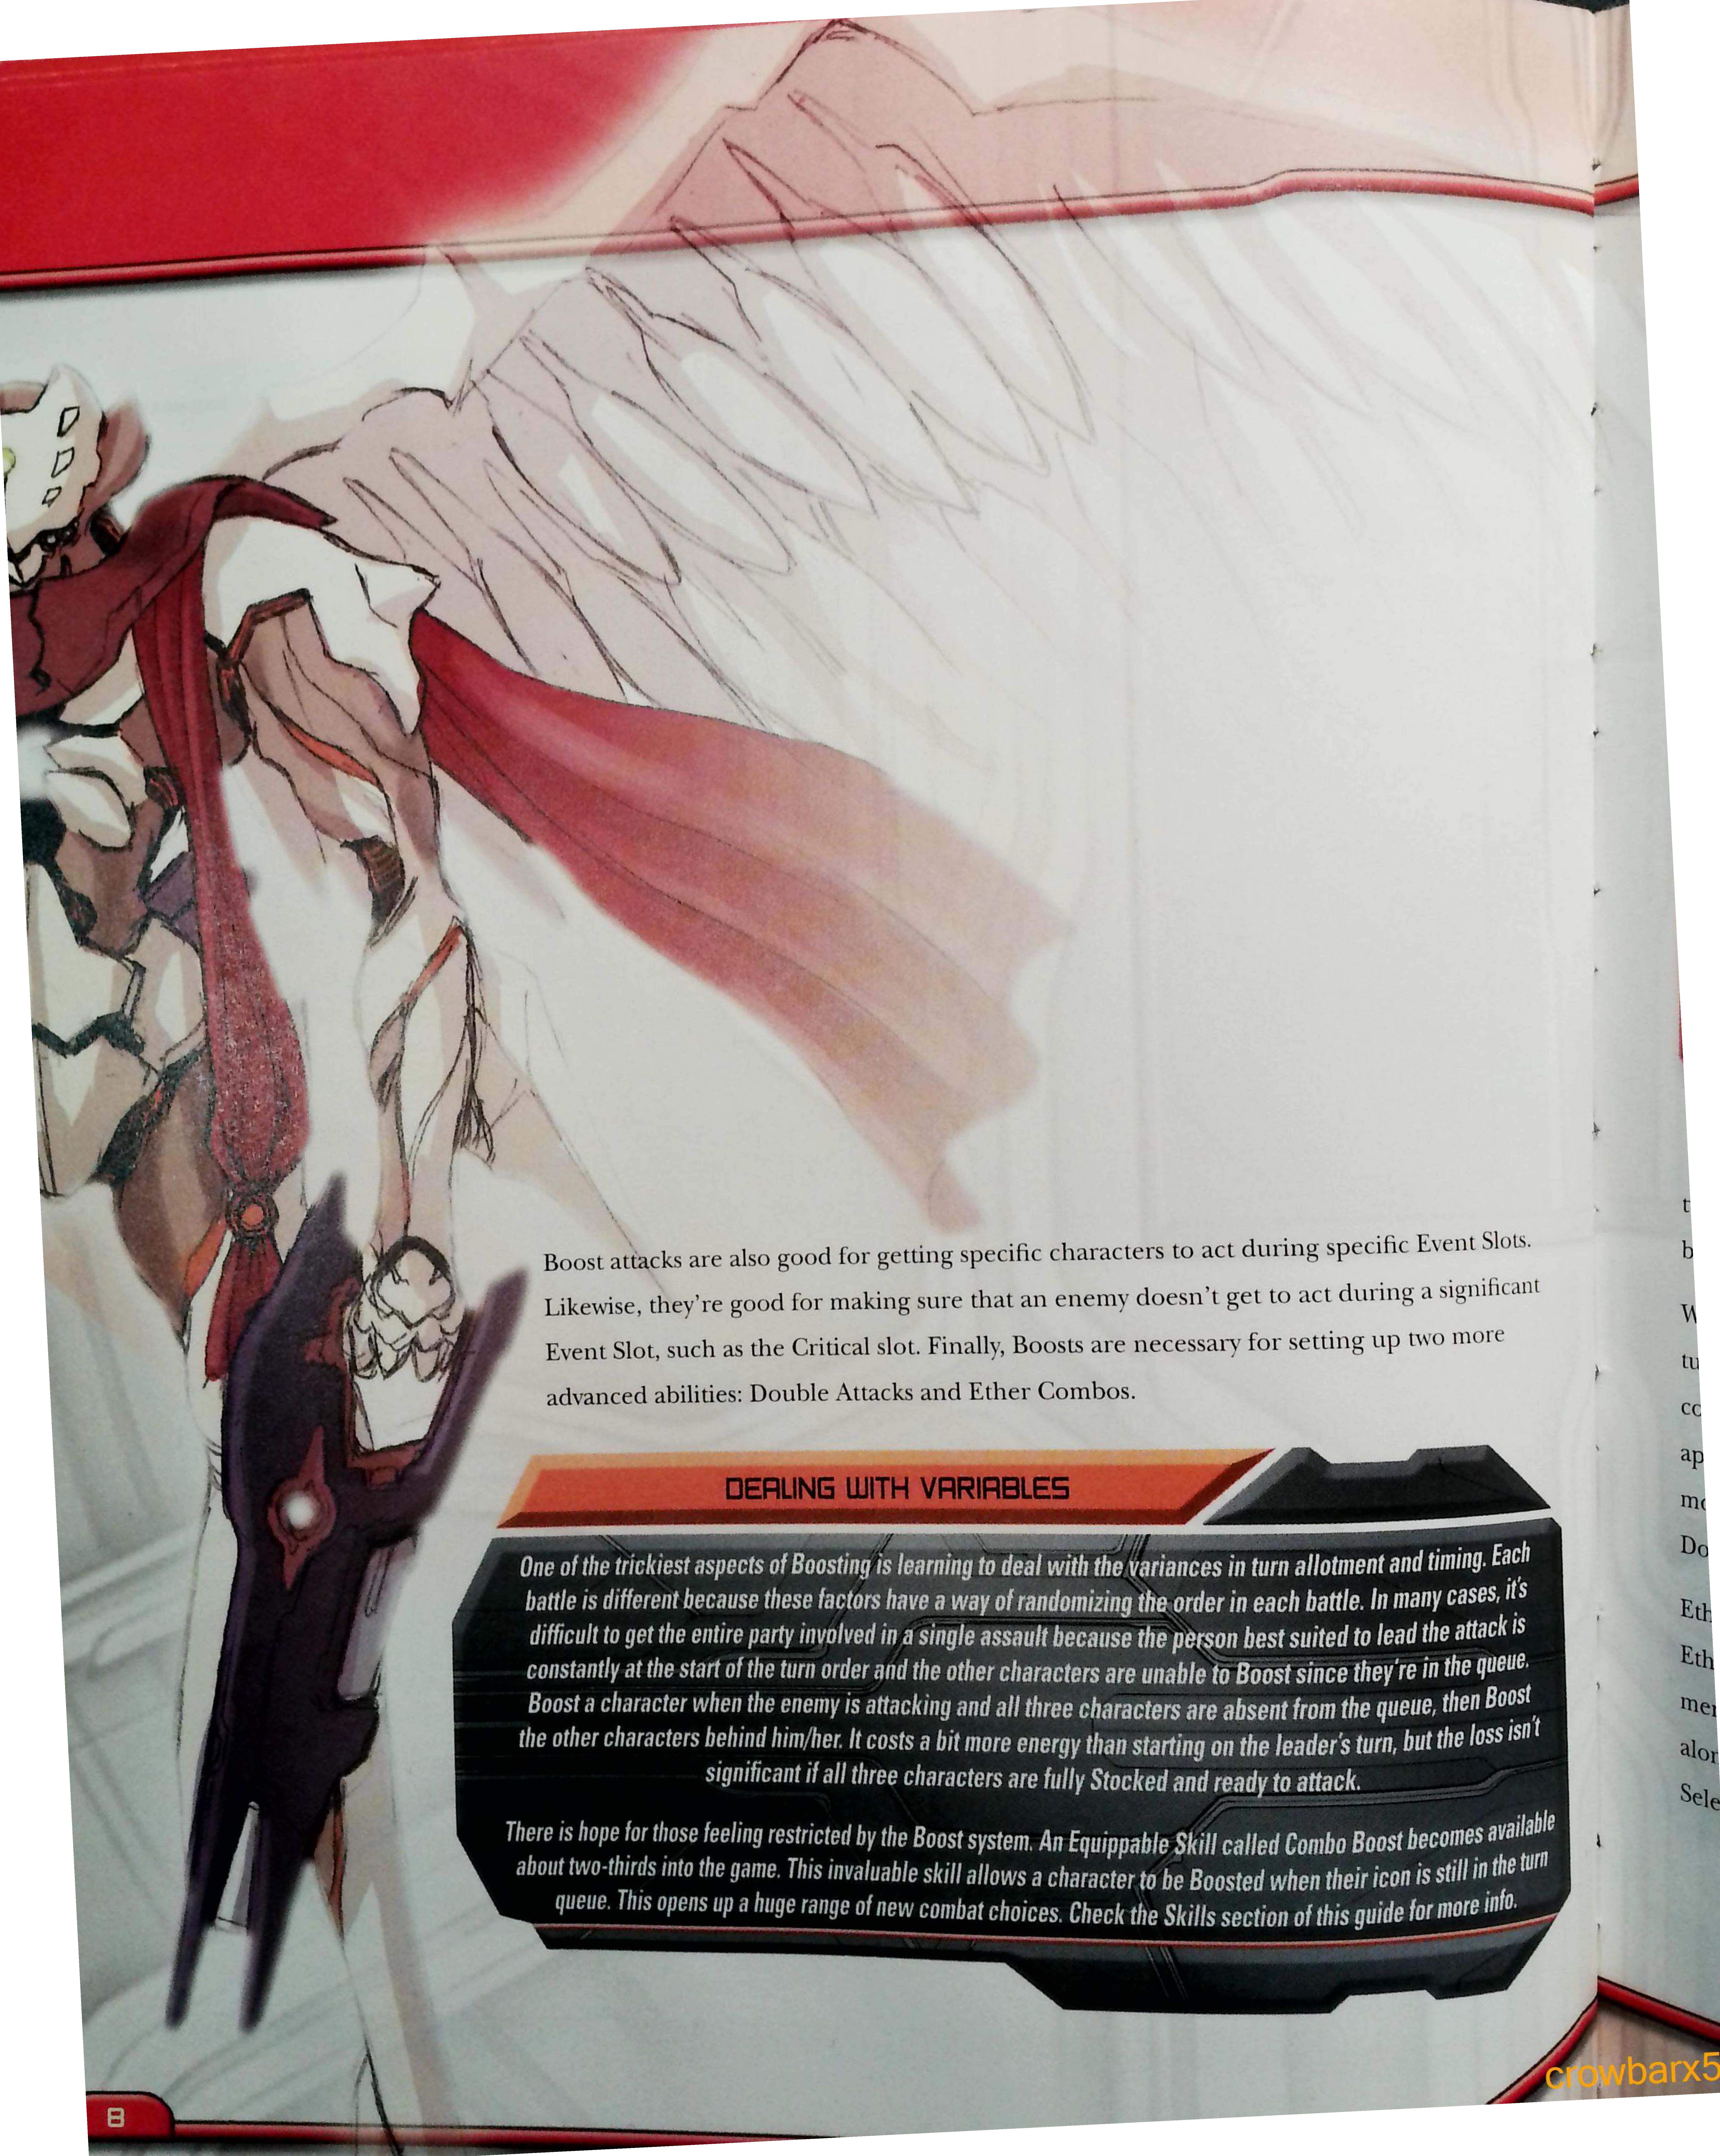

A.M.W.S. DATA

ENEMY DATA

WALKTHROUGH

APPENDICES

Boost attacks are also good for getting specific characters to act during specific Event Slots. Likewise, they're good for making sure that an enemy doesn't get to act during a significant Event Slot, such as the Critical slot. Finally, Boosts are necessary for setting up two more advanced abilities: Double Attacks and Ether Combos.

### DEALING WITH VARIABLES

*One of the trickiest aspects of Boosting is learning to deal with the variances in turn allotment and timing. Each battle is different because these factors have a way of randomizing the order in each battle. In many cases, it's difficult to get the entire party involved in a single assault because the person best suited to lead the attack is constantly at the start of the turn order and the other characters are unable to Boost since they're in the queue. Boost a character when the enemy is attacking and all three characters are absent from the queue, then Boost the other characters behind him/her. It costs a bit more energy than starting on the leader's turn, but the loss isn't significant if all three characters are fully Stocked and ready to attack.*

*There is hope for those feeling restricted by the Boost system. An Equippable Skill called Combo Boost becomes available about two-thirds into the game. This invaluable skill allows a character to be Boosted when their icon is still in the turn queue. This opens up a huge range of new combat choices. Check the Skills section of this guide for more info.*

## DOUBLE ATTACKS AND ETHER COMBOS

Throughout this game, the player can unlock new Double Attacks for the characters through special “Awakening” items, which can be stolen from certain Bosses, or by completing specific GS campaigns. Refer to the second page of a character’s “Tech” menu screen for more info. Double Attacks, which are listed to the left, display the attack’s partner and its properties. It also lists any conditions that must be met before use in the form of necessary Stock. When there are two characters in a battle party with a shared Double Attack, Boost one character during the other’s turn to unlock the Double Attack, but only once the Stock requirement has been met.

For example, consider the Double Attack called Archangel’s Requiem for Shion and Jr. Once unlocked, this attack has a requirement of two sections of the Stock gauge charged for each character before it can be used. So when both characters are in the battle party, use the “Stock” command for each character

twice, making sure to attack enough with the third character in the party to build the Boost gauge up to at least 1. When both characters fill up 2 Stock, wait for one of the pair’s next turn—for this example, let’s assume Shion’s turn is next.

When Shion’s turn comes up, without taking any action, trigger a Boost for Jr. (assuming, of course, that he’s not in the turn queue). Now, while Shion is acting and Jr. is Boosted, access the Command menu by pressing  $\otimes$ . An additional command is available at this point, called “Double.” Select it and choose Archangel’s Requiem from the sub-menu that appears. As long as all conditions are met, it should be ready to select—a grayed-out Double Attack cannot be used at the moment due to a lack of Stock. Select the attack to make the duo go into a special maneuver. Just remember that each Double Attack can only be used once per battle.

Ether Combos are similar to Double Attacks in the way they are performed. In this example, two characters with the same Ether skills Boost together in the same way as when setting up a Double Attack. This time, however, when the combat menu is opened, select “Ether” from the list. Scroll the cursor over an Ether skill and press  $\triangle$ . If this skill can be used along with the Boosted character’s Ether skills to perform an Ether Combo, the specific Combo appears in a new menu. Select it to perform this special advanced maneuver. Refer to page 45 for a list of Ethers that can be used as Ether combos.

## EVENT SLOTS

With a better grasp of the game's combat elements, it's time to move forward and explain something called "Event Slots."

The Event Slots take the form of a series of icons that appear to the left of the turn queue icons. Each icon represents an effect on the battlefield at that moment, and each one only lasts as long as the current character's turn. Note that even when characters Boost in a chain, the Event Slot changes with each character change. In other words, as one character (friend or foe) finishes a turn, the Event Slot icon switches to the next in line. The cycle repeats in the following order:

**CRITICAL:** Hits during this turn have a 50% higher chance of being Critical attacks. This is true even for Special or Double Attacks; something to use against the foe whenever possible.

**BOOST:** Attacks that connect under this icon add more than normal to the team's Boost gauge. If you need to build up the Boost gauge, have a character with a full Stock Gauge use a long string of attacks here.

**SKILL:** If an enemy is defeated during this turn, the Skill Points obtained from that foe are increased anywhere from x2 to x10. This is especially good during boss battles.

**RANDOM:** One of four other Event Slots, at random.

The Random Event Slot can have one of the following four effects:

**ETHER:** Effects of damaging or healing Ether skills are increased during this round. Good for adding an extra edge to an attack on an enemy's elemental weakness, or for getting extra healing on an ally. Note that Shion and MOMO's attacks do more damage during this Event Slot, since their attacks are Ether-based.

**TURN CANCEL:** If a character or enemy is struck by an attack during this Slot, any turns in the queue are cancelled and their icon is removed from the lineup.

**REVERSE:** Attacks to a foe also increase the enemy's Boost gauge during this turn. If an enemy attacks the battle party during this Event Slot, it likewise builds the party's gauge slightly. This is a good Event Slot to use for healing or other support Ether skills.

**NO EFFECT:** There is no special effect this turn.

To make use of a certain Event Slot, Boost the correct character just before it appears. For example, Boost a character with healing Ether skills during the "Skill" Event Slot for a chance at more effective HP recovery during an "Ether" Event Slot, or Boost the character who can damage the foe just enough to take it down during the "Boost" slot to allow that character to wipe out the foe during the "Skill" Event Slot.

### MASTERING COMBAT

*The Event Slot is a huge difference-maker in most battles. To really master combat in this game, it's important to be aware of this meter at all times. Know which character is most effective against an enemy and ensure that his or her attack is used on the Critical slot. Have healers use high cost healing Skills, such as Medica All, when the Ether slot makes them much more effective. Finish off opponents when the Skill slot is under effect to help the party's powers grow much faster.*

### COMBAT WRAP-UP

After a battle, the party receives their just rewards. Each character gains experience points determined by the enemy type. By gaining a certain number of experience points, a character will gain a level, thus raising his or her parameters. Skill Points are also gained after a fight (the base number is determined by the enemy), but the amount can be influenced by enemies killed on the "Skill" Event Slot. In some special cases, the characters may also gain Class Points at the end of combat, but such enemies are few and far between.

Along with the point rewards, the party may gain one or more items. A defeated enemy may drop one item. More often than not, it is usually a common item, but a rare item may be dropped on occasion. Note that some enemies don't carry rare items and some enemies may drop nothing at all after a fight. It's possible to use the "Psycho Pocket" Ether skill or "Pocket Rare" Ether Combo to steal an item during a fight, and also receive a dropped item after the fight as well!

While the active party members gain the full rewards after a fight, the reserve characters aren't as lucky. Although these characters gain experience, they do not receive any of the Skill Points or Class Points after a battle. To gain specific skills for certain characters, make sure they are in the active party, or that there are enough special Skill Upgrade items to use on them. Reserve characters do, however, slowly regain HP and EP as the party explores, making this a good place to put characters who have spent all of their EP in battle.

Of course, not every fight will go smoothly. When the Escape command is used by Shion or MOMO to flee from a battle, the party gains only the Experience and Skill Points from foes that were K.O.'d before fleeing. If one or two characters are Incapacitated at the end of a fight, they gain no points (although they do return to 1 HP when the fight ends). If the entire party becomes Incapacitated, the game ends.

After combat (even when using Escape), the party leader flickers slightly for a short period of time. When this occurs, it means that character is safe from attack even if he or she bumps into another foe. Note that this grace period doesn't last long, so be careful.

### BALANCE

*Don't worry too much about a character who doesn't quite possess the skills of others. It's possible to revisit combat areas throughout the game, so return to an area and buff up that character for a return visit. There are various items to utilize to grant such characters Skill and Class Points.*

## A.M.W.S. COMBAT

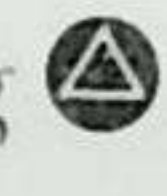

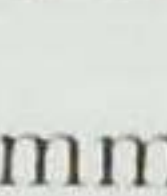

On the other end of the spectrum, fighting in the giant mechs known as A.M.W.S. (or E.S.) units is something a bit different. Each dungeon (or section of dungeon) is predetermined as to whether it can be explored on foot, or in the large mechs for protection. When exploring an area using the mechs, a fight ensues whenever the party bumps into an enemy.

Combat using the A.M.W.S. is also turn-based and it, too, uses Boosting. There are more differences than similarities to note, though. There are only three A.M.W.S. available and only two can fight in the battle party at one time. Double Attacks, or chains of normal

attacks to form Techniques, are also unavailable. Because attacks cannot be chained together, the enemies have no Zone weaknesses when fighting in the A.M.W.S. There are also limits on other Command menu options—the most notable being that items cannot be used, and only the E.S. Zebulua can use the Ether skills of its pilot (MOMO).

In A.M.W.S. combat, Stock is replaced with EC, or Energy Charge. Instead of gaining two or three attacks per normal turn, mechs gain EC points to use or store. Only one attack can be used per turn, either a ranged attack using  or a melee attack using . Each normal attack adds 25 points to the EC gauge. To stockpile points, choose the "Stock" command from the combat menu to add 100 points to the EC gauge. Normally, this gauge holds up to 200 points, but with the special EMAX300 accessory, it can hold up to 300 points.

When at least 100 points of the EC gauge is filled, Special Attacks can be used. Each A.M.W.S. has its own unique Special Attack at 100 points, along with more refined Special Attacks for the 200 and 300 point levels depending on the co-pilot assigned to the unit. Not every pilot/co-pilot combination has an attack assigned to it, so check the possible Techniques before assigning a co-pilot to an E.S. To use these Special Attacks, open the Command menu and choose "Special," then select an attack. If not enough points are available in the EC gauge for an attack, it is grayed out and cannot be selected.

Along with Special Attacks, E.S.s have another unique type of ability, that of performing a special Intercept attack. As an E.S. attacks an enemy, its IA gauge begins to build. The closer the gauge gets to 100, the higher the chance that the E.S. will automatically dodge and counterattack when the foe attempts to strike. Just be warned that when a foe gains a Critical attack, it lowers the IA gauge by half. Even Special Attacks can be intercepted, so if the enemy gauge is high, it's usually a good idea to hold off on Special Attacks for the time being, saving them for when the enemy gauge lowers again.

When a fight ends, there is one other main difference that comes into play—E.S.s cannot learn skills so their enemies give no Skill Points. For this reason, don't worry about holding off to kill enemies on the Skill Event Slot.

# CHARACTERS

## PLAYER CHARACTERS

Over the course of the game, you take control of various characters. At times, you may only have active control of one or a few of the following player characters (PCs). However, all of them play an important role in the game's storyline.

Read the text for each character to get an idea of their personalities and their individual roles in combat. For more detailed information, check out the stat tables and various techniques for each. A more detailed description of each Double Attack is found at the end of this chapter. This section also has a list of skill suggestions for each character. Please note that these are *only* general suggestions; they are not ironclad solutions to boost every character's productivity.

Use them if you like, or develop your own approach. Each PC gains levels at the following rate of experience:

## EXPERIENCE PER LEVEL

Level	Experience Needed	Total Experience

## CHAOS

Enigmatic and quiet, chaos seems to let his friends and events carry him along, but he's also in the thick of things lending his support. chaos seems at times to have great age and experience peering out from behind his ever-watchful eyes. Mysterious as he is, he still plays an important supporting role to the rest of the group.

His role in combat is well rounded. His high EATK and EP make him a good choice as a supplemental Ether user, while his Aura-based physical attacks are especially deadly against some types of foes. chaos can knock foes directly to the ground after a zone Break, but that chaos cannot attack enemies that have been afflicted with the Air status.

Give chaos healing and other support Ether, but don't neglect his combat-based skills.

Some good choices for skill purchases are:

### LEVEL 1

Medica, Refresh L, Attacker, Defender, EATK+2, Break B10, Focus 1, EP Regen

### LEVEL 2

Medica 2, Medica All, Revert, Ether PD Guard, Ether Spear, Expansion Pack, Inner Peace

### LEVEL 3

Refresh H, Safety Level, Rapid Refresh, Last Revenge, Break B15, Skill Up 10, Experience Up 10, Combo Boost, EP Half

### LEVEL 4

Focus 2, Best Ally, Skill Up 15, Experience Up 15, Annihilation (for enemies in Air)

In addition, give him more physical stat-enhancing or Ether-casting skills depending on which role he tends to play in combat and tailor him to suit his own needs since he is such a balanced character. His role in combat tends to change if he fights with more physical characters or Ether casters, like Shion and MOMO. Use chaos to complement the battle party and make up for their weaknesses that the more specialized characters may have.

## JIN UZUKI

The only new PC to join the party, Jin is the older brother of Shion with past connections to many of the other characters as well, most notably chaos. He seems to shift between seriousness and humor fairly easily and quickly, with his small jabs at Shion helping to drive her mad. Underneath all, he's obviously worried about his sister, but for all his capabilities, he seems unable to reach the connection he seems to be yearning for.

Jin is one of the physical fighters of the group, but his slightly lower HP and lesser number of Double Attacks make him useful in a smaller variety of situations. He's perhaps at his best when working alongside Shion, with whom he shares two of his Double Attacks. He can send enemies flying into the air after a Break, or attack those that have already been flying, even with his short range. Give Jin a variety of combat skills and Ethers to help him adapt to different situations better and to bolster his strength.

### LEVEL 1

Blind Guard, Attacker, Defender, STR+2, VIT+2, the "Down" series of spells

### LEVEL 2

The "Sword" skills (giving Jin elemental properties to his attacks), Weak Guard, Expansion Pack, Boost 1

### LEVEL 3

Limiter Up, Double Power, Slow Guard, Quick, CRTG+5, Skill Up 10, Experience Up 10

### LEVEL 4

Curse, Samurai Soul, Skill Up 15, Experience Up 15, HP Mind 15

## DOUBLE ATTACKS

Name	Partner
Ice Brand	chaos
Lion Heart	Shion
Phoenix Blade	Shion

A detailed illustration of Gagnun Kukai, Jr. He is a young man with short, reddish-brown hair and bright blue eyes. He is wearing a dark brown, high-collared jacket over a red shirt. He is holding a silver handgun in his right hand, pointing it upwards. The background is a simple, light-colored wall with a green horizontal line.

## GAIGNUN KUKAI, JR. (A.K.A. JR.)

Jr. is one of a group of bio-engineered living weapons to take out the entity known as U-DO. His own condition has caused his body's aging to come to a halt, making his true age unrelated to his appearance. He still seems young at times, though; his enthusiasm and sometimes eagerness quickly come to the surface. This has kept him from becoming second-in-command of the Kukai Foundation, an enterprise that is being run by his biological brother—and adoptive father—Gagnun. In a fight, Jr. uses twin pistols with deadly accuracy beyond what his boyish looks would suggest.

While Jr. is another physical fighter, he has even lower HP than Jin and no ability to knock the enemy to the ground or into the air. He is very quick and his long-ranged attacks create a larger variety of attack zones against flying opponents. His various Double Attacks also lean toward those that connect against all opponents, making him good for striking a larger number of foes at once with the right partners. Load Jr. up with skills that enhance his quickness and help improve his dangerously low HP.

### LEVEL 1

Medica, Poison Guard (to help protect his HP), Blind Guard, VIT+2, Memory (good for all characters; especially needed for Jr. during one end game fight), DEX+2, EVA+2

### LEVEL 2

Medica 2, Medica All, HP Mind 10, Ether DD Guard, Ether Shield, the "Coat" Skills to help his defense, Expansion Pack, Inner Peace

### LEVEL 3

Safety Level, Limiter Up, the remaining "Coat" skills, Last Revenge, Lost Guard, Slow Guard, Quick Guard, Skill Up 10, Experience Up 10, Combo Boost

### LEVEL 4

Damage -10, Lost AGL, HP Mind 15, Skill Up 15, Experience Up 15

## KOS-MOS

This blue-haired woman is actually an android created by Vector Industries to be used as a weapon against the strange alien creatures known as the Gnosis. After the original version, created by Shion's fiancé Kevin, went out of control and killed a number of people—Kevin included—Shion helped design and build the current version. While no more such incidents have occurred, this new version seems at times to have a consciousness and functionality far beyond that which its creators intended.

As this android was designed as a weapon, it's unsurprising that she's one of the group's best physical fighters. Her HP is quite high and her other combat stats are high, except for Agility, meaning that she won't get as many turns in combat. When her turn does come around, she'll pack quite a punch. She's also the only character who can use her Stock to perform Special attacks, each with a different attribute to help affect different enemies. At higher levels, it's best to save up for skills such as "Overload" to help Stock faster. Other combat-oriented skills are also a good complement to her abilities. Note that KOS-MOS can Air opponents after a successful zone Break.

### LEVEL 1

Blind Guard, STR+2, VIT+2, DEX+2, the "Break" series of skills

### LEVEL 2

Stock 1, Weak Guard, Heavy Guard, Junk Beam, Expansion Pack, Inner Peace

### LEVEL 3

Double Power, CRTC+5, First Combo (with both Double Attacks and Special Attacks, KOS-MOS has more of a need for Stock), Skill Up 10, Experience Up 10

### LEVEL 4

Samurai Soul, Overload (to help with extra Stock), Skill Up 15, Experience Up 15

Dragon Blade	Single	Ether	Long	Beam	Stock x1
X-Buster	Front	Ether	Long	Beam	Stock x3

A detailed illustration of the character MOMO. She has short, straight pink hair with bangs and large, expressive yellow eyes. She is wearing a black beret with a red and white emblem on the side. Her outfit consists of a black dress with a high collar and a red sash tied around her waist. She has a red gem on a chain around her neck. The background is a soft, out-of-focus green and white.

## momo

Much like Jr., MOMO seems to be a younger child but isn't quite as she seems. In reality, this "little" is a Realian, an artificially created and programmed person struggling to be accepted as "real" in a world that often sees her as little more than a robot. MOMO is a specially-designed observational Realian programmed and designed after her late "father's" dead biological child. Her small frame makes her fragile physically, but she's still quite a capable character, strong-willed and always willing to give her best.

With her low physical and high Ether-based stats, MOMO is obviously geared to be one of the party's main Ether users. As the Realian is the main pilot of the only A.M.W.S. (Automated Mobile Weapon System) to allow the use of Ether skills, you must give her essential Ether such as the Medica, Analyze, Psycho Pocket, and Revert if you want these abilities during A.M.W.S. combat. She is also one of only two characters with the ability to Escape from combat, and her Piercing damage that can reach up to the difficult "A" zone makes her a key part of many combat situations. MOMO is the fastest character in the game, and that, coupled with her high EATK, makes her a great healer in battle. Keep an eye on her HP, though, as it doesn't take much to knock her out.

### LEVEL 1

Medica, Refresh L, Poison Guard (to help protect her HP), Defender, VIT+2, EATK+2, EDEF+2, EVA+2, the "Blast" series of attack Ether, Focus 1, EP Regen

### LEVEL 2

The Veil skills (to help use her Burst Veil Double Attack), Medica 2, Medica All, Revert, HP Mind 10, Ether Spear, Ether Shield, Miracle Star, Expansion Pack, Inner Peace, Stock 1 (to cast on slower characters)

### LEVEL 3

Refresh H, Safety Level, Limiter Up, the physical "Coat" skills (to help bolster her low physical defense), Rapid Refresh, Last Revenge, Stun Guard, Poison EP Guard, Prayer, Ether Burst, Skill Up 10, Experience Up 10, EP Half, Combo Boost

### LEVEL 4

Heaven's Rain, Focus 2, Lost AGL, Knight Soul, HP Mind 15, Skill Up 15, Experience Up 15, Annihilation

A detailed illustration of Shion Uzuki, a young woman with long dark hair and green eyes. She is wearing a black high-collared top with a small pendant necklace and a dark skirt. She has a small earring and a bracelet on her left wrist. The background is a soft, out-of-focus green and blue.

## SHION UZUKI

Although she is still a young woman, Shion is already the chief of the KOS-MOS project team in Vector Industries' First Division and is quite a skilled scientist. She took up the reins of the project to recreate android KOS-MOS after the former head of the project, her boyfriend Kevin Winnicot, was killed by the creation's first incarnation. Thanks to her own innate skill and some technical toys given to her by friends in the company, she can hold her own in a fight alongside the other team members.

Much like MOMO, Shion is geared more toward the use of Ether skills in battle than in actual fighting. She's also much like the Realian in that she can use the Escape command to flee a battle. She's also capable of using long-ranged attacks to reach the "A" zone to hit some foes. Again, like MOMO, her physical combat skills are Ether-based, which makes her useful against different enemy types, especially versus Mech enemies. Shion is a bit tougher than the Realian, making her a better choice for using healing Ether skills in a fight where all combatants tend to take a beating. Shion's wide range of Double Attacks also makes her good to have alongside most of the other characters.

### LEVEL 1

Medica, Refresh L, Poison Guard, Defender, EATK+2, the "Blast" series of attack Ether, Focus 1, EP Regen

### LEVEL 2

Twin Buster	KOS-MOS

## ZIGGY

A man from a time past, Ziggy was once a normal person living a normal life until tragedy struck. He tried to take his own life, but instead was turned into a cyborg—half-man, half-machine—bound to serve the Ziggur company that resurrected him. Although he's wanted to let go for a long time now in the company of the others he's slowly starting to find reasons to live again.

Ziggy is another physical fighter whose stats are directly geared toward physical offense and defense. He has the highest HP by far to go along with his high VIT, making him a great character to use against the toughest foes. It should be noted, though, that he isn't quite as strong against Ether attacks. Ziggy is also especially useful against enemies weak to Fire, as all of his physical attacks incorporate this element. A big weakness is the fact that he's used in very few Double Attacks. To make the most of his strengths, give Ziggy skills to enhance his physical fighting, but make sure you give him a few healing abilities, especially Revert. Note that, like chaos, Ziggy can Down opponents after a successful zone Break. However, also like chaos, Ziggy cannot attack enemies in the A

### LEVEL 1

Blind Guard, Attacker, EDEF+2, DEX+2, Break B10

### LEVEL 2

Revert (for when Ziggy is the last man standing, due to higher HP and VIT), ST Mind 10, Weak Guard, Ether DD Guard, Ether Shield, the elemental Coat skills (to augment his lower Ether defense), Expansion Pack, ST Resist 20

### LEVEL 3

ST Mind 15, Cleanse, Slow Guard, Charge Time, CRTG+5, Break B15, Revenge Power, Skill Up 10, Experience Up 10

### LEVEL 4

Samurai Soul, Knight Soul, ST Resist 30, Skill Up 15, Experience Up 15

Fiery Ritornelle	Jr.
Power Strike	MOMO

# NPCS

There are other important characters in the world of *Xenosaga EPISODE II*, even though you don't get to control them. Some may even tag along with the party for a while, although they don't take part in character combat. Others may be acting against the party, attempting to meet their own dark agendas. Following are just a few of the more important non-playable characters (NPCs) in the game.

## ALBEDO

Shion's lost brother, Albedo re-emerged during *Xenosaga EPISODE I* and has been on the group's side ever since. It is known that he wants the special Y-Data hidden in MOMO, but exactly what he plans to do with this information is unknown. He is missing after attempting to fight the main group at the end of the previous events, but it's certain that he's still out there biding his time until his next move.

## ALLEN RIDGELEY

The shadow at Shion's heels, Allen is her subordinate and constant helper within Vector's First Division. He's dedicated to her not only because he admires her scientific skills, but because he's in love with her—something he hasn't yet shared with his beloved Chief. Unfortunately, his devotion has pulled him into various situations that he's not quite capable of dealing with, yet he's always waiting to do his best to pull Shion through.

## CANAAN

Canaan is a specially-altered combat-grade Realian under the command of Representative Vector. Although his origins make him seem like a good candidate for fighting alongside the group, Canaan's place is in the cockpit of his specially-altered A.M.W.S., piloting the giant machine better than any human. Because of events that occurred fourteen years before the game's timeline, he's also saddled with a problem that may resurface.

## THE ELSA CREW

The Kukai Foundation's freighter Elsa is the ship that first saved Shion from disaster at the beginning of *Xenosaga EPISODE I*, and its intrepid crew has been a part of the events ever since. The crewmember taking the most active role is chaos, but the other three human crewmembers have done their share to help things along. Captain Matthews is a gruff, stubborn man who takes no nonsense but has a streak of kindness hidden inside, while the navigator, Hammer, is a mechanical wizard. Tony talks big—with the ladies or as far as his piloting skills go—but the others can put up with it because he is an exceptional pilot.

### GAIGNUN KUKAI

Brother to Albedo and Jr. and another of the special U.R.T.V. units, Gaignun is the head of the far-reaching Kukai Foundation. As most people don't know his or his brothers' past, he's taken Jr. as his adoptive son as far as the outside world is concerned. Due to his past and the influence of his Foundation, Gaignun manages to do quite a bit of moving behind the scenes while the main group is out on the front lines.

### JULI MIZRAHI

Although she is a skilled scientist and moves within the highest circles of government, Juli Mizrahi is best known as the wife of the dead madman, Joachim Mizrahi. It was Joachim who created MOMO and entrusted her with the Y-Data, but she is also blamed for helping to spark the Miltian Conflict among other things. MOMO sees Juli as her mother, but Juli's own feelings are obviously torn on the matter. Regardless, she tries to do her best to see things through to the end, working in her own way to erase whatever dangers and problems her husband's actions may have caused.

### MARGULIS

One of the leading members of the sinister U-TIC organization, Margulis has a mission and an unknown passion driving him ever onward. He's not afraid to either use people to their limits or even dirty his own hands, if need be, in order to meet his goals. An excellent swordsman, Margulis is also a skilled manipulator at the very least, with mystery shrouding his exact motives and any other abilities or resources he has.

### NEPHILIM

A being in the shape of a small girl, Nephilim is a mystery to even those chosen few who have seen her. Although she has appeared to others in the past, she usually comes before Shion in strange visions, revealing her forewarning of things to come or asking for her help. It is yet unknown just what—or who—Nephilim is, but she does her own part in keeping the group moving toward their destinies.

### REP. HELMER

Once the general who led the forces dealing with the Miltian Crisis fourteen years ago, Helmer is now a Representative in the Galaxy Federation Government. Due to his position and his connections with some of the major players in current events, he's taken a larger role in preventing everything from falling apart.

# ITEMS

## NORMAL ITEMS

The items in this game can be divided into a few distinct categories. All of the Combat/Recovery items are used in combat with the exception of the Bio Sphere, which is for Recovery on the field. The Med Kits and Ether Packs can be used to restore HP and EP both in and out of combat. Skill/Class items are used to increase a character's Skill Points or Class Points outside of combat, while the four Awakening items that are received from bosses unlock Double Attacks. A few last miscellaneous items round out the list.

COMBAT/RECOVERY ITEMS		
ITEM	EFFECT	SELL PRICE
Med Kit S	Recover 25% of MAX HP	100G
Med Kit M	Recover 50% of MAX HP	400G
Med Kit L	Recover 75% of MAX HP	600G
Med Kit DX	Recover all HP	2000G
Ether Pack S	Recover 25% of MAX EP	200G
Ether Pack M	Recover 50% of MAX EP	600G
Ether Pack DX	Recover all EP	800G
Rejuvenator M	Recover 50% of MAX HP and EP	1600G
Rejuvenator DX	Recover all HP and EP	4000G
Rejuvenator E	Recover all HP and EP for all allies	6000G
Antidote L	Heal L-type status effects	300G
Antidote H	Heal H-type status effects	600G
Revive S	Revive and recover 25% of MAX HP	600G
Revive DX	Revive and recover all HP	1600G
Boost Max	Boost Gauge maximum +1 (up to 5)	4000G
Bio Sphere	Recover all HP and EP (entire party)	400G
Nano Repair A	Recover 25% of MAX HP and EP (E.S. only)	400G
Nano Repair Z	Recover 50% of MAX HP and EP (E.S. only)	1000G
Nano Sphere	Recover all HP and EP of all crafts (E.S. only)	600G

## SKILL/CLASS ITEMS

ITEM	EFFECT	SELL PRICE
Skill Upgrade A	Skill Points +10	200G
Skill Upgrade B	Skill Points +30	600G
Skill Upgrade C	Skill Points +50	1000G
Skill Upgrade D	Skill Points +100	2000G
Skill Upgrade E	Skill Points +500	10000G
Class Upgrade A	Class Points +10	400G
Class Upgrade B	Class Points +50	2000G
Class Upgrade C	Class Points +100	4000G

## DOUBLE ATTACK ITEMS

ITEM	EFFECT	OBTAINED BY	SELL PRICE
Awakening I	Gain Silver Duet Double Attack for Jr. and MOMO	Stolen from Albedo	500,000G
Awakening II	Gain Gravity Bomb Double Attack for Shion and KOS-MOS	Stolen from Orgulla	500,000G
Awakening III	Gain Phoenix Blade Double Attack for Shion and Jin	Stolen from Margulis	500,000G
Awakening IV	Gain Blessed Miracle Double Attack for chaos and MOMO	Stolen from the Patriarch	500,000G

## OTHER ITEMS

ITEM	DESCRIPTION/EFFECT	SELL PRICE
Ether Core	A rare part used to fix broken Ether	4000G
Junked Circuit	A destroyed circuit	1000G
Scrap Iron	Remains of a machine. Each piece enables the player to play the Fishing mini-game on Disc 2.	200G

## KEY ITEMS

Unlike normal items, Key items cannot be actively used from the menu. Many of them are simply used in the course of the various GS events, although a few unlock special areas or skills. For more information on how to receive a given Key Item, check the relevant section of the walkthrough, view the Segment File information, or check the GS Campaign information listed.

Aqua Maid Uniform	GS Event item	GS 17
	GS Event item	GS 17

# SKILLS

For those who played *Xenosaga EPISODE I*, it should be noted that *EPISODE II*'s skill system is quite different. Now rather than having individual skill trees, each character can learn the same skills by spending Skill Points and Class Points that are earned through battle or the use of special items.

Each character has a large number of skills already unlocked. Some are hidden, unlocked only by finding special key items called **Secret Keys**. To learn a skill, you must first unlock the class the skill appears in. Open the Main Menu and select Skills from the sub-menus, then select the character you want to learn a skill. Access the Skill Selection screen, rather than opening the tutorial.

This should bring up a menu of the skill levels, 1 through 4. Any unlocked skill level has "Pass" next to it, while those left unlocked are gray in color with dashes next to them. Scroll up or down using the directional buttons or left analog stick, and press to the right to see the classes under the chosen level.

After selecting a class, you can unlock it if you have the required Class Points. Current Class and Skill Points are displayed at the bottom-left corner of the screen. Once you unlock a Class, the Class Point cost disappears and is replaced by dashes; you can then shift right to learn the skills under that class. Be wary of which classes you unlock; unlike Skill Points, Class Points are very seldom awarded in combat. They are usually earned by gaining Class Bonuses that are awarded by learning every skill in a class. The Class Bonus rewards the player with more Class Points than you used to unlock the original Class. Another way to earn Class Points is to find and use the various rare Class Upgrade items on a character, so be careful how you spend these points. If you unlock too many classes that have skills still locked, you may have trouble purchasing new classes with that character for a while.

After fully learning any one class in level 1, the level 2 skills are unlocked—or at least those that don't require a Secret Key. You'll find that the higher the level, the more skills that require the use of a Secret Key to unlock. The skills also get more costly—and more useful—as you go up through the levels, so look ahead to determine which skills you may want for a character and save any points accordingly.

Each skill falls under one of three categories. Ether skills are much like magical spells—you must actively use them either in battle or from the Ether section of the Main Menu. Mastered skills are in constant effect once learned. Finally, Equipped skills must be equipped using the Status section of the Main Menu to take effect. Characters can have three active Equipped skills at a time, with the Expansion Pack skill increasing the number to four.

The following is a comprehensive list of all the skills in the game. If a skill is currently locked and you want to see how to release it, refer to the Key Items section in the "Items" chapter to view the various Secret Keys, what they unlock, and where to find them.

## LEVEL 1 SKILLS

(CLASSES A THROUGH G COST 300 CP EACH; CLASS H COSTS 600 CP.)

NAME	CLASS	COST	TYPE	EFFECT	EP
Medica	A	200	Ether	Low HP recovery relative to Ether Attack (one ally)	2

Combo Boost	H	3600	Equipped	Boost possible even when character icon is showing	—
EP Half	H	3600	Equipped	EP consumption 1/2	—

## LEVEL 4 SKILLS

(CLASSES A THROUGH C COST 2400 CP EACH; CLASS D COSTS 4800 CP.)

NAME	CLASS	COST	TYPE	EFFECT	EP
Heaven's Rain	A	2400	Ether	Aura Ether Attack (all enemies)	18
Curse	A	4000	Ether	Enemy takes as much damage as it causes	18
Damage-10	A	4000	Equipped	Lower all damage received by 10%	—
Samurai Soul	A	3200	Equipped	Increase attack when party member is knocked out	—
Annihilation	B	2800	Ether	Non-elemental Ether attack & clear status effects (one enemy)	18
Focus 2	B	4800	Mastered	Recover 15% EP with the Stock command	—
Lost AGL	B	2400	Mastered	Retain full Agility after casting Ether	—
Knight Soul	B	3200	Equipped	Increase defense when party member is knocked out	—
Overload	C	3600	Equipped	50% chance of stock +2 when using the Stock command	—
ST Resist 30	C	3200	Equipped	Status effect resistance +30%	—
ST Double	C	2800	Equipped	Duration of status effects x2	—
HP Mind 15	C	2400	Mastered	HP Recovery +15%	—
Best Ally	D	9600	Ether	Auto revive and recover all HP one time (one ally)	60
Skill Up 15	D	7200	Mastered	Skill Points +15%	—
Experience Up 15	D	7200	Mastered	Experience Points +15%	—
Rebound	D	8000	Equipped	50% chance to Counterboost after guard or evasion when using the Stock command	—

## WHAT TO LEARN?

With such a wide variety of skills it can become difficult to decide what to learn for each character. The best bet is to play off your characters' strengths—put any offensive Ether skills on characters with a high EATK rating, such as MOMO, while combat-enhancing skills should go on the more active fighters. Healing skills are important enough, however, that they should go on every character sooner or later. These include Medica, Medica 2, Medical All, and Revert. Also, place the Psycho Pocket skill on multiple characters to make stealing unique items a little easier. You will also want at least one character in the combat party to know the Analyze Ether and the Memory Mastered Skill. Also, if you tend to pair up some characters in combat to use their Double Attacks, pair up their Ether skills as well, unlocking certain Ether Combos while those characters are fighting together.

## OTHER SKILLS

While almost all skills are learned through Skill Points from the previous table, a few select skills are obtained in other ways. The Swimsuits are found by completing GS 07 (MOMO and Jr.), GS 25 (Shion and chaos), and GS 32 (Jin) or from loading *EPISODE I*'s game clear data at the start of *Xenosaga EPISODE II* (KOS-MOS and Ziggy). The various Erde Kaiser summons are unlocked by completing parts of the Giant Robot sub-quest in the Professor's laboratory on the Elsa.

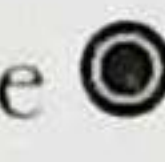

NAME	CHARACTERS	TYPE	EFFECT	EP
Swimsuit	Shion, chaos, Jr., MOMO, Jin, KOS-MOS*, Ziggy*	Equipped	AGL +1, Skill points +10%, Additional 10-15% damage	—
Erde Storm	Shion	Ether	Non-elemental Ether attack from Erde Kaiser arms (all enemies)	8
Erde Beam	Shion	Ether	Ether Beam attack from Erde Kaiser head (all enemies)	8
Erde Quake	Shion	Ether	Non-elemental Ether attack from Erde Kaiser legs (all enemies)	8
Erde Kaiser Fury**	Shion	Ether	Large damage Slashing, Piercing, or Thunder Ether attack (all enemies, one time)	50

\*KOS-MOS' and Ziggy's Swimsuits are available only if cleared game data from *Xenosaga EPISODE I* is loaded at the start of a game.

\*\*You can only obtain one of the three damage types for Erde Kaiser Fury, depending on your performance in GS 27 (The Master Bartender).

## ETHER COMBOS

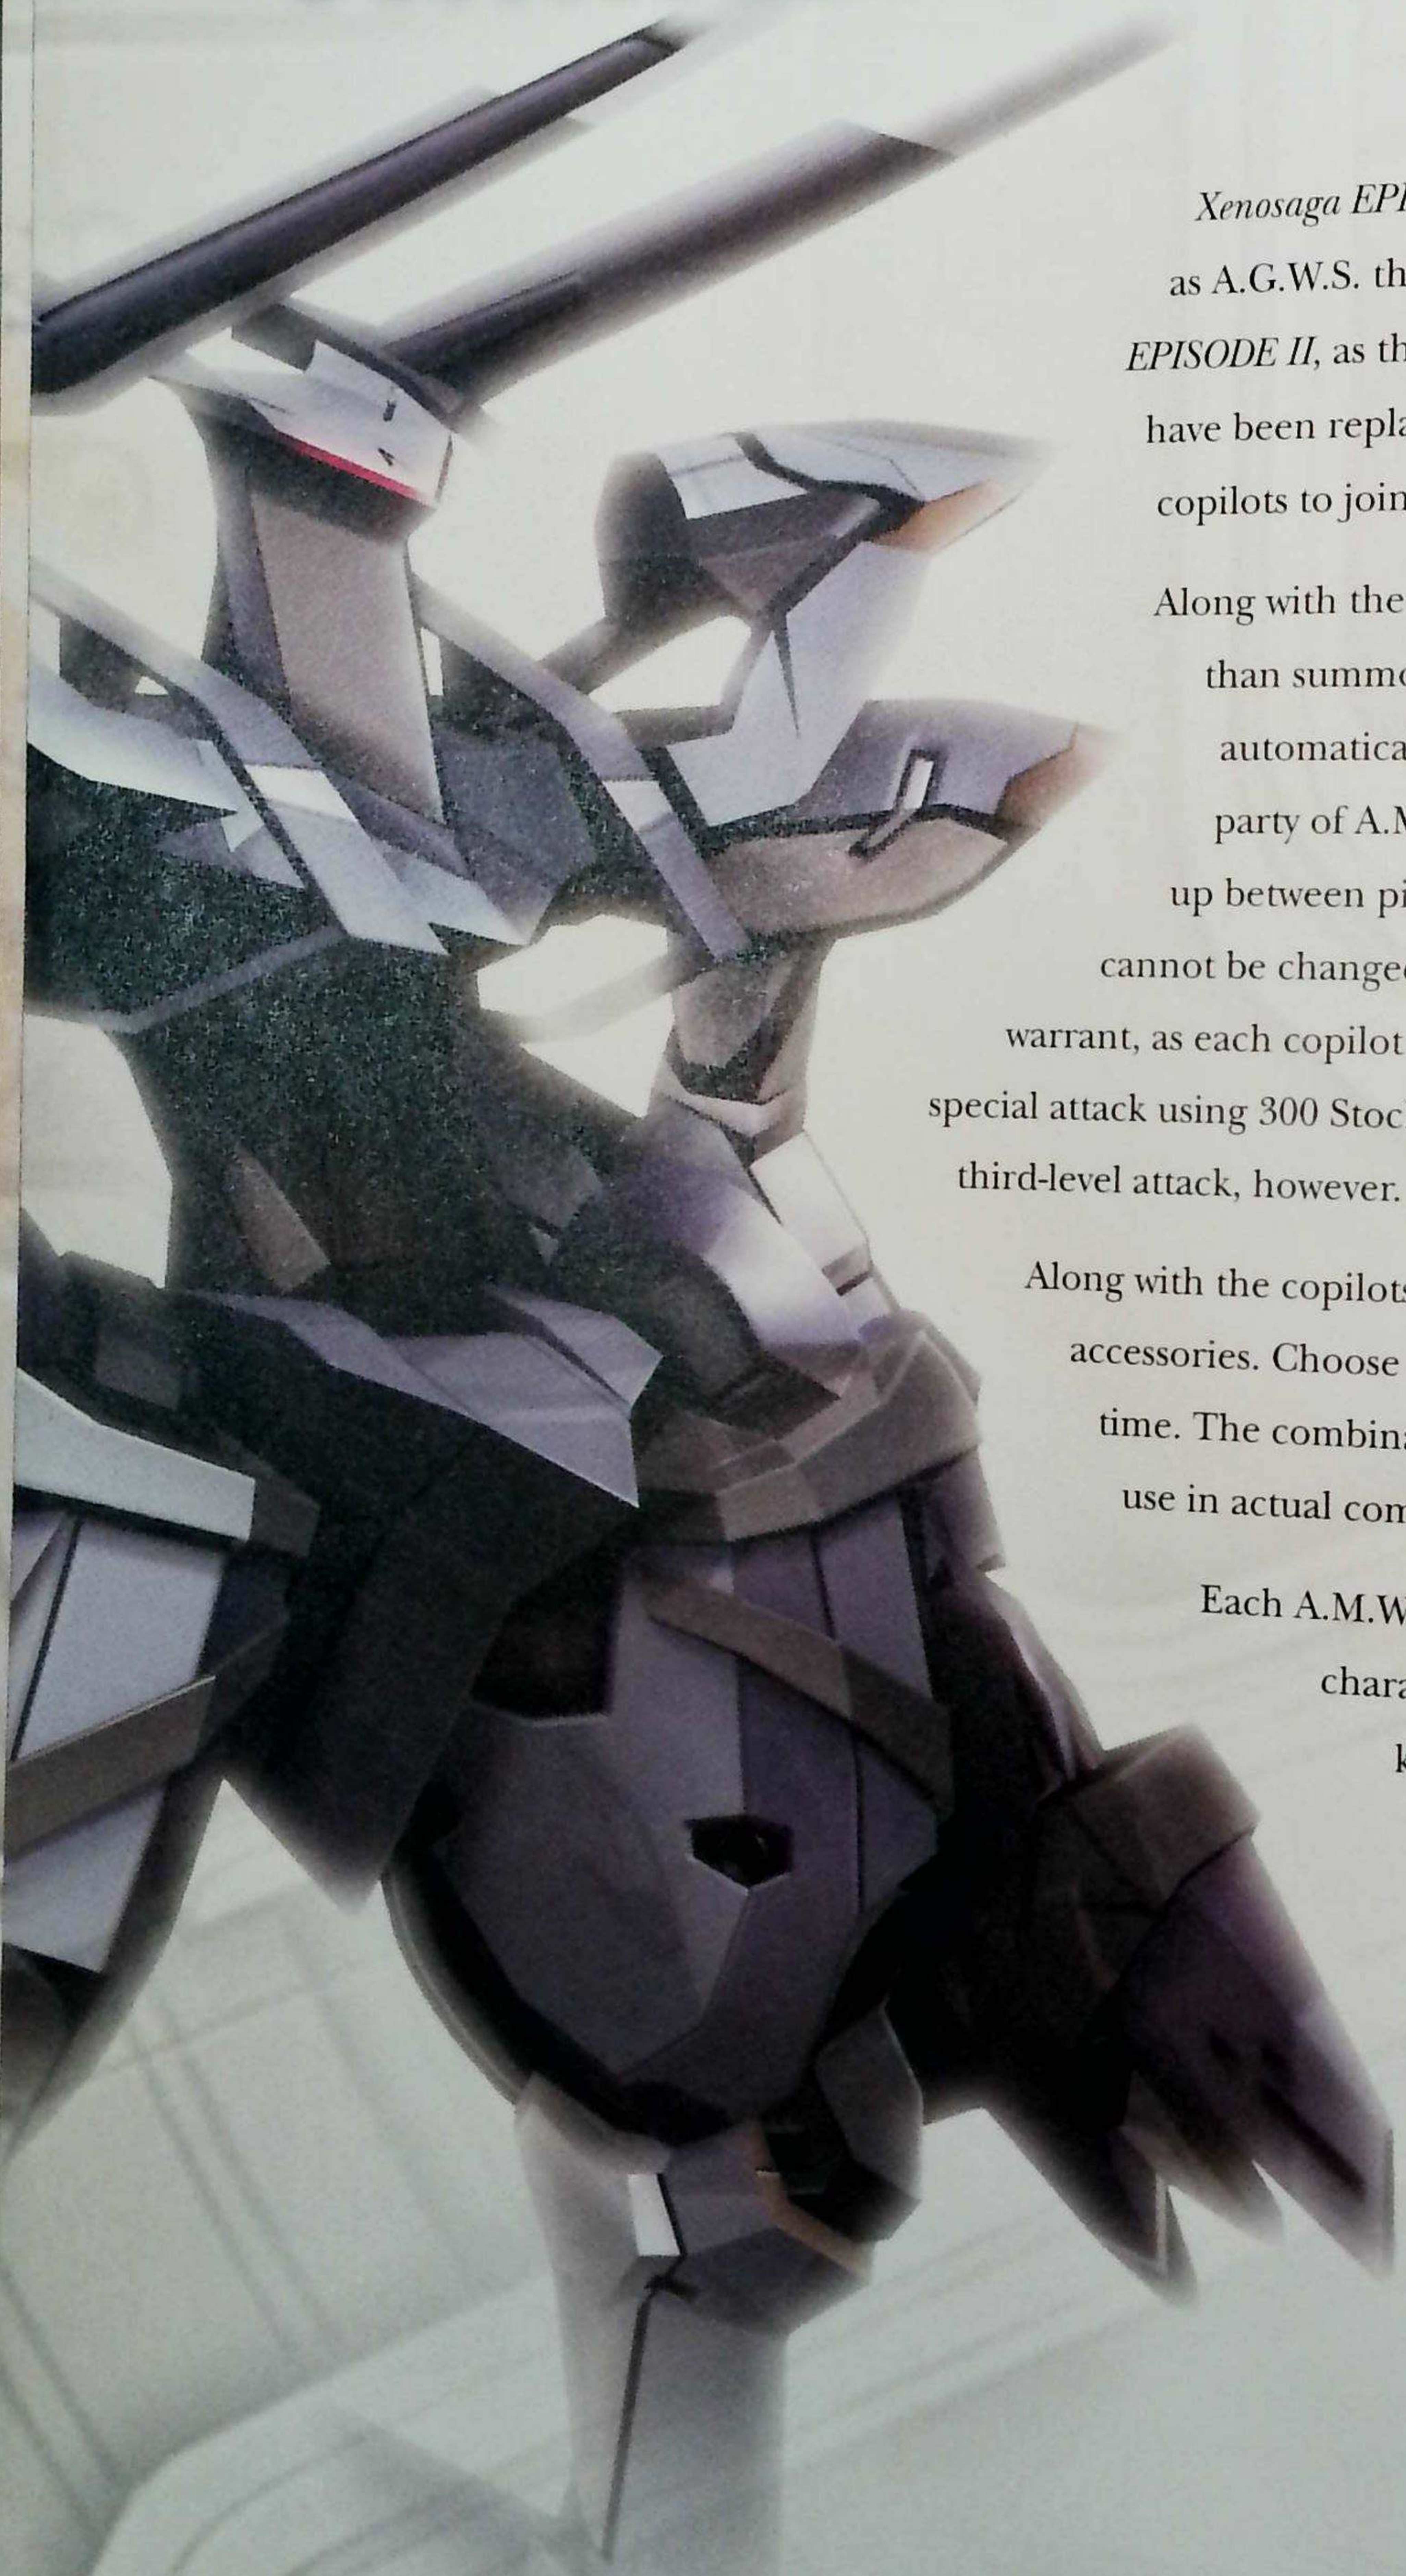

Ether Combos are special advanced abilities that are similar in some ways to Double Attacks. To use an Ether Combo, one character must Boost during another character's turn. For example, let's say that Shion uses Boost during chaos' turn. From chaos' Ether menu, press the  button while highlighting an Ether skill. If there is an Ether Combo to use for that skill, it opens a new menu. Scroll through the choices (if there are any) and press the  button to select and use the Ether Combo. Note, though, that this takes up both characters' turns.

Unlike Double Attacks, any pair of characters can use an Ether Combo. The only requirement is that each character must have one of the two compatible skills that comprise the combo. The following is a list of the Ether Combos, including the two Ether skills required to make up the set:

ETHER COMBOS			
COMBO	ETHER USED	EFFECT	EP
Double Medica	Medica (x2)	Low HP recovery (all allies)	2
Double Medica 2	Medica 2 (x2)	Mid HP recovery (all allies)	4
Double Refresh L	Refresh L (x2)	Remove L status effect (all allies)	4
Double Refresh H	Refresh H (x2)	Remove H status effect (all allies)	6
XSB Dex	Down Dex (x2)	Lower Dexterity and Evasion of B or G enemies (all enemies)	4
XSB Force	Down Force (x2)	Lower Physical Attack of B or G enemies (all enemies)	4
XSB P Def	Down P Def (x2)	Lower Physical Defense of B or G enemies (all enemies)	4
XSB Ether	Down Ether (x2)	Lower Ether Attack of B or G enemies (all enemies)	4
XSB E Def	Down E Def (x2)	Lower Ether Defense of B or G enemies (all enemies)	4
XBK Sensors	Break Sensors (x2)	Lower Dexterity and Evasion of M enemies (all enemies)	4
XBK Arms	Break Arms (x2)	Lower Physical Attack of M enemies (all enemies)	4
XBK Armor	Break Armor (x2)	Lower Physical Defense of M enemies (all enemies)	4
XBK Beam	Break Beam (x2)	Lower Ether Attack of M enemies (all enemies)	4
XBK Shield	Break Shield (x2)	Lower Ether Defense of M enemies (all enemies)	4
Junk Blast	Junk Beam (x2)	20% chance to cancel M enemies' actions (all enemies)	4
Lost Mist	Misty (x2)	Block B or G enemies' Ether skills (all enemies)	6
Thunder Wall	Thunder Veil (x2)	Reduce thunder damage 25% (all allies)	4
Flame Wall	Flame Veil (x2)	Reduce fire damage 25% (all allies)	4
Ice Wall	Ice Veil (x2)	Reduce ice damage 25% (all allies)	4
Aura Wall	Aura Veil (x2)	Reduce aura damage 25% (all allies)	4
Thunder Storm	Thunder Blast (x2)	Thunder Ether attack (all enemies)	6
Thunder Burst	Thunder Blast + Aura Blast	Concentrated thunder Ether attack (one enemy)	6
Flame Storm	Flame Blast (x2)	Fire Ether attack (all enemies)	6
Flame Burst	Flame Blast + Aura Blast	Concentrated fire Ether attack (one enemy)	6
Ice Storm	Ice Blast (x2)	Ice Ether attack (all enemies)	6
Ice Burst	Ice Blast + Aura Blast	Concentrated ice Ether attack (one enemy)	6
Aura Storm	Aura Blast (x2)	Aura Ether attack (all enemies)	6
Miracle Stars	Miracle Star (x2)	Non-Elemental Ether attack (all enemies)	8
Pocket Rare	Analyze + Psycho Pocket	Analyze enemy and steal rare item (one enemy)	4

# A.M.W.S. DATA

*Xenosaga EPISODE I* saw the introduction of giant mechanical suits known as A.G.W.S. that the characters could use in combat at will. Now in *Xenosaga EPISODE II*, as the technology of the world is constantly evolving, these mechs have been replaced by the A.M.W.S., more intricate mechs that have room for copilots to join the normal pilots.

Along with the change in name, there are a few differences to note. Rather than summoning mechanized allies at will, different dungeon areas automatically use either normal characters or the A.M.W.S. for all fights. A party of A.M.W.S. consists of three members, as the characters are divided up between piloting and copiloting duties. The pilot of a particular mech cannot be changed, but copilots can and should be swapped out as circumstances warrant, as each copilot unlocks different special attacks. To unlock a duo's third-level special attack using 300 Stock, equip the rare **EMAX300** accessory. Not all pairings have this third-level attack, however.

Along with the copilots, an A.M.W.S. also gains abilities and traits from equipped accessories. Choose carefully, as each mech can only equip three accessories at a time. The combination of accessories and copilots can drastically alter a unit's use in actual combat.

Each A.M.W.S. unit gains experience and levels much like a normal character, and each has its own specific base stats. One last thing to keep in mind is that the only A.M.W.S. unit that can use Ether skills is the E.S. Zebulun, which is piloted by MOMO. Raise this Realian pilot's abilities accordingly, and plan ahead to make the best use of the unit's Ether capabilities.

## E.S. ASHER

Jr. pilots the E.S. Asher throughout most of the game, although Canaan briefly directs it early on in the game. The E.S. Asher is the strongest physically of the three A.M.W.S. units, with the highest HP to boot. It's best used for hand-to-hand physical combat.

### E.S. ASHER STATS

Level	POW	ARM	DEX	EVA	AGL	EATK	EDEF	HP	EP
20	362	330	39	33	7	270	222	13442	0
30	459	423	49	43	7	354	298	18823	0
40	543	503	59	53	7	426	363	23473	0

200 Stock	Corona Buster	Single	Ether	Long	Fire	—

### E.S. DINAH

The E.S. Dinah is KOS-MOS' special A.M.W.S. unit, about as much a mystery as the android herself. While the physical strength of the unit is average, it is stronger at Ether-based attacks, be it the normal Beam Blaster attack or one of the copilot-enabled special attacks. Choose the second character for this unit accordingly.

### E.S. DINAH STATS

## E.S. ZEBULUN

Piloted by MOMO, the Zebulun is the only one of the three A.M.W.S. units that can use the pilot's Ether abilities. MOMO is the only character who can use her Ether skills through the robot; the copilot's abilities are still blocked. This unit's physical combat capabilities are low, but the use of Ether for healing and support is invaluable.

### E.S. ZEBULUN

Level	POW	ARM	DEX	EVA	AGL	EATK	EDEF	HP	EP

A character with red hair and a black beret is aiming a large, mechanical bow. The character is wearing a dark, form-fitting outfit with a grey collar and a gold belt. The bow is a complex mechanical device with a long, thin arrow. The background is a light, hazy environment.

## ITEMS AND ACCESSORIES

A.M.W.S. usable items are utilized in the same manner as normal items for regular characters. Accessories are equipped using the Status screen while inside an A.M.W.S. Note that each unit is capable of equipping three accessories at one time.

## USABLE ITEMS

Item	Effect	Sell Price
Nano Repair A	Recover 25% of MAX HP and EP	400G
Nano Repair Z	Recover 50% of MAX HP and EP	1000G
Nano Sphere	Recover all HP and EP of all crafts	600G

G Stun Guard	Stun resistance +25%	4000G
G ST Double	Double duration of status effects	40000G
G Weak Guard	Weak resistance +25%	4000G
Power Shield	Damage reduction +20% when defending	30000G
Quick Charge	EC is charged to 100 at the start of battle	60000G
Tuned Circuit	Agility +1	20000G

# ENEMY DATA

The enemies in *Xenosaga EPISODE II* are varied and dangerous, so it's a good idea to check to see what you're up against at all times. Even the most innocent-seeming foe may hide some nasty surprises. Following is an explanation of the various fields in each enemy's data:

- ① **HP:** Enemy's maximum health.
- ② **Type:** Displays which of the three enemy types the foe belongs to: Biological (B), Mechanical (M), or Gnosis (G). Some Ether skills only have an effect on certain enemy types.
- ③ **Weak Zone:** You must strike these zones in the given order to "Break" the enemy.
- ④ **Weak Atk./Weak Atr.:** The attack types that do more damage to the given foe. More detailed information about weaknesses is found in the last row of statistics.
- ⑤ **EXP/Skill Points/Class Points:** Base points received after defeating the enemy.
- ⑥ **Normal Drop/Rare Drop:** One out of the two items that may drop after the enemy is defeated. These items can also be stolen from the enemy using the "Psycho Pocket" Ether skill, or "Pocket Rare" Ether Combo.
- ⑦ **Found:** The location(s) where the enemy may be found. Some enemies (for example, bosses) are only found in a certain location at one given time.
- ⑧ **STR:** Determines physical attack strength.
- ⑨ **VIT:** Determines defense against Physical attacks.
- ⑩ **EATK:** Determines Ether attack strength.
- ⑪ **EDEF:** Determines defense against Ether attacks.
- ⑫ **DEX:** Determines hit probability.
- ⑬ **EVA:** Determines ability to evade attacks.
- ⑭ **AGL:** Determines turn order and speed.
- ⑮ **Beam/Aura/etc.:** The number for each is the percent damage that the enemy takes for the given attack type. An Aura number of 200 means that the enemy takes twice as much damage from Aura attacks as normal, while an Ice number of -100 means that the enemy absorbs the attack and regains HP instead of losing them when attacked by Ice.

# USING THE WALKTHROUGH & MAPS

The text in the walkthrough takes the player through every area of the game and describes the essentials that are needed to progress through the game's incredible storyline. There are lots of tips and hints, along with detailed boss tactics, that provide a subtle push in the right direction.

In addition, there are plenty of maps to illustrate each area. The maps point out items, Segment Addresses, boss encounters, and basically anything of importance that the player should be aware of. A legend of the callouts follows below:

Objective **1** These numbers correspond to the objectives at the start of each area.

Item **1** These numbers relate to the item lists that appear at the start of each area.

Save **1** This icon signifies save points.

EVS **1** This icon signifies EVS locations.

Elevator **EV** Elevator are located near these icons.

Enemy **B** **G** **M** These icons indicate enemy locations (B = Biological; G = Gnosis; M = Mechanical)

Boss **BOSS** This graphic shows the various boss fights.

Segment Addresses **1** This icon illustrates Segment Address locations.

Traps **1** These circular icons show trap locations.

Start **START** The mission starts here.

E.S. Dock **ES** This marks the E.S. Dock locations.

Segment Address No. 7

\*Use the U.M.N. Simulator to revisit the area and acquire these items.

## LEARNING THE ROPES

The duo of Canaan and chaos hit the streets of Old Miltia in the E.S. Asher. This section of the game is primarily a tutorial to quickly familiarize new players with the basic controls in and out of combat. Explore the road ahead to learn about save points and destructible objects.

### QUICK RECOVERY

*Save points are for more than just saving your game; they also fully restore the party's HP and EP when touched. Make certain to visit every save point, even if saving seems unnecessary at the time.*

Follow the on-screen prompts and destroy the rubble and vehicles blocking the highway by locking on and pressing the [button] button. Smash the tank sitting at the top of the road and the rubble behind it to locate a hidden **Power Shield**. Equip this accessory by using the Status screen of the Main Menu.

## A.M.W.S. COMBAT TUTORIAL

The party encounters an enemy A.M.W.S. Approach the enemy to engage it in combat. Basic A.M.W.S. combat is fully explained during the battle. Follow the on-screen instructions to pass the battle. Press the [button] button or the [button] button to defeat the Stole Marines, and use the E.S. Asher's special attacks when prompted to do so.

## TRAPS AND COMBAT BONUSES

Continue through the rubble to an unusual yellow object sitting on the highway. This is a trap! When destroyed, it affects any nearby enemies and provides a temporary combat bonus. Yellow traps provide a Stock bonus and red traps yield a Boost bonus. The Stock bonus starts the party with Stock or EC that is ready to be used for a special attack. The Boost bonus provides the party with a Boost at the beginning of the battle, allowing them to get the jump on opponents. Destroy the traps before engaging the enemy, or they do nothing.

### GUARDED TREASURE

*Attack the motionless Stole Marine standing on the left side of the road, as it's guarding a secret. Destroy the debris behind it to locate a Nano Repair A. Also, look for a small break in the guardrail near the first trap that leads to several parked vehicles. Demolish them all to find a Nano Sphere and a Nano Repair A.*

## CHARACTER COMBAT

The party abandons the E.S. Asher and explores further on foot. Engage the soldiers on the highway to learn about character combat. Although character and A.M.W.S. combat is similar, there are some important differences that are explained during the tutorial. Read carefully, but refer to the "Combat" chapter in this guide for some explanations on these concepts.

### POWER IN ACTION

Destroy the rubble along the bottom of the highway to discover a **Revive S** that's hidden beneath a giant chunk of debris.

U-TIC Soldier As in the first battle are easily defeated with the **□, □** (Zone: B, B) combo. Add the **○** button attack on the second set of enemies in the first battle to Air (with Jin) or Down (with chaos) them for extra damage. Note that chaos cannot attack airborne enemies.

### SEGMENT ADDRESS NO. 14

There's a door along the top of the highway between the first and second character battles. Destroy the door to reveal a red door hidden behind it. Inspect the red door to find Segment Address No. 14. This doesn't come into play immediately, but it's explained in more detail later in the game.

COMBAT

CHARACTERS

ITEMS

SKILLS

A.M.W.S. DATA

ENEMY DATA

WALKTHROUGH

APPENDICES

The second battle continues the tutorial by introducing Double Attacks. Follow the on-screen instructions and use the Ice Brand Double Attack to demolish the tough F2 Hauser. Use a simple ,  (Zone: C, B) combo to destroy the U-TIC Soldier B.

#### EXTRA CREDIT

*Climb the ladder after the second character battle and destroy the object to the left to uncover the most valuable items yet: three Skill Upgrade Ds! Use these items to quickly advance chaos and pick up an additional skill or two. Also, annihilate the second moving green ring along the back of the highway a bit further down the road to discover a Bio Sphere.*

Save your game after the cut-scene and take the opportunity to advance the party's skills. It would be wise to teach Medical to chaos. Jin can use skills that increase his defense (VIT +2) or attacking power (STR +2). Destroy objects blocking the tunnel and advance when you're ready to face the first boss.

N.Item	Revive DX
R.Item	Skill Upgrade E

# MARGULIS

This is the chance to put all of the combat theory into practice. Start the battle by moving chaos behind Margulis, so both fighters can perform back attacks. Attack Margulis with

△, ○ (Zone: C, B) combos to break his guard and deliver extra damage. Only strike when his back is to the attacker. Characters should Stock whenever they are face to face with the enemy.

The goal is to have at least two bars of Stock for each character by the time the boss's HP reaches roughly 500. When Margulis' back is to Jin or chaos, Boost in the other character and use

the Ice Brand Double Attack to finish the battle. Throughout the battle, make certain that no one's HP falls below 150. Margulis is very fast and can critical for more than 100 points. Protect the party from the potential of a fierce attack by ensuring they have the HP to survive.

## GREATER REWARDS

*Margulis launches a final strike when his HP is completely depleted. Because of this desperate attack, the only way to get the Skill Point bonus is to end the battle when the BST icon appears in the Event Slot.*

# SECOND MILTIA CITY

1

Join MOMO, Jr., and chaos.

2

Escape into the waterway.

3

Evade the U-TIC Soldiers.

4

Defeat Executus Sagitta.

5

Slip through the enemy barricades.

6

Conquer O-88 Libra.

7

Bust the crane to cross the chasm.

8

Fight off Pilum and Scutum.

## SPACE PORT

The Space Port is abuzz with news of the Proto Merkabah satellite debris, which has made flight impossible for the time being. Take time to look around the area, but focus on the monitors near Ziggy's starting location. Access them to view the U.M.N. Special Content. There are two bodies of work to explore: the Drama Series and the Martial Arts Web Magazine. The Drama Series provides a recap of the story from Xenosaga EPISODE I for those who haven't played the first game, or for anyone who needs a quick refresher. The Martial Arts Web Magazine provides basic combat strategies useful to new players. Join chaos, MOMO, and Jr. in the car outside when you're ready to continue the story.

## EVADING THE U-TIC

Climb the ramp on the right side of the room and destroy the objects on the raised walkway to reach the exit. Pass through the door and walk down the stairs just above the exit. Smash the crate next to the stairs to recover a **Skill Upgrade A** (x5). Backtrack and use the staircase on the opposite side of the landing to reach a narrow canal. When the U-TIC Soldiers begin to chase the party, run along the canal without pausing to avoid them. Destroy the barricade at the end and fall down the waterfall. Climb the ladder at the base of the waterfall.

### EXTRA EXPERIENCE

*The canal is a good area to earn extra experience and Skill Points. Fight the soldiers in the canal, then backtrack one screen. The soldiers reappear when the party re-enters the canal. With a save point close by, the party can heal whenever necessary. This provides an excellent opportunity to acquire a few basic skills or increase a couple of levels. Maximize the Skill Points earned by only defeating enemies when the SKL icon is in the Event Slot.*

### SPENDING SKILL POINTS

*Make sure at least two or three characters have the Medica Skill, which is a Level 1 Class A Skill. The Class B and Class D Skills are also useful. Also, equip Skills like DEX+2 and VIT+2 when they're purchased. Attacker is also an excellent Skill for Ziggy, since he has more HP than the other characters and can sacrifice some defense for a more powerful offense.*

Eliminate the crates along the back wall to find an **Antidote L** and smash the gate behind them. Walk around the ledge and climb the second ladder. Continue through the next gate and crush the box at the top of the stairs to find an **Ether Pack S**. Follow the path around the central structure and destroy the second box to find a **Revive S** (x2). To escape the next set of U-TIC Soldiers, simply cut the corners closely and don't stop once they appear.

Continue through the narrow alley and a second group of soldiers pursue the party. Rush around the corners to find a Trap. Set off the Trap to stun the enemies and flee, or engage them with the Trap's

bonus. The alley leads to the top of a steep hill and an enemy A.M.W.S. Proceed down the hill, but the A.M.W.S eventually overtakes the party.

A.M.W.S. DATA

ENEMY DATA

WALKTHROUGH

APPENDICES

## EXECUTUS SAGITTA

Type	Mech
Break	—
W.ATK.	Ether
W.ATR.	Bm/Th/Pc
HP	1760
EXP	1800
S.Pts	60
C.Pts	—
N.Item	Scrap Iron
R.Item	Junked Circuit

Use MOMO, Jr., and Ziggy for this battle. MOMO's low HP may be an issue, so watch her closely and heal often. More important is the fact that her attack is especially effective against this type of enemy. Move Ziggy behind Executus Sagitta and attack with back shots. Zones don't come into play in this battle, but Stocking can still help the party land devastating combos. Prepare to attack by Stocking whenever the enemy is facing the character. Attack when the enemy's back is exposed or the Stock gauge is maxed out.

## THE DEVIOUS TRAP

Restore any lost HP and change the battle party back to Ziggy, chaos, and Jr. Climb the stairs and get ready for a nasty battle. A helicopter swoops in and drops a laser net. A battle against four P.S.S. soldiers begins when the party gets caught in the net. They're completely surrounded and can be picked apart very quickly without the proper strategy. Focus on the P.S.S.-P soldiers first due to their low HP. Boost to eliminate the one side before the other can attack, then turn everyone around to face the remaining enemies so there are no back attacks. The remaining soldiers shouldn't be a problem.

There's no time to waste after the battle. Rush up the hill and duck into the  
 on either side to evade the laser nets. The party must repeat this  
 battle if they get caught by the net. Fortunately, there's a save point at  
 of the hill. Use it to restore the party and save, then use the elevator  
 to the top. Demolish the boxes and prepare for another major battle. Change  
 battle party to Jr., Ziggy, and MOMO after destroying the last box.

## O-88 LIBRA

Begin the battle by moving the middle character to the left. This spreads the party out and limits the amount of damage caused by the boss's missiles. Stock everyone to three bars. Start the assault just before the boss's turn by Boosting Jr. unless Jr. already has the turn prior to the boss. In that case, start the assault on Jr.'s turn and save the Boost for someone else. Boost Ziggy so that he attacks next. Perform a ◎, ◎ (Zone: A A) attack with Jr. to Break the enemy's Guard. Boost MOMO as Ziggy's turn begins and follow up with Ziggy's ◎, ◎, ◎, ◎ combo to Down the enemy and inflict heavy damage.

If possible, Boost Jr. as MOMO's turn begins and use a ◎, ◎, ◎ attack to continue the devastating barrage on the boss's weakened defenses. Keep Boosting between MOMO and Jr. until the party can boost no further or the boss interrupts by performing its own Boost. One successful chain attack should reduce the boss's HP to less than 500, which MOMO and Jr. can finish off fairly easily.

### SAVE AND RESTORE

*The fight against O-88 can be difficult. Consider returning to the previous save point after the battle to save and restore the party. Some tough battles are ahead. Saving prevents the party from having to face O-88 Libra a second time if something unforeseen should happen.*

## THE FINAL PUSH

Approach the construction equipment and destroy the joint at the front. The crane falls and creates a bridge across the chasm. The highway seems clear, but the destruction of the first barricade

reveals some hidden enemies. Beware of the enemies near the tunnel. The match-up against two Carnicos I enemies and a Rotus TI Mk II can be challenging. Eliminate the chopper quickly with Ether attacks and the help of MOMO and Jr. This keeps the enemies from performing a seemingly endless chain of Boosts. Save after the battle and climb the stairs through the door on the left. Race up the stairs without stopping, as several Carnicos I enemies are in pursuit. There's no reason to stop and fight. The party can reach the top and get through the door well before the enemies arrive.

# PILUM AND SCUTUM

MOMO and Ziggy are the most essential characters for this battle. The final spot should probably be reserved for chaos, who should have a level advantage on Jr. Start off by Stocking. The enemies should do little more than taunt on the first turn with Pilum attacking on later turns while Scutum makes demands. Use Ether skills to lower Pilum's attack if possible.

Keep Stocking until all three fighters have three bars in reserve. Attack Pilum with single hits until its HP is reduced to around 2200 or when it "gains additional ammunition." When this event occurs, wait until the boss is about to take a turn and begin Boosting characters. Use all three fighters and unleash the Stocked attacks. Cycle between Ziggy and MOMO once all three characters have had a turn and until the team can no longer Boost. Pilum should be close to elimination. Finish it off quickly.

Scutum is considerably more dangerous once the party begins attacking it. Stock three bars again and pick on the boss with single attacks until it gains a thunder aura. At this point, the boss becomes extremely dangerous, since its attack power is substantially increased. Run the exact same drill. Wait until the boss is next in line to attack and begin Boosting. Use all of the Stocked attacks and cycle between MOMO and Ziggy until the boss is defeated or the party can't Boost. Time MOMO's initial four attacks with the CTC icon by Boosting her when the random icon is in the Event Slot, so she causes as much as 500 points of damage with each attack.

## THE GS PATH

Enter the City Area and follow the main walkway until Shion encounters Agent Bunnie. The strange character is recruiting citizens for the new GS Campaign, which is a series of side events that can be completed throughout the course of the game to unlock a variety of rewards. These events are entirely optional, but those who choose to ignore them will miss out on very valuable skills and items. Agent Bunnie explains the GS Campaign thoroughly and provides Shion with the GS Path, which is accessed through the Main Menu. Clients are called out throughout the walkthrough. A full list of clients and how to complete the various missions is available in the "Appendices" chapter.

### TIMING IS EVERYTHING

*Not all of the GS Campaigns are immediately available. Pay close attention to the timing of each event to avoid wasting effort in hunting down an NPC who isn't ready to talk.*

## CARRYING ON A BROTHER'S WORK

Continue through the city toward Moby Dick's Café and Shion encounters a woman named Angelina Swaine, sister of Sergeant Swaine of the Woglinde from *Xenosaga EPISODE 1*. She presents Shion with the **Segment File** and **Decoder 06**, so that her brother's work with Segment Addresses can be continued. Scattered around the world are red doors that cover construction errors. The doors are sealed tight, but each one has a Segment Address. There's a Decoder for each Segment Address that can unlock the red door. When Shion locates a new Segment Address, it's recorded in the Segment File along with any Decoder information and items found within the address. The information can be accessed in the Main Menu at any time after it's obtained.

The red door next to Angelina Swaine is Segment Address No. 6. Since Angelina has presented Shion with the Decoder for Segment Address No. 6, she can open the door right away and find a yellow chest containing **Secret Key 3**. Secret Keys don't unlock doors; they unlock *skills*. This one unlocks the **Level 1 Class H skill, Focus 1**. Search for the other 17 Segment Addresses and Decoders hidden throughout the game. Many different treasures are located behind the red doors, including several Secret Keys.

COME BACK AGAIN

Segment Addresses and Decoders aren't normally located together. It takes a fair amount of backtracking to find all of the Decoders and open the doors, which is why the Segment File is so important. Use it whenever a Decoder or Segment Address is found to see if another door is ready to be opened.

## U.M.N. CONTROL CENTER

Look for Jr. in the small control room across from the analysis room. Return to the front of the building to find Ziggy undergoing maintenance. Go back to the analysis room and speak with Mauro at the door to gain access. Control then switches to Shion after the analysis. Head for the elevators that are just down the hall, then travel across the city to the U.M.N. Control Center. Speak to Allen within the analysis room to initiate the dive into MOMO's subconscious.

## MOBY DICK'S CAFÉ AND THE UZUKI RESIDENCE

Visit Moby Dick's Café at the top of the ramp behind the Swaine. Shion is reunited with her brother, Jin, and the duo of Jr. and chaos. All three join the party, which Shion is prodded into visiting her home, which is far away. Exit the City Area and travel to the northwest

# SUBCONSCIOUS DOME

1

Enter the upstairs bedroom.

2

Follow the phantoms into the glowing light.

3

See the first flashback.

4

Witness the second flashback.

5

Watch the flashback.

6

Observe the fourth flashback.

7

Knock down the tree to cross the stream.

8

Attack the tree to create a bridge.

9

Face the Infected U.R.T.V.s.

10

Defeat Level 4.

11

Follow the phantoms flashback.

12

Enter the garden to see a flashback.

13

Re-enter the facility for one more flashback.

14

Cross the stream by knocking the tree.

15

Cut down the tree to create a floating bridge.

16

Wipe out the enemies prior to the boss and rest.

17

Conquer Albert.

## SAKURA'S WORLD

Enter the house and go upstairs to the bedroom to initiate a cut-scene. Exit the house and follow the three phantoms into the glowing circle in the front yard.

## YURIEV INSTITUTE

The party is taken to the Yuriev Institute. Continue to follow the phantoms throughout the institute. Several flashbacks take place as the complex is explored. After the fourth flashback, the party is taken to the SC Domain.

## SC DOMAIN (SUMMER)

Enemies roam this area, so be prepared to fight. KOS-MOS and MOMO make a solid battle party. KOS-MOS and Ziggy handle Expressions and Information Types. MOMO can quickly dispatch the beefy Necessities as long as Ziggy or KOS-MOS

or Down the enemy first. These can be tricky battles until a rhythm is established. Stay near the save point at the entrance to restore between battles.

### DIVE DEVICE

*There's a hidden Encephalon dive device inside the shack to the east of the starting point. The shack is strong, so attack it several times to reveal a forbidden secret. This device is unusable at the moment.*

are a tough nut to crack. It takes three hits to break their defenses. The A B B combination can't be performed by one character alone. To get a Vacillation out quickly, have Ziggy Stock three times and Boost on O's or KOS-MOS' turn. MOMO and KOS-MOS can attack the A zone shot. Ziggy can then perform two B zone strikes to break the enemy's defenses and finish it off with the remaining Stocked attacks.

The path ahead is blocked by a stream. Check the far west end of the stream to find a large tree. Attack the tree and it topples over, creating a bridge to the other side. It's possible to tip over a second tree on the north shore to create a second bridge, but this should be unnecessary until much later in the game.

second stretch of stream poses a small puzzle. There are four stones in the water that can be destroyed and a tree at the far west end that can be pushed into the water. The stones stop the floating tree to create a bridge, so destroy the two stones on the west side before knocking the tree into the water to enable the party to reach **Decoder 04**, which is inside the box across the stream. Leave the area and re-enter, then destroy the tree but *not the rocks* to create a bridge to the path on the opposite shore.

The stream dries up in the final stretch. There are two logs that cross the creek bed. The one on the left is cracked and slippery, so use the one on the right to avoid dropping off. Look for a tree on the north shore that is up against the thick bushes. Smash the tree and walk into the bushes to find a hidden path that leads to a short drop. Drop down to find a **Boost Max**, then drop down to the creek bed below.

The enemies that appear after the creek area are a little different. Switch MOMO out of the party and add chaos. His Aura techs provide him with an advantage against the Infected U.R.T.V.s. Defeat all of the enemies in the long straightaway prior to the boss, then backtrack and use the save point. It's best to enter the battle with full HP and EP.

## LEVEL 4

Type	Bio
Break	C C B B
W.ATK.	Physical
W.ATR.	Au/Th/ Pc/SI
HP	5760
EXP	15,000
S.Pts	900
C.Pts	600
N.Item	Ether Pack DX
R.Item	Skill Upgrade E

chaos, KOS-MOS, and MOMO are a good party for this battle. chaos' attacks are automatically infused with the power of Aura, so they cause additional damage against Level 4. Make sure someone in the group has the Aura Sword skill, so that they can add the Aura attribute to KOS-MOS and MOMO, too. Someone should also have the Medica 2 skill to keep the party on their feet.

Start the battle by moving KOS-MOS behind the boss to cause back attacks. Begin Stocking attacks on each turn until all three characters are fully powered. Use Aura Sword on MOMO and KOS-MOS. Have chaos Boost on KOS-MOS' turn (or when KOS-MOS can boost after him) while the

boss is facing her and open the assault with a (Zone: C C) attack and stop. Boost MOMO as chaos begins his turn and follow KOS-MOS's attack with (Zone: B B) to cause the break and (Zone: C C) to Down the boss, which is very important. KOS-MOS Airls the opponent with her (Zone: C C) tech, which puts the enemy out of reach for chaos. Boost KOS-MOS as MOMO begins her turn (with the Aura Sword status effect on) and follow up with a (Zone: C C) attack at a huge bonus. KOS-MOS then finishes the cycle with her Stocked attacks. The damage caused should be sufficient to end the battle.

### THE PARASITE

Level 4 has the ability to create Infected U.R.T.V.s that it can use to heal itself by absorbing their HP. Ignore these creations when they appear. The boss replaces them when they're destroyed, so attacking them is actually a waste of time. Once Level 4 is defeated, clear out the remaining Infected U.R.T.V.s.

## YURIEV INSTITUTE II

The party returns to the Yuriev Institute after the battle. Take a moment to restore, then follow the phantoms out the east end of the building garden area. Two more flashbacks occur in the garden. Leave the southwest exit after the second flashback and follow the phantoms back into the heart of the facility to witness the final dive flashback.

## SC DOMAIN (WINTER)

The party is returned to the SC Domain, but the weather has changed. The enemies are a bit stronger this time around, too. Continue to use Ziggy, KOS-MOS, and MOMO to fight. The path through the forest is essentially the same. The items have changed, but the puzzles are the same. Things don't really change until the final stretch in which the party encounters a small maze over a chasm. Clear the enemies and return to the save point to prepare for the next boss encounter.

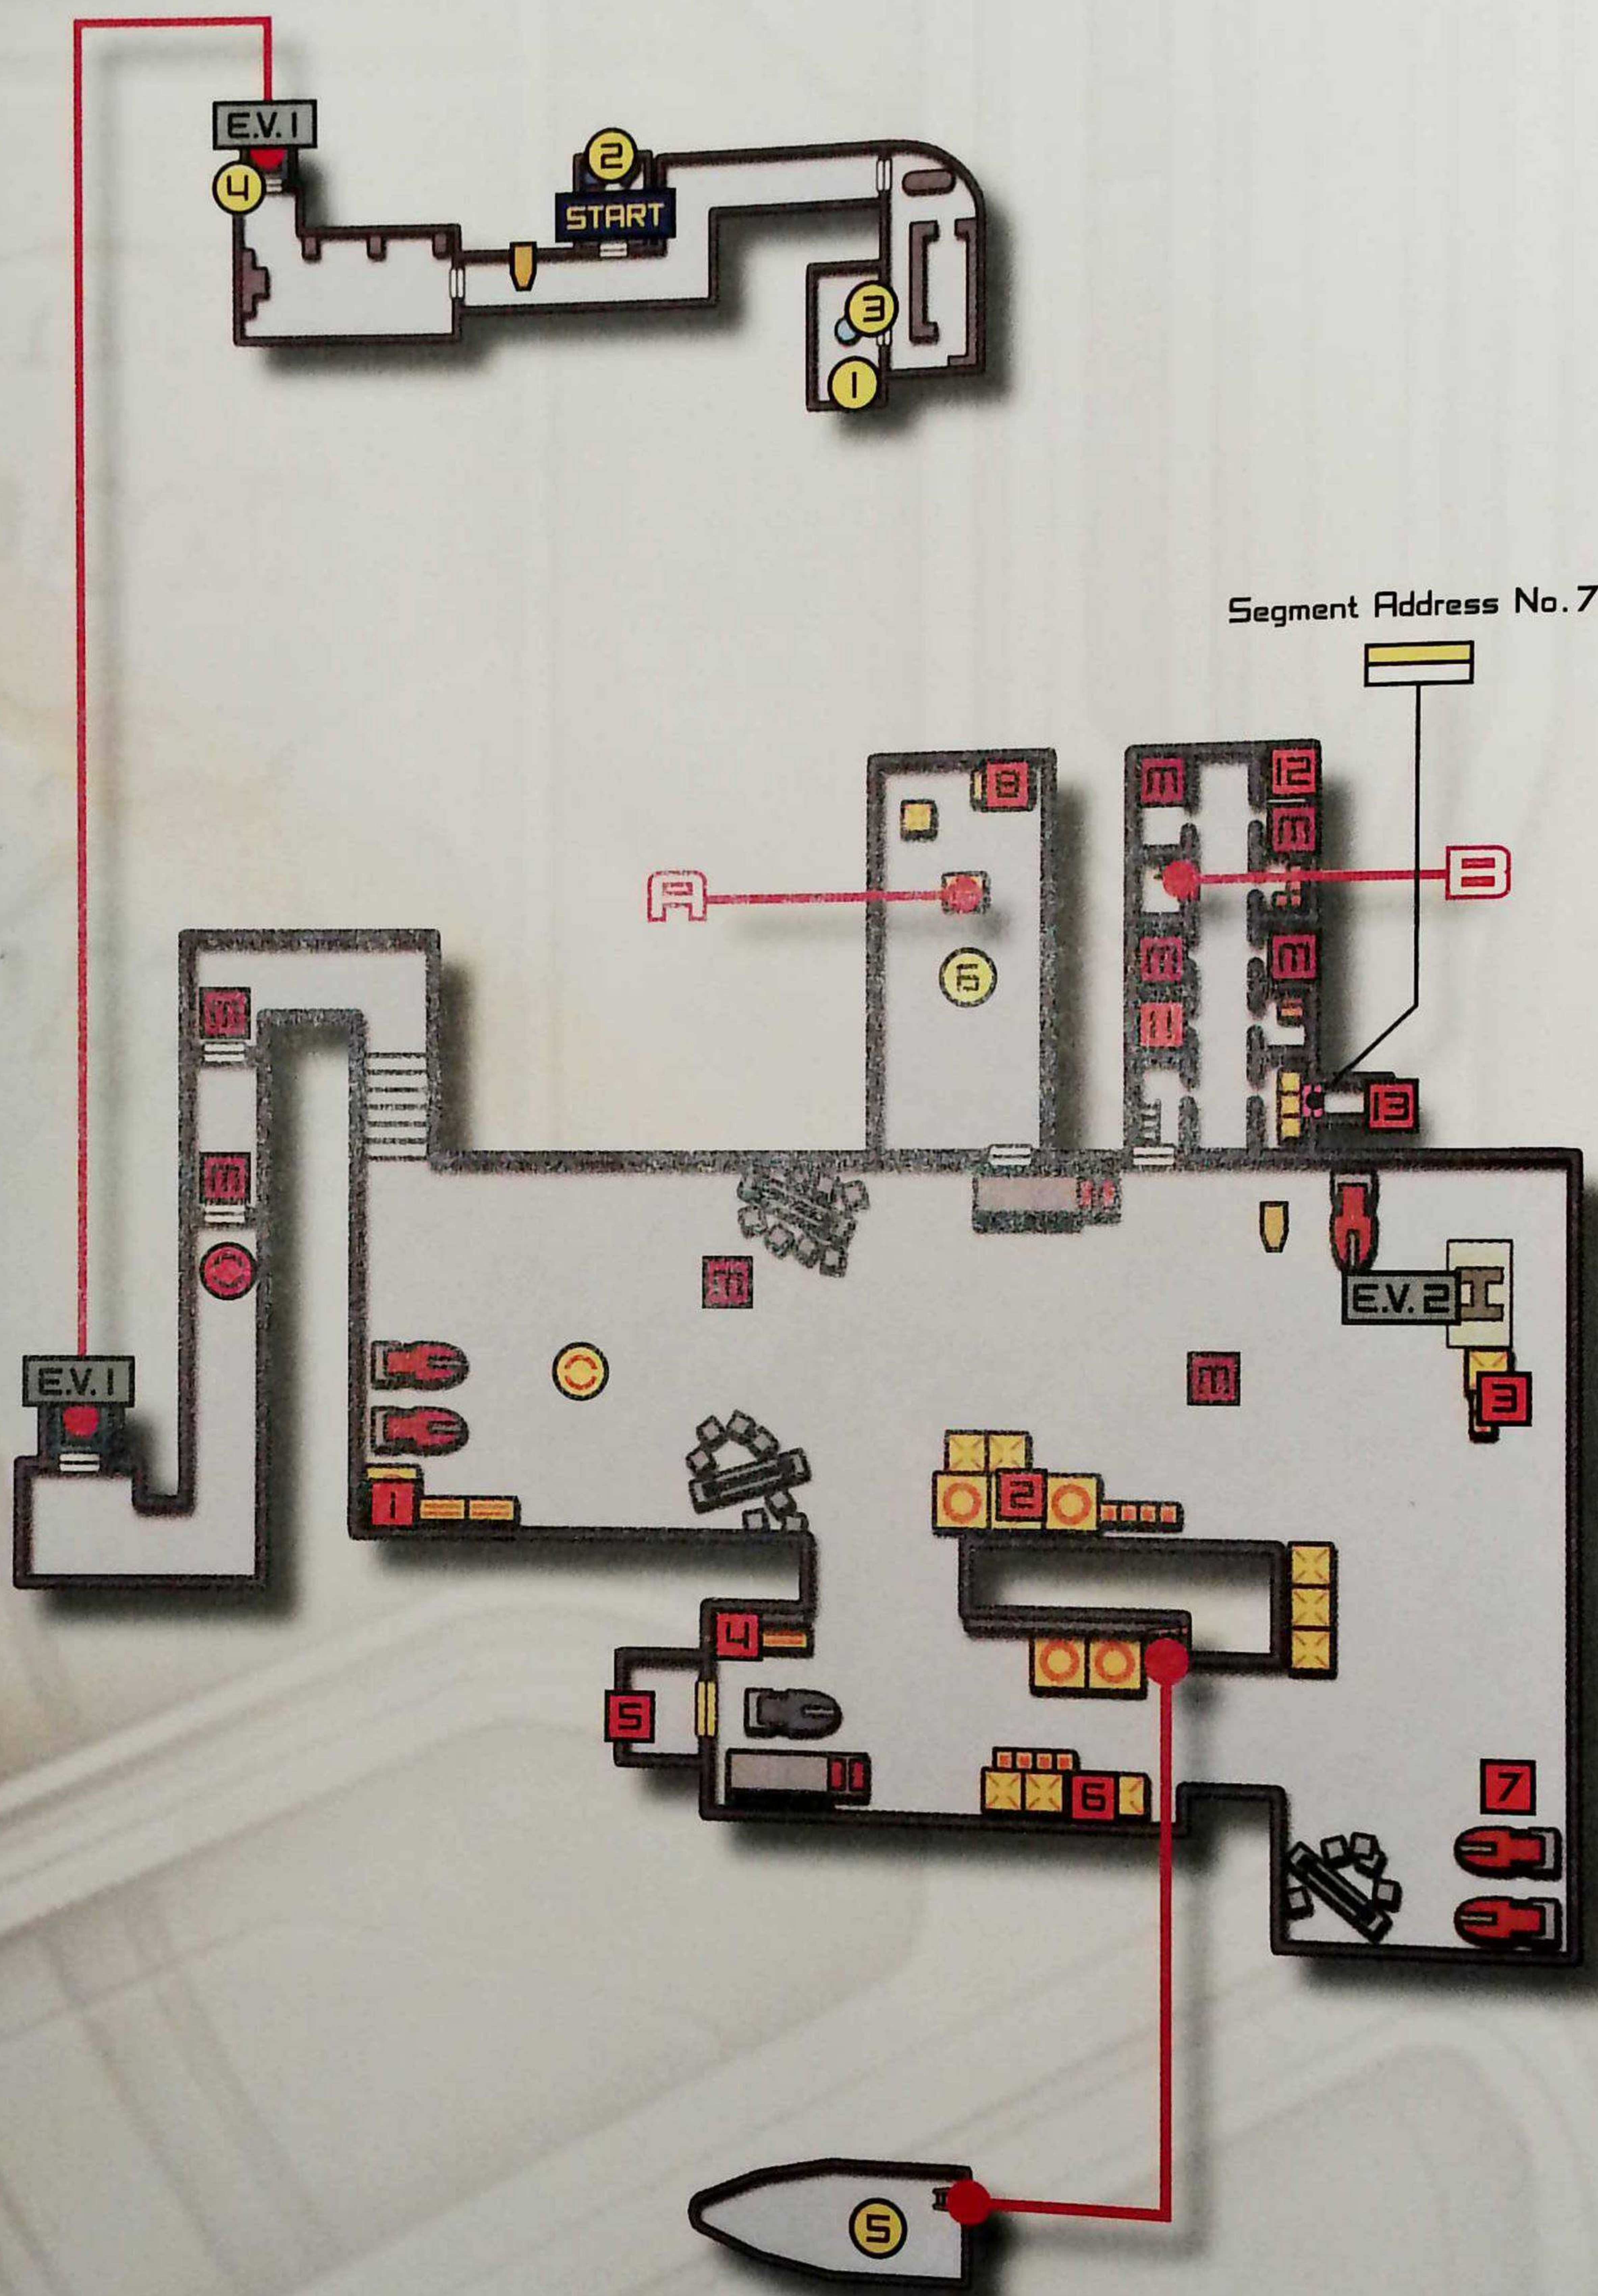

### STREAM PUZZLE

The stream puzzle has changed the most. There are now two treasures hidden on the north side of the water. Destroy the three rocks on the west side first before releasing the tree on the west end to get the Skill Upgrade B (x4). Leave the area and come back, then remove the two rocks on the west side of the stream before knocking down the tree to get the Bio Sphere. Leave once more and knock the tree down without destroying the rocks to cross to the north side and continue onward to the boss.

# DÄMMERUNG

1

Talk to Allen.

2

Take a nap.

3

Return to the communications room.

4

Use the elevator to access the restricted area.

5

Trigger the guns to reveal a hidden door.

6

Smash the bridge support.

7

Create a bridge from the crates.

8

Access the computer console.

9

Ride the conveyor belts to hole 4.

10

Tilt the glass to reach the catwalk.

11

Shut down the fan to reach the elevator.

12

Enter the hangar.

## ENEMY DATA

NAME	Type	Break	W.ATK.	W.ATR.	HP	EXP	S.Pts	C.Pts	N.Item	R.Item
Armored	Mech	C B	Ether	Bm/Th	1840	880	44	15	Scrap Iron	Junked Circuit
Armored	Mech	B B	Ether	Bm/Th	2720	1180	48	15	Scrap Iron	Junked Circuit
Armored	Mech	—	Ether	Bm/Th/Pc	960	800	40	15	Scrap Iron	Junked Circuit

## TOP FLOOR

Find the communications room at the east end of the hall. Talk to Allen about a sedative, then return to Shion's room and inspect her bed to get some rest. Return to the communications room when Shion wakes up. Exit the room after the cut-scene and run to the west end of the hall and board the elevator to reach the restricted area.

## RESTRICTED AREA

Security is tight down below. Mechanized units patrol the floor in great numbers. Although Shion is on her own, she is well equipped for the upcoming battles. Her attacks are Thunder-based, which happens to be a weakness shared by all of the enemies.

The Dämmerung presents an excellent opportunity to level up and teach Shion new Skills. Defeat enemies while the SKL icon appears in the event slot so that Shion can collect lots of Skill Points after each battle. Most of the battles feature a VSS Emissive and a VSS Fresnel. The VSS Emissives are hologram projectors that don't attack, but they can "revive" a VSS Fresnel once per battle. Defeat the VSS Fresnel first so that Shion is facing three enemies per battle to enable her to collect several hundred Skill Points each time. Also, use the Psycho Pocket Skill to steal items from enemies. It's possible to steal both the normal and rare item from each enemy!

There are several Skills to purchase that help Shion survive. Focus 1 (Level 1, Class H) enables her to restore lost EP by using the Stock command. This is essential when using the Psycho Pocket Skill, because she quickly burns through her EP. With this Skill, she can easily end each battle with full HP and EP. Medica 2 (Level 2, Class C) is important for restoring her lost HP. Shion takes a pounding while waiting to defeat enemies when the SKL icon is visible. Consider purchasing Psycho Pocket (Level 1, Class H) early on, if you haven't done so already.

Follow the hallway from the elevator into a huge vehicle bay. Walk to the bottom of the room and enter the large vehicle docked in the middle. The big crates on the right side conceal a ladder, so smash them and climb the ladder to reach a weapons platform.

Segment Address No.1

WALKTHROUGH

APPENDICES

## BOX PUZZLE

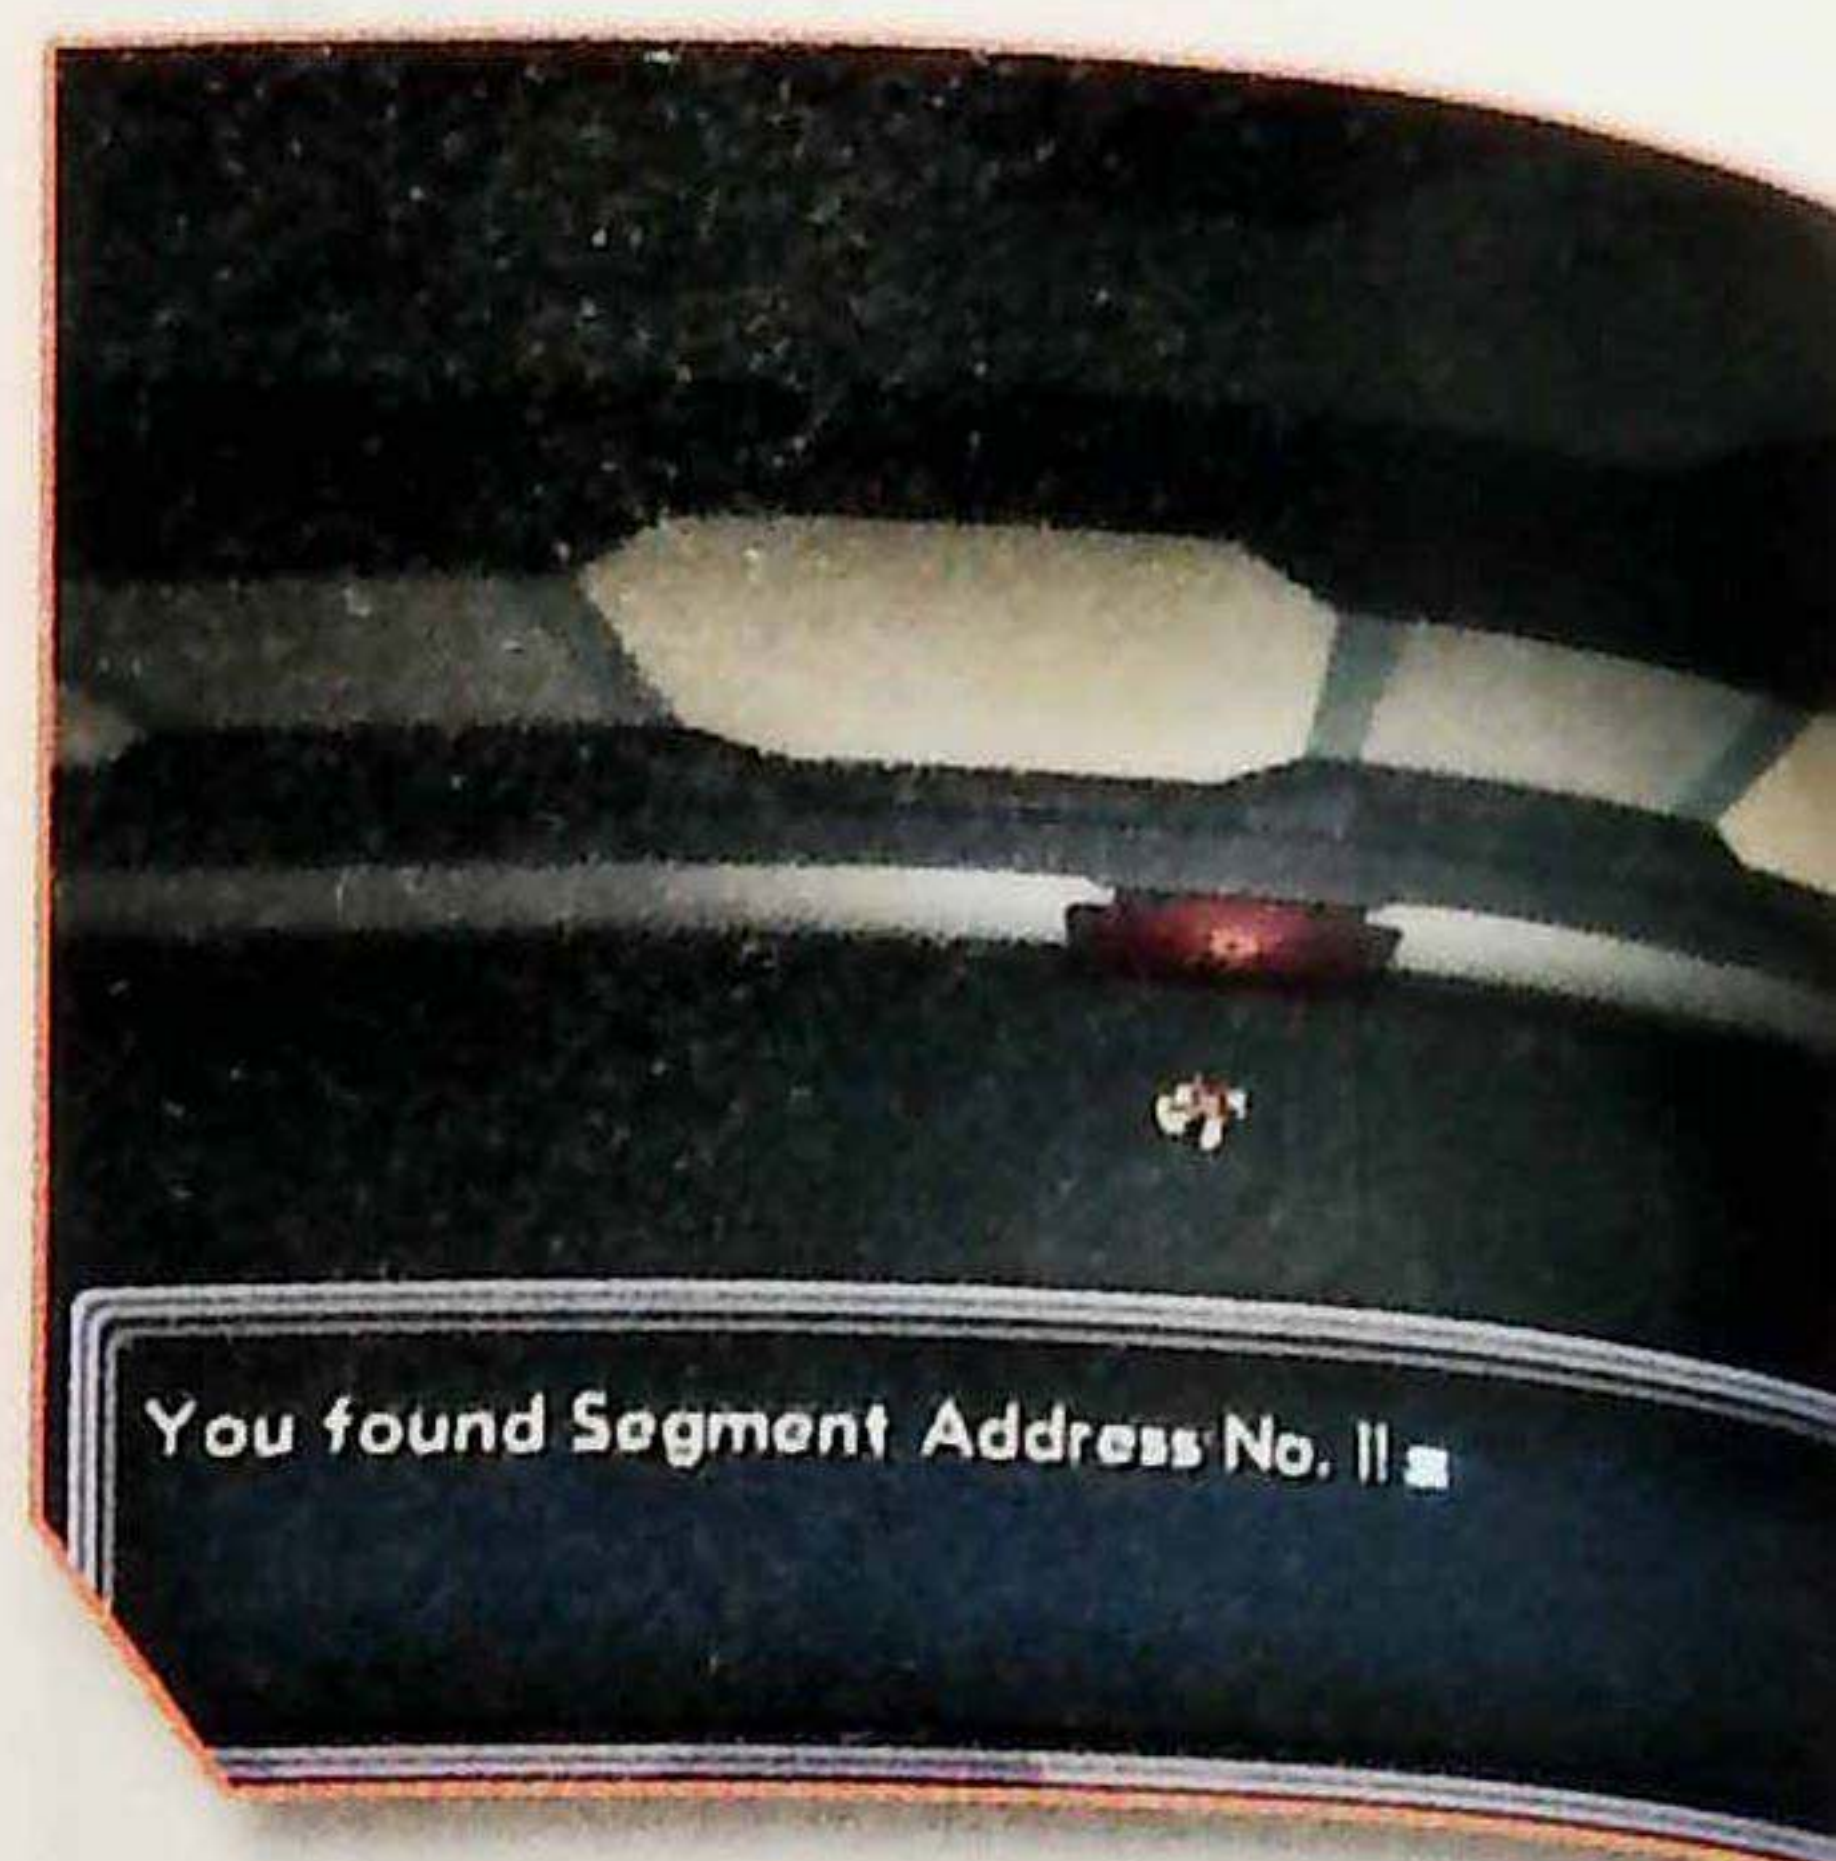

Before completing the puzzle, climb down to the bottom floor and carve a path through the boxes to the back wall. **Segment Address No. 1** is well hidden on the back wall. Shion should have Decoder 01 in her possession, so unlock the door and grab **Secret Key 8** from the yellow chest behind it. Reset the puzzle at the red panel after collecting the item.

Destroy a few of the boxes to create a bridge from the right catwalk to the left catwalk. Follow the diagram (see the image below) by destroying the number of boxes listed in each location. Demolish the boxes on the far right side of the room while Shion is

standing on the boxes, not while she's on the floor. Create the bridge and cross the room to reach the second level of the vehicle bay.

## CONVEYOR BELTS

Access the computer next to the elevator on the right end of the catwalk. Use the elevator to save, then enter the door next to the computer monitor on the second floor. The following room consists of a series of conveyor belts. There's a number next to each belt. Go across the belts to the back wall and look for a number "4" on the left side. Drop into the hole next to it to reach the stairs in the storage room below.

### MOVING ITEMS

*There are two boxes on the conveyor belts. Attack the boxes to knock them off the belts and into the rooms below, then check those rooms to collect the items.*

## LOCKED TIGHT

The large metal door to the west that hides Decoder 18 is tough to destroy. To demolish it, attack it repeatedly until Shion uses all of her power.

destruction. Attack the pillar in the center of the room to make the catwalk fall, which creates a ramp to the floor above. Go up the ramp and head to the left to find a storeroom packed with boxes.

32: For the Captain!	When Elsa is available	Secret Key 19, KOS-MOS' X-Buster Special Attack, Jin's Swimsuit, Skill Upgrade E (x40), and Power Strike Double Attack	page 179

## STANDING FLOOR

Stairs to the Research Block. The long hallway leads to a large room with a giant pane of glass resting on eight large pillars. Check the red console on the back wall to get the basic instructions for this puzzle. Destroy the three boxes on the left side of the stairs and the one just to the right of them. Climb onto the glass and stand on the top-left corner until the glass tilts down. Cross the glass diagonally and stand in the bottom-right corner. The glass tilts again, tilting down and smashing the box underneath the corner. Walk to the chest that appears across the room and check it to get Decoder 15.

Stand on the top-left corner again to tilt the glass. Walk onto the catwalk next to the bottom-right corner while the glass is tilted.

## THE GIANT FAN

A giant fan in the next room makes it difficult to reach the elevator at the end of the hall. Push through the wind to reach a switch on the right wall behind a glass partition, which deactivates the fan. The wind is very strong, so walk down the hallway and use the elevator platform in front of the fan for a moment. By staying close to it, Shion can just barely reach the switch before she gets blown away. Climb the ladder next to the elevator and use the elevator to reach the hangar.

# ORMUS STRONGHOLD

1

Unlock the entrance to Ormus Stronghold.

2

Disembark from the E.S. and activate the elevator.

3

Demolish the airlock on the surface.

4

Conquer Pilum and Scutum.

5

Create the sky bridge.

6

Return to the E.S. hangar.

7

Cross the sky bridge.

8

Solve the elevator puzzle.

9

Move the boxes create a bridge.

10

Find the way through the transporters.

11

Beat Orgulla.

12

Destroy the energy conduits.

13

Activate the self-destruct mechanism.

14

Retreat to the E.S. Hangar within 30 minutes.

15

Defeat the E.S. Issachar.

## PILUM AND SCUTUM

### PILUM

Type	Melee
Break	—
W.ATK	Physical
W.ATR	PhySt
HP	12,700
EXP	4000
S.Pts	—
C.Pts	—
N.Item	Anti-Thunder Armor
R.Item	Thunder Cannon

Pilum and Scutum are back, but the party is better equipped for the battle this time. Prepare for this battle by making a few changes to the party. Switch Shion with chaos, so she's riding in the E.S. Asher with Jr. and chaos is copiloting E.S. Dinah with KOS-MOS. Replace Ziggy in the E.S. Zebulun with Jin. These switches change each E.S.'s 200% Special Attack. The E.S. Asher has the Gatling Blast, the E.S. Dinah uses the Chained Blast, and the E.S. Zebulun has the Golden Bow. These attacks are much more effective against the enemies' weaknesses. Also, switch the order so that E.S. Zebulun and E.S. Dinah begin the battle with E.S. Asher in reserve.

Start by Stocking for two turns and unleashing Chained Blast and Golden Bow on Scutum. Use Boost to speed up the assault and Scutum should fall before anything serious occurs. Use the E.S. Zebulun's Ether Skills to restore the E.S. Dinah, then switch the E.S. Zebulun with the E.S. Asher. Finish the battle by Stocking and targeting Pilum with the powerful Gatling Blast and Chained Blast. Pilum should collapse just as quickly as Scutum.

### SCUTUM

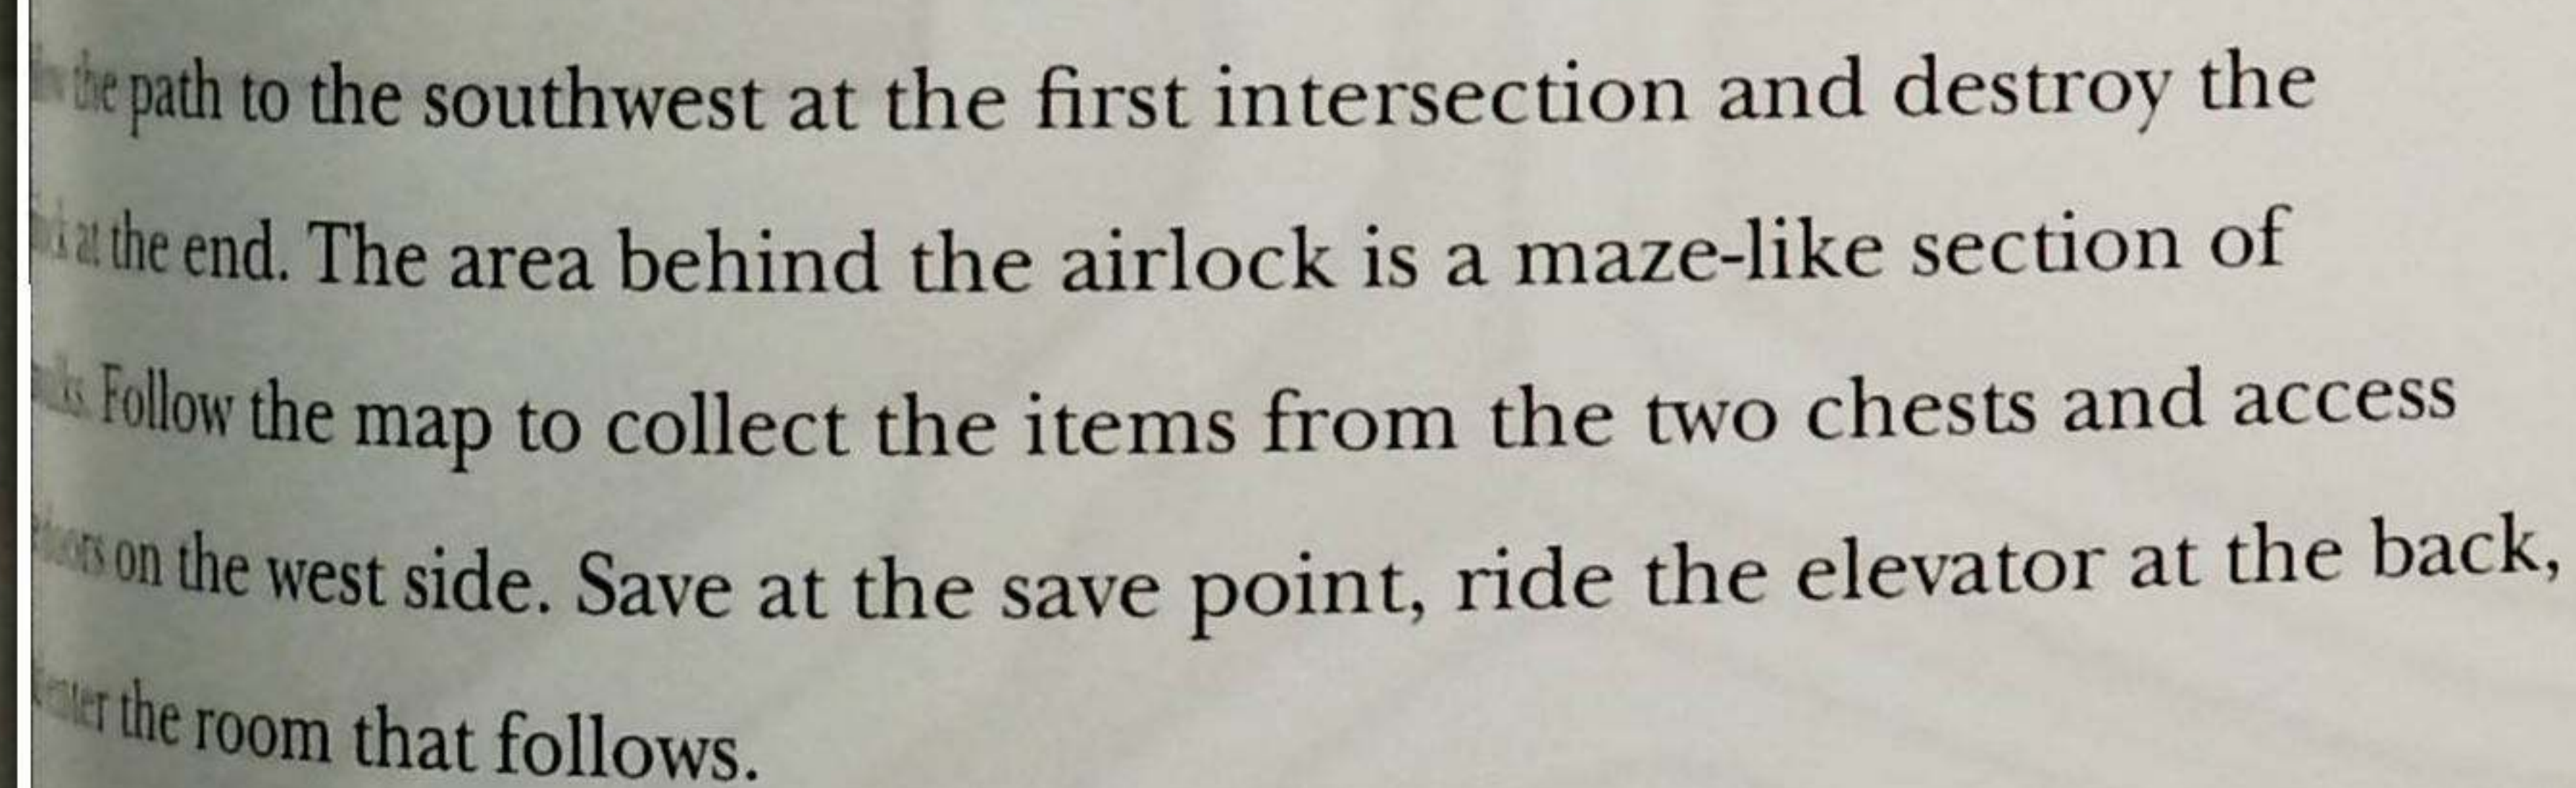

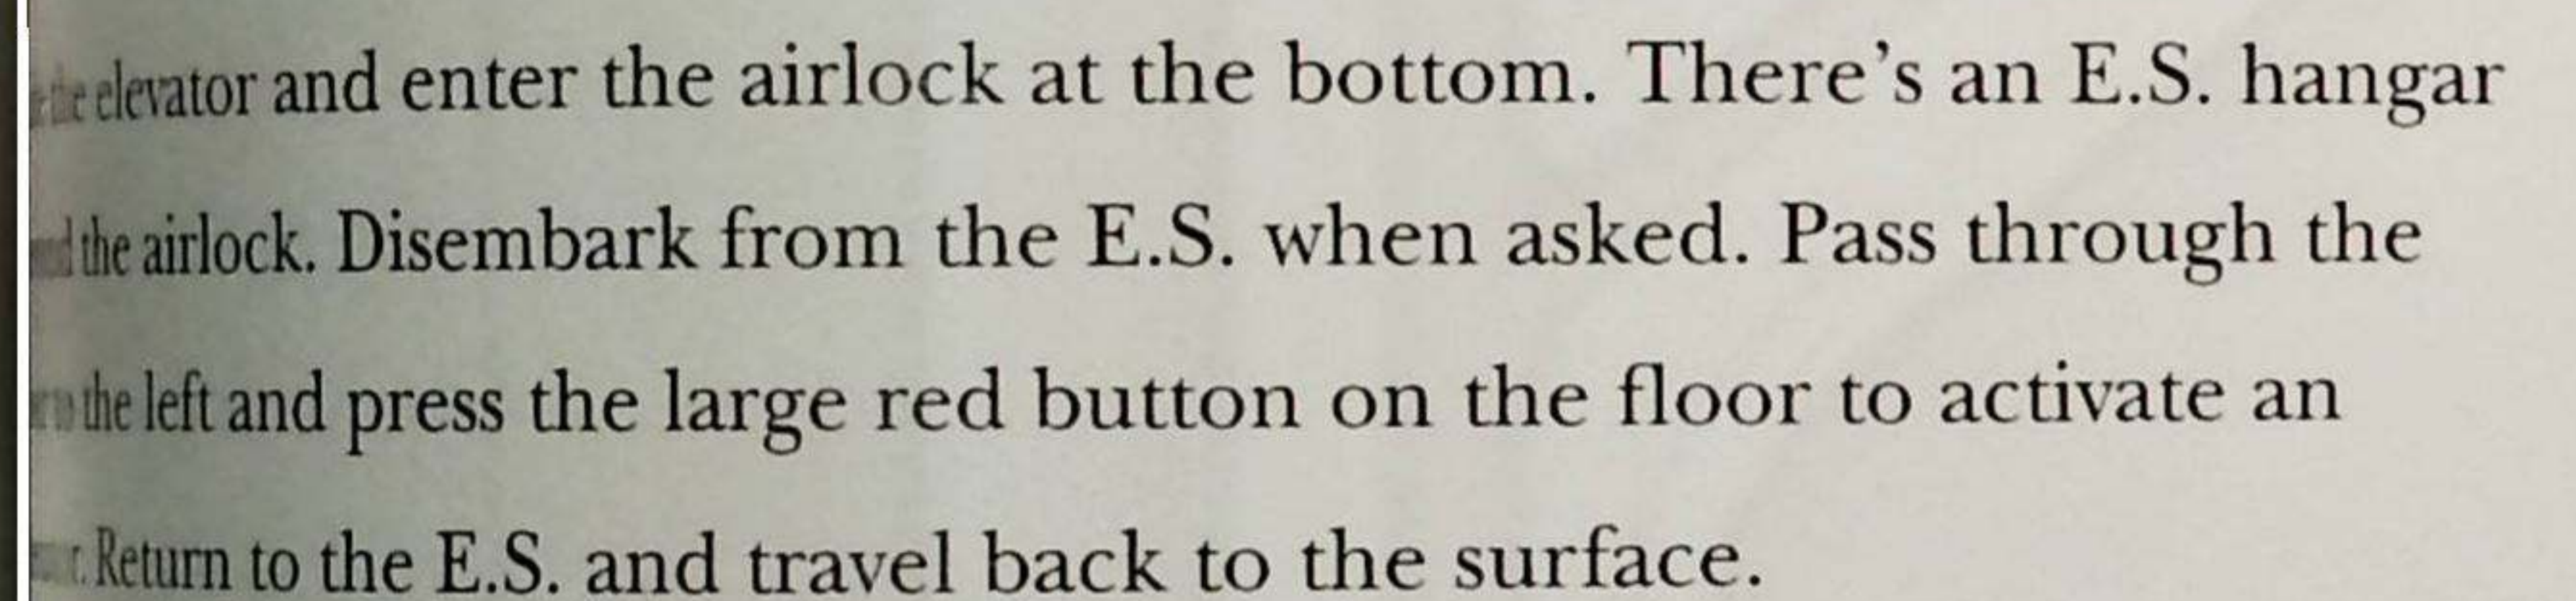

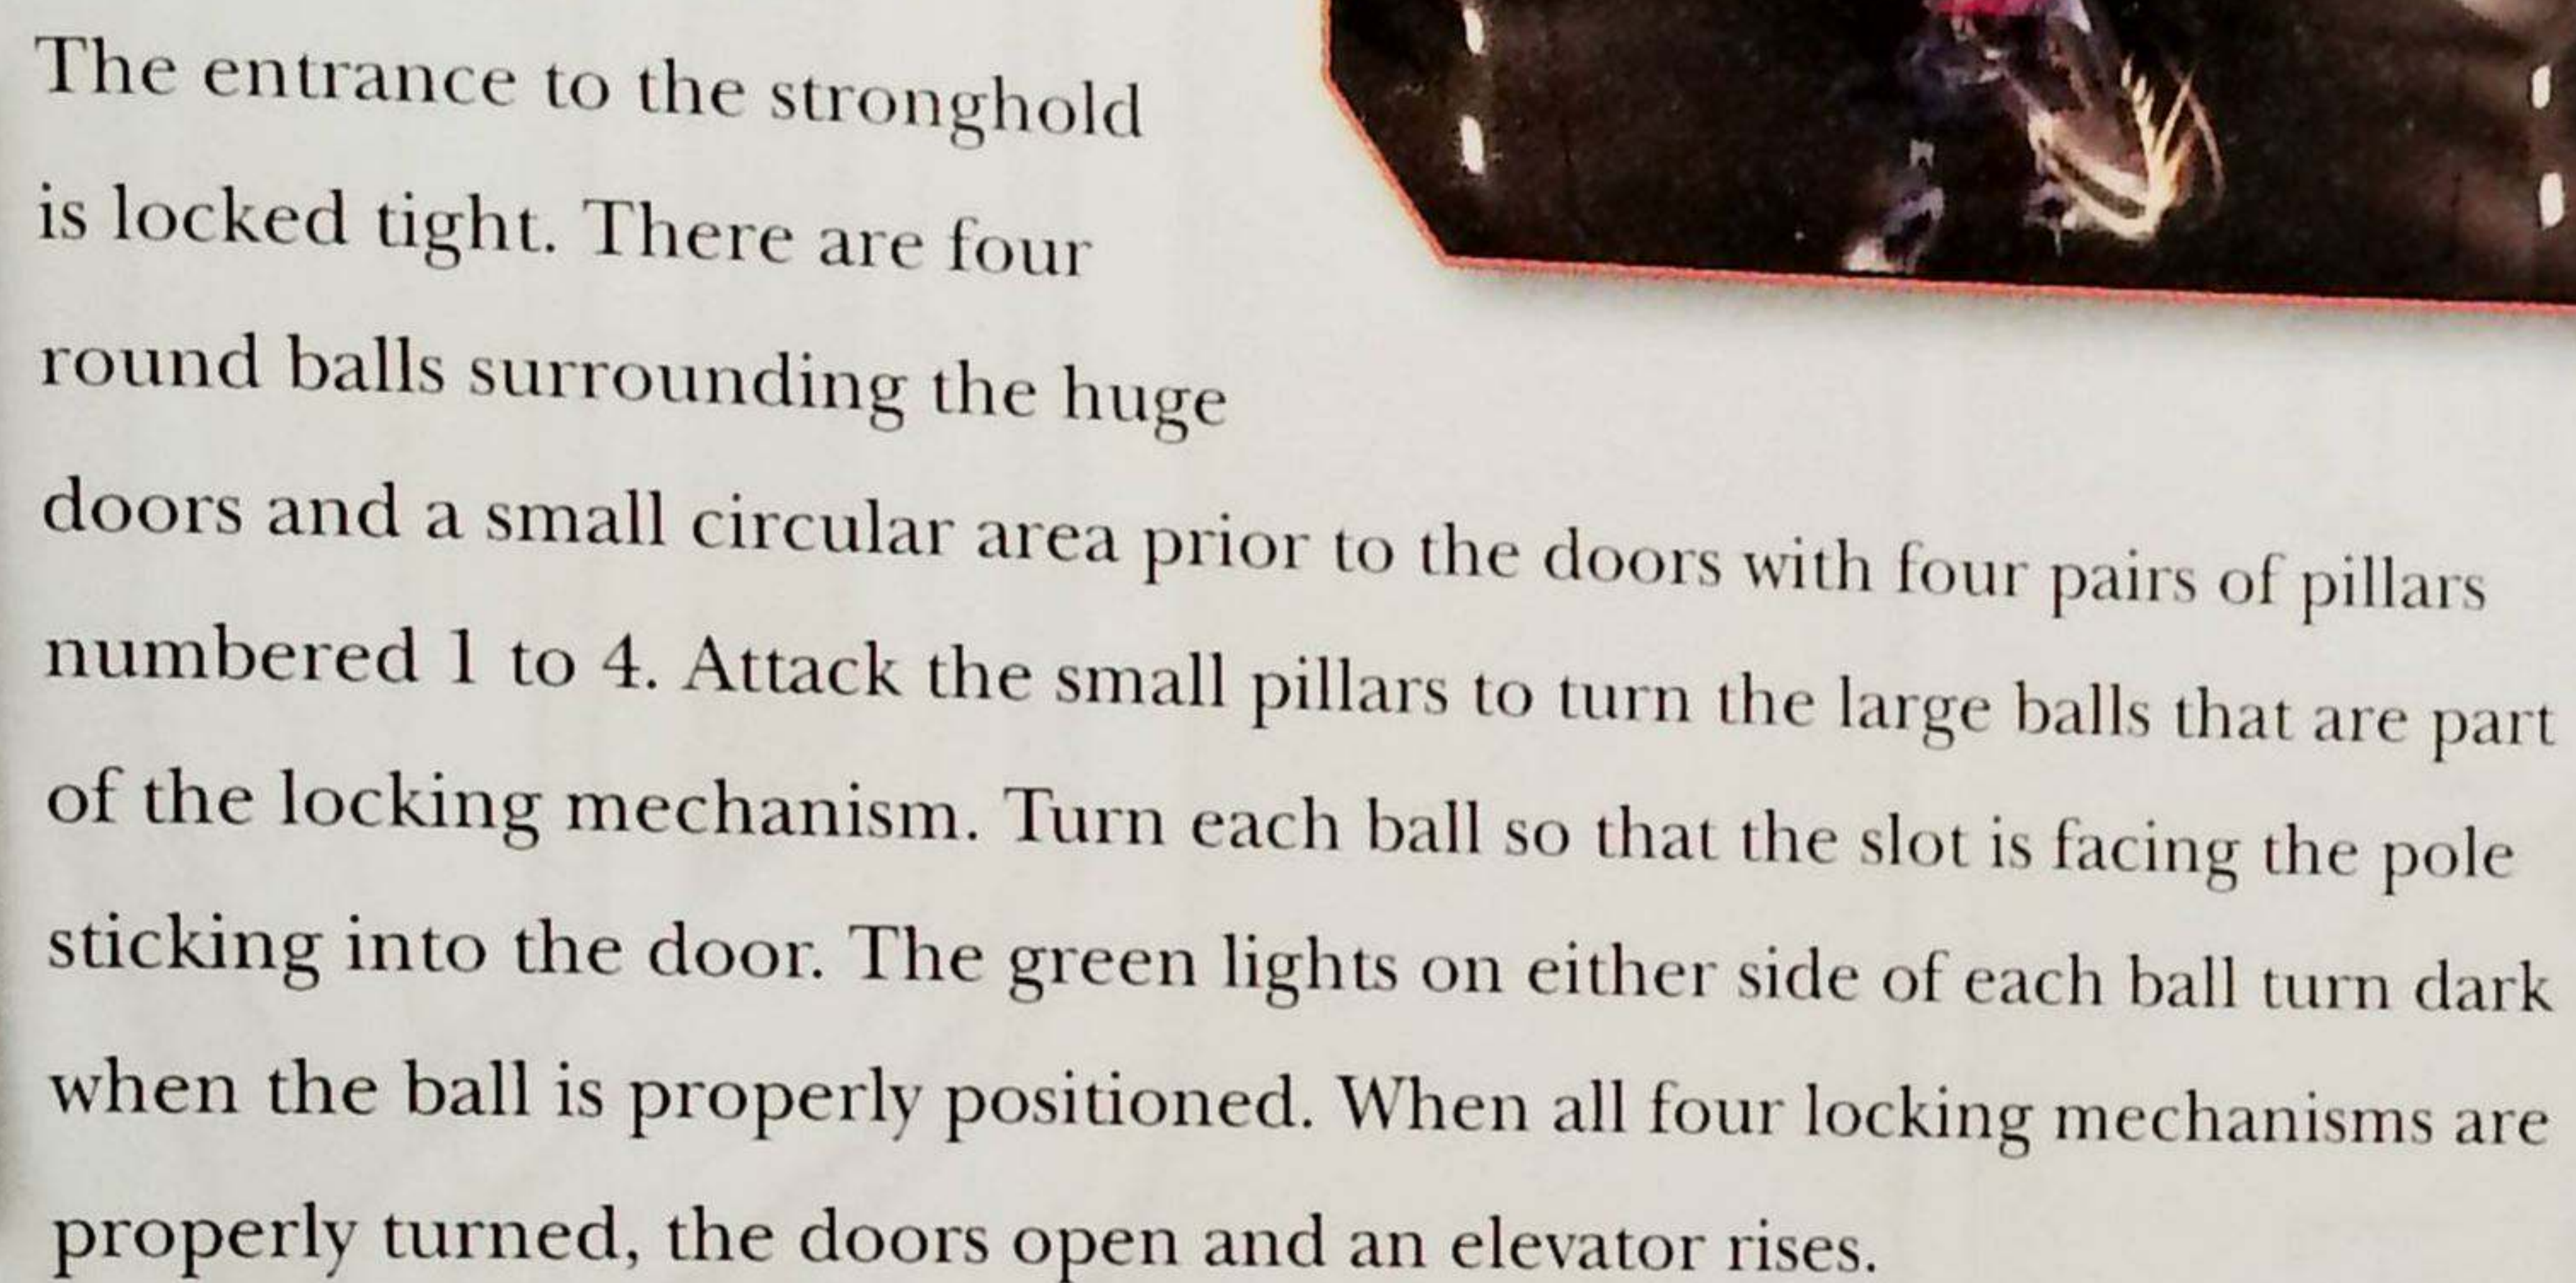

Type	Melee
Break	—
W.ATK	Ether
W.ATR	BNTA/TH
HP	19,200
EXP	5000
S.Pts	—
C.Pts	—
N.Item	Anti-Fire Armor
R.Item	Charge Boost

There's a good chance that Pilum will unleash its ultimate attack, the Naglfar Third Portable Weapon. This Beam attack is capable of 6000+ points of damage, so keep all of the E.S.s above 7000 HP throughout the battle. Pilum seems less likely to use the attack if Scutum is destroyed very quickly.

the ramp down to a narrow walkway. Travel to the first intersection east. Destroy the object in the alcove at the end to reveal another **Dimension Dive Device** like the one in MOMO's subconscious. Return to the south and travel south. Continue northwest at the next intersection to the entrance to Ormus Stronghold.

Only the E.S. can destroy the huge box on the walkway behind the elevator. Stand at the back of the elevator and attack the box as soon as it's targeted. The party will be using that path soon enough. Fail to destroy it now and you'll be forced to backtrack later.

## ELEVATOR PUZZLE

The walkway leads to a puzzle. There's an elevator and a large stack of blue and green objects. To lower the elevator, push the objects onto it. The challenge is to determine exactly which objects go on the elevator and which ones need to be destroyed. The solution is actually very simple. Stand to the right of the stack, face west, and push the green objects onto the elevator, then stand below the stack, face north, and demolish the blue objects.

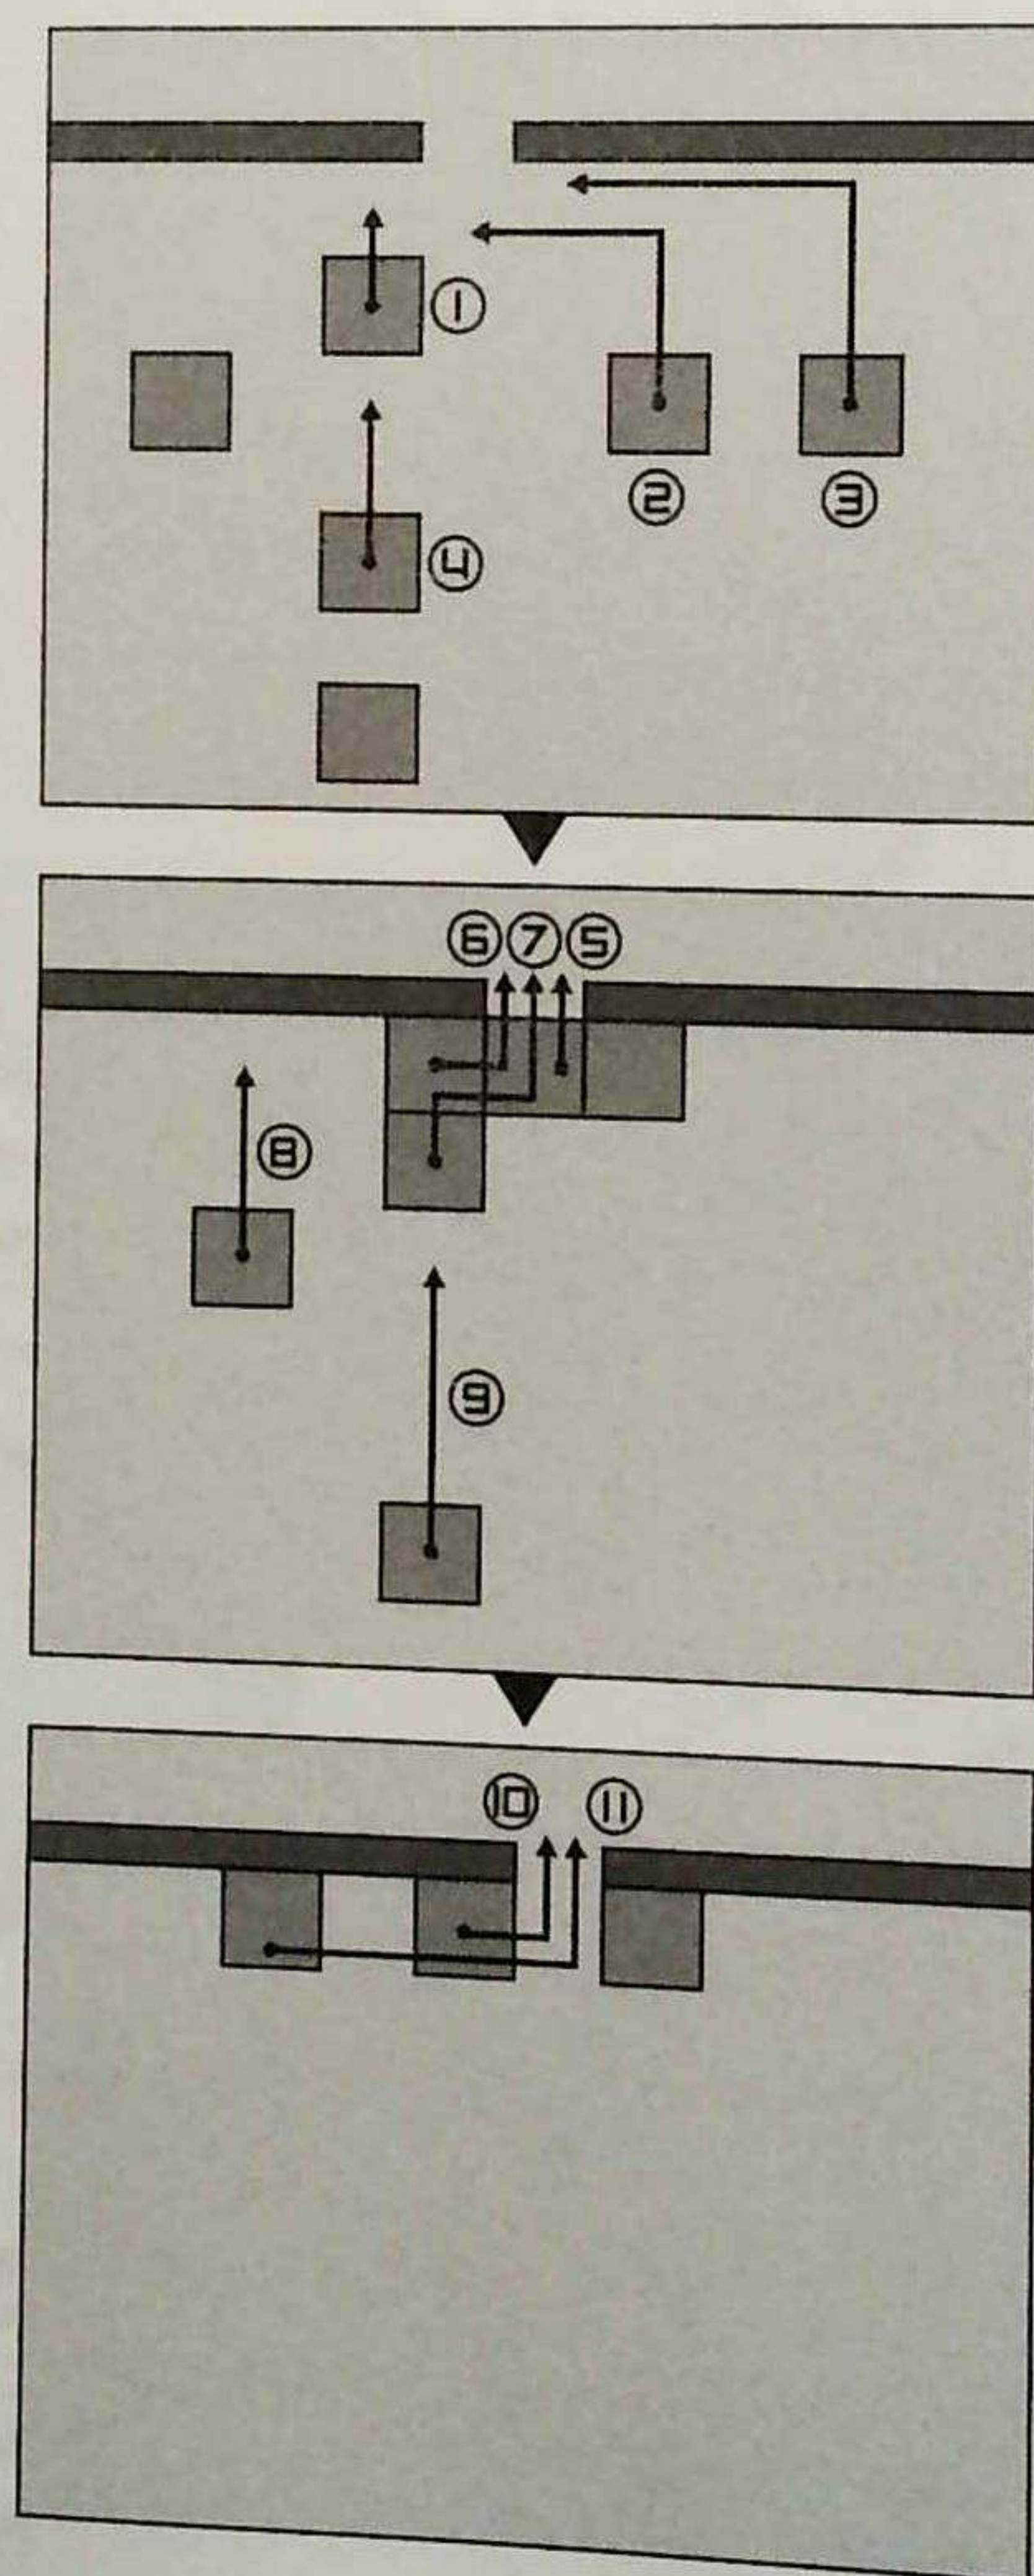

Climb down the ladder when the stack is gone. Step onto the elevator and destroy the bottom object. The elevator rises to the ledge on the left side.

## BOX PUZZLES

The room after the elevator features a large pit in the center and two stacks of boxes. The boxes are used to create a bridge across the pit. Those at the front slide when hit until they encounter a wall, another box, or fall into the pit. Follow the diagrams (see images to the right) to solve the puzzle.

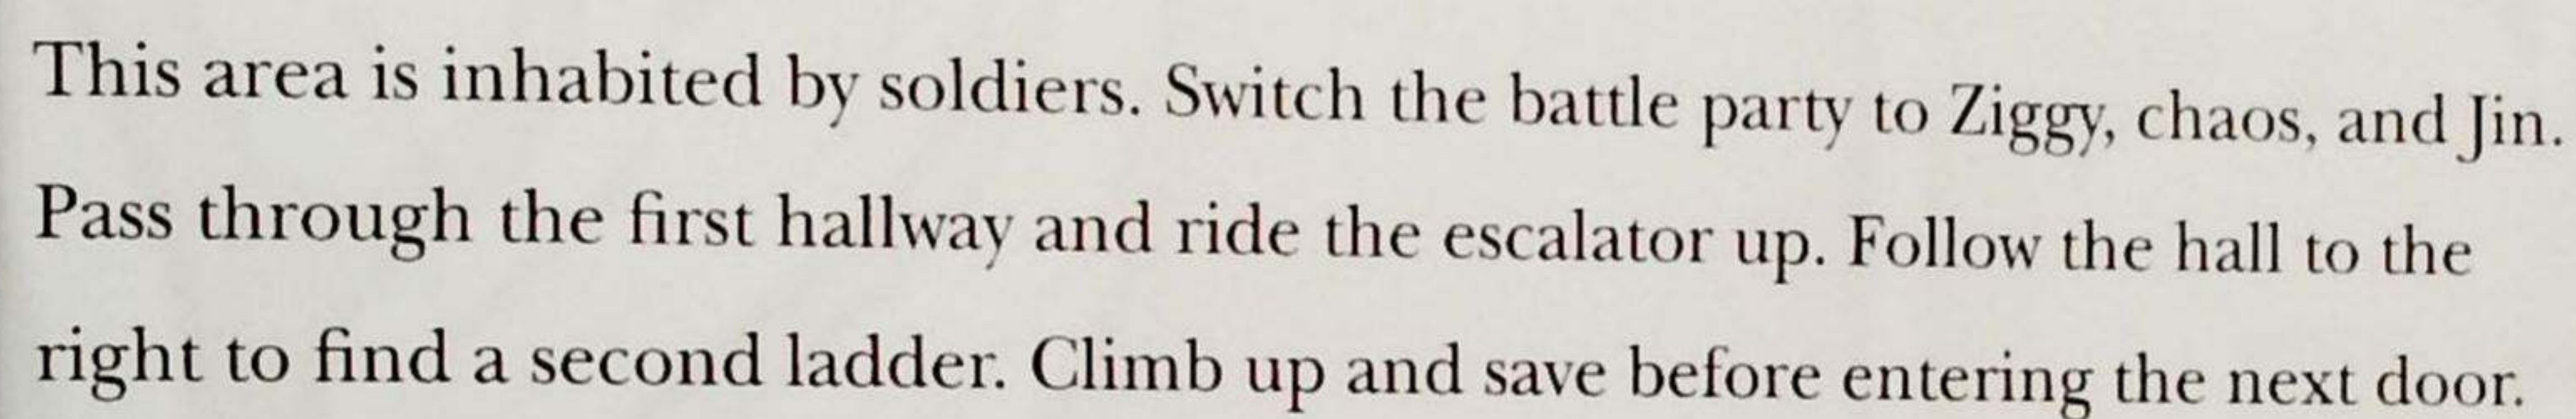

The green boxes on the far side of the room are used to reach **Segment Address No. 13**. These boxes move one space at a time. Follow the second set of diagrams (see images at top of the next page) to reach the red door on the right side of the pit.

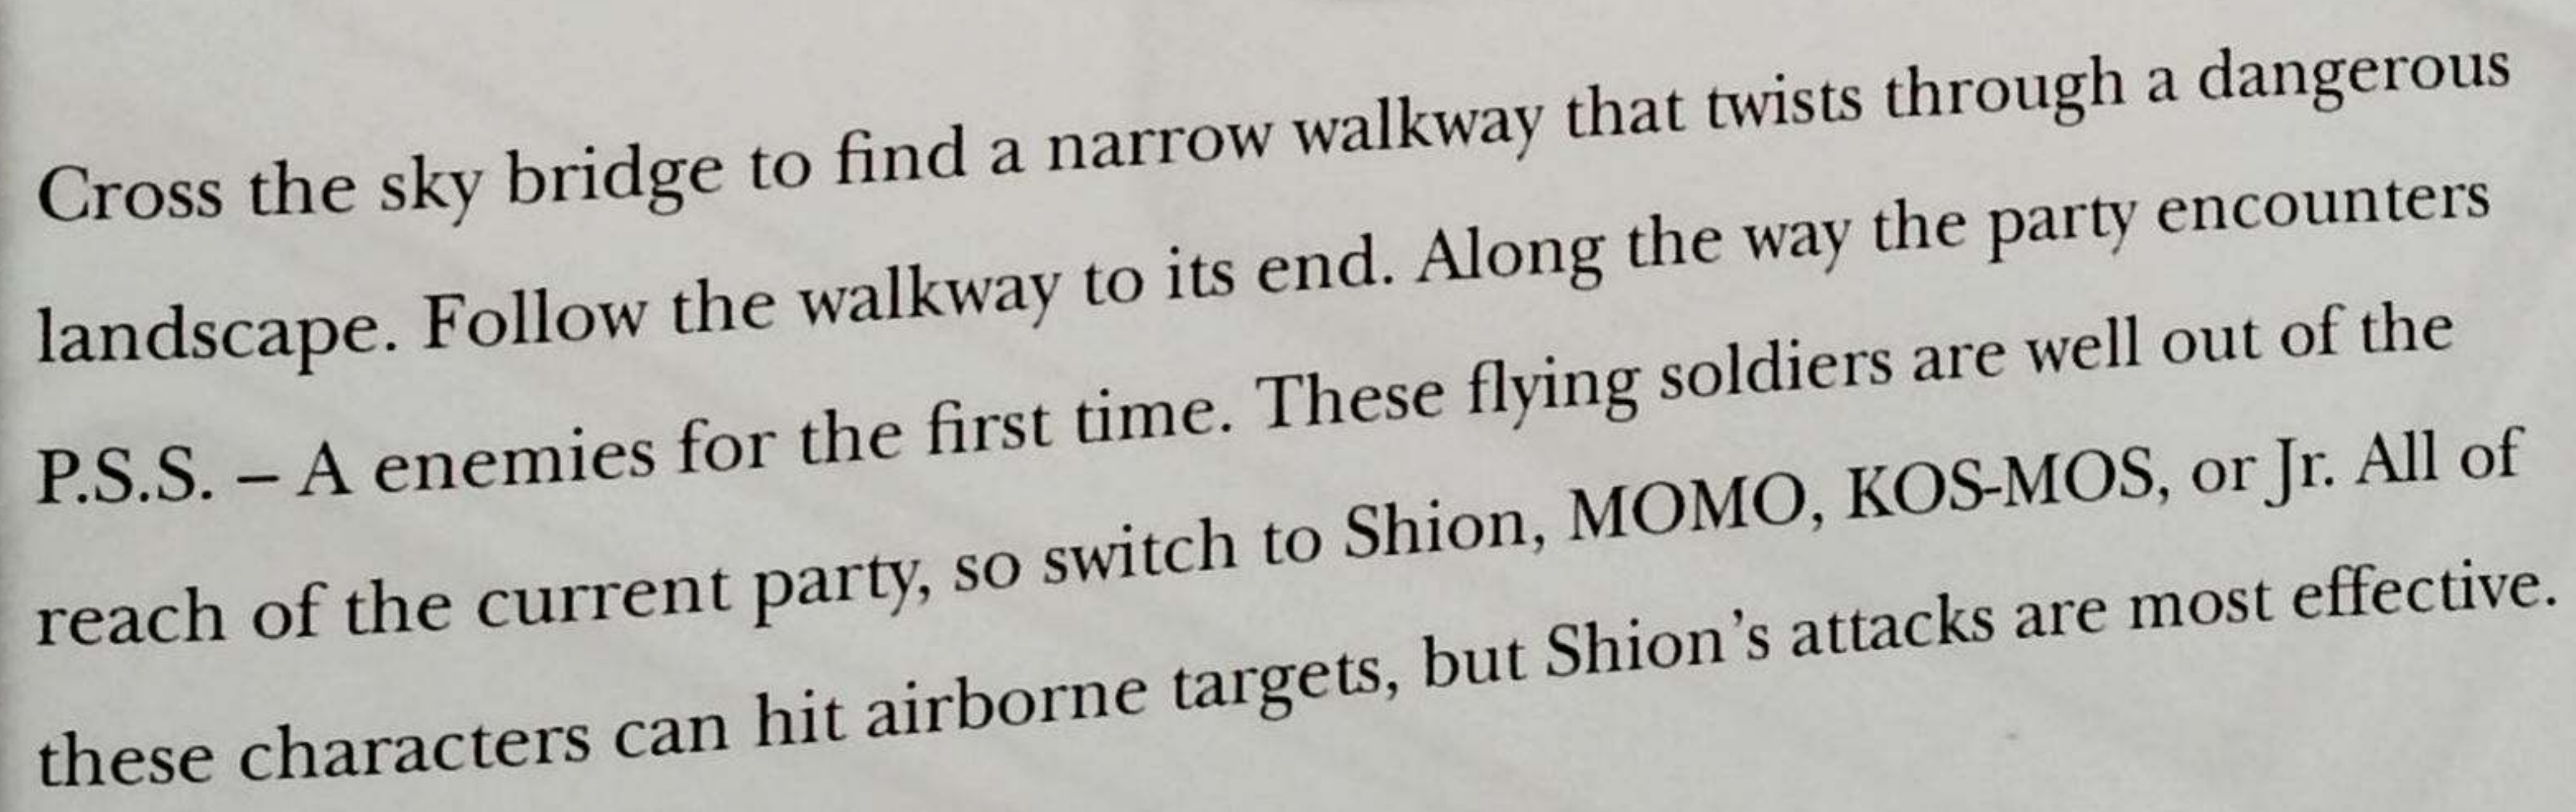

the room after the boss battle. Press the switch on the  
create a walkway above the room. Backtrack to the E.S.  
and disembark. Enter the room to the left and pass  
the door on the opposite side. Get back in the E.S.s  
which is blocked by a large box and return to the elevator  
the first boss and destroy the box while riding on the  
Otherwise, pass through the second door and climb  
at the back of the room.

*The door in the center of the middle hallway is very sturdy. Attack it repeatedly to break it down. Check the hall behind it to find Decoder 02.*

# ORGULLA

ORGULLA	
Type	Bio
Break	B C B B
W.ATK.	Ether
W.ATR.	Th/St
HP	18,000
EXP	27,000
S.Pts	1800
C.Pts	1800
N.Item	Skill Upgrade E
R.Item	Awakening II

ORGULLA (MANES FORM)	
Type	Bio
Break	C B B
W.ATK.	Physical
W.ATR.	Fi/Pc
HP	18,000
EXP	27,000
S.Pts	1800
C.Pts	3600
N.Item	Skill Upgrade E
R.Item	—

Start this battle with Shion, KOS-MOS, and Jin. Strengthen their attacks by using Thunder Sword on KOS-MOS and Jin. Stock up and launch a series of attacks.

Either Jin or KOS-MOS should lead the assault to put Orgulla in the Air. Boost the others behind the leader and unload with everything in their arsenal. Make sure one or two of these fighters have the Medica All Skill. Orgulla's scatter attack can be a major problem without it.

## AWAKENING II

*Use Psycho Pocket to steal Awakening II from Orgulla while she's in her first stance. This item provides the Gravity Bomb Double Attack for Shion and KOS-MOS. Keep in mind that if Orgulla returns to her original stance near the end of the battle, the Awakening II can be stolen a second time.*

Nearly halfway through the battle, Orgulla's pose changes and so do her attributes. Switch Shion and Jin out of the party in favor of Ziggy and either MOMO or Jr. Orgulla's attack power increases greatly in this new stance, so MOMO's low HP may be a problem if the boss targets her. Infuse KOS-MOS, MOMO or Jr. with the power of fire by using Flame Sword on them. Stock up again and unleash a chain of attacks starting with Ziggy this time. He Downs the enemy instead of making her airborne. KOS-MOS Airs the opponent if she leads, which puts her out of Ziggy's reach. Note that defeating Orgulla in her Manes (blue sword) form awards twice the C. Pts.

Orgulla may return to her original stance if it takes the party too long to finish her off. If so, change back to the original battle formation to finish her off.

## TRANSPORTERS

The party encounters a room of blue and orange transporters. The blue transporters carry the party up, while the orange transporters carry them down. The transporters automatically transport the party when they stand in the center of a colored pad for a moment. Stay to the side to go around those that aren't needed. Refer to the following plan to get to the bottom, then enter the green transporter in the center.

**Floor 1: TP 1**

**Floor 6: TP 18**

**Floor 2: TP 9**

**Floor 7: TP 25**

**Floor 1: TP 7**

**Floor 8: TP 30**

**Floor 3: TP 12**

**Floor 6: TP 21**

### SEGMENT ADDRESS NO. 04

To get to Segment Address No. 04, follow this path from the start:

Floor 1: TP 1   Floor 2: TP 9   Floor 1: TP 8

Then return to the start by:

Floor 4: TP 15   Floor 2: TP 11   Floor 1: TP 10   Floor 2: TP 5

game and use the blue transporter to the right to reach the core and the next boss. Note that the entrance to the room is disguised holographically as the front corner of the core near the middle of the walkway. Walking close to the corner will reveal the entrance, however.

# E.S. ISSACHAR

Type	Mech
Break	—
W.ATK.	—
W.ATR.	Au/Ic/Pc/Si
HP	30,400
EXP	10,000
S.Pts	0
C.Pts	0
N.Item	EMAX300
R.Item	—

Switch copilots before this battle begins. Put Jin in the E.S. Asher and chaos in the E.S. Zebulun. This change gives the E.S. Asher the Wings of Light Special Attack while the E.S. Zebulun gains the use of the Ice Rondo. The battle strategy is fairly straightforward here. Stock twice and use the Special Attacks. The only trick is the field that surrounds the E.S. Issachar. Shortly after the field is generated, the boss unleashes the Genesis attack, which can inflict around 6000 points of Thunder damage to both battle party members. Prepare for the attack by healing as soon as the field is generated.

## DOWN TO DESTRUCTION

your energy conduits after the battle by attacking one of them. Move to the south and return to the ground level where the core is. Save your game and enter the front of the core to find a self-destruct device.

The fuses must be arranged so that all four paths to the self-destruct device are the same length. Attack the light on the far left ① to adjust the fuse so that it follows the northwest path instead of the northeast one. The two in the center also need to be adjusted. Move the left fuse ② down, so it's as long as possible. Then move the fuse on the right ③ up so the spark follows the zigzag path to the center. Do not bother with the two fuses closest to the console, nor with the fuse furthest from the console to the north.

Console at the bottom of the room and ignite. The activation sets the self-destruct mechanism in motion. Your party has 30 minutes to evacuate. Backtrack to the maze. The path out is as follows:

**Floor 9: 31**

**Floor 8: 27**

**Floor 1: 10**

**Floor 2: 5**

as much as possible. The narrow path that winds can be a problem. The space is too narrow to get larger enemies, so escaping from battle becomes difficult. Any P.S.S. soldier is small enough to get around and skip those battles. There's plenty of time if you don't fight, but be quick. Don't try to steal items or extra. Defeat the enemies and move on. Get back to the core and board the E.S.s. Pass back through the airlock for one last battle.

# SUBMERGED CITY

1

Speak to Captain Matthews in the Elsa.

2

Enter the Elsa's hangar.

3

Attack the overpass to create a bridge.

4

Destroy the support to form a ramp.

5

Divert the flowing water.

6

Defeat the Naglfar Cannons.

7

Enter Labyrinthos.

## O-88 DELPHINUS

The enemy known as the O-88 Delphinus appears in several places throughout this area. It's an extremely powerful enemy, so it deserves special attention. Put Jin in E.S. Asher for the Wings of Light Special Attack, chaos in E.S. Dinah for the Chained-Blast Special Attack, and Shion in the E.S. Zebulun for the Starlight Arrow Special Attack. These three Special Attacks can rapidly reduce the enemy to scrap metal. Also, move one E.S. behind the enemy during these battles to ensure a few back attacks.

## TOYS UNIVERSE

Don't miss out on the Toys Universe building if you're working on GS Campaign No. 26

Take a moment to save your game and continue down the road. Climb the ramp at the dead end and blast the support beam at the top. Walk back down the ramp and use the new path to get deeper into the city.

## FALLING WATER

A waterfall is blocking the road just before the boss. Follow the path to the left and climb the ramp at the end. Attack the two fuel pods to knock them into the water. Backtrack down the ramp and attack the fuel pod closest to the street. The explosion diverts the water and clears the street. Save your game up ahead and take a moment to prepare for the next enemy. Put Shion in the E.S. Dinah so the Tornado Fist Special Attack is available. The other assignments aren't nearly as important as this one.

## GETTING UNDER WAY

Go to the Elsa at the dock area and find Captain Matthews in his chair on the bridge. Speak to him to initiate travel to Old Miltia. Enter the Elsa's launch the E.S.s when the ship arrives.

### GS PATH

This is another chance to follow the GS Path. Numerous side quests are available. Take some time to complete them before talking to Captain Matthews about leaving. However, many of them only become available after visiting Old Miltia. You can talk to Matthews, travel to Old Miltia, then immediately return for more GS Campaigns.

## EXPLORING THE SUBMERGED CITY

On the road. The pavement is badly damaged. Shoot the ledge where the pavement is broken to create a ramp. Also, look for a ramp on the left side that leads to a gap with a wall on the opposite side. Shoot the wall to create a path to a chest.

### FLYING ENEMIES

The Khuga Valys hover over the ground. This gives them the ability to fly over the water where the E.S.s can't strike them. Shooting them or launching a Special Attack is the only option when they're in this position.

### SEGMENT ADDRESSES NO. 10 & 18

West of the first intersection is Segment Address No. 10. Inspect the ledge next to the door to get the option to exit the E.S. Check the door on foot to add it to the Segment File, then get back in the E.S. in the same manner. Segment Address No. 18 is further down the road, but the drill is the same.

# LABYRINTHOS

**1**  
Unlock the gate to reach the water room.

**2**  
Even the water level to clear the path.

**3**  
Ride the shuttle to the core.

**4**  
Find a way over and under the gates.

**5**  
Knock over the boxes to create a bridge.

**6**  
Open the first half of the gate.

**7**  
Weave through the storage room.

**8**  
Rearrange the walls to create a tunnel.

**9**  
Open the second half of the Gateway.

**10**  
Ride the elevator to the main terminal.

**11**  
Use the control panels to unlock the main terminal.

**12**  
Press the switch in the main terminal to open "Lock B".

**13**  
Defeat Margulis.

## NAGLFAR CANNONS

Take the E.S. Dinah and the E.S. Zebulun into battle. The E.S. Dinah deals the bulk of the damage, but the E.S. Zebulun keeps them both running. This battle is against the Naglfar and four Kfuga Valys. Stock the attacks of both E.S.s on the first

two turns. Begin attacking the Kfuga Valys to limit the damage taken. The Naglfar Cannons can replace them, but attack them with the E.S. Dinah's gun and the E.S. Zebulun's Rain Arrow Special Attack to stay ahead of the enemies and limit the damage they can cause.

The Naglfar Cannons are protected by a shield. Attack the guns to slowly drain the shield. Launch the E.S. Dinah's Tornado Fist Special Attack when the shield drops completely and the cannons are vulnerable. The attack is devastating and makes the boss easy to finish off. Also, since this boss is weak to literally every attribute, any Special Attack with more than one attribute, such as Tornado Fist and Golden Bow, will do considerable damage.

Beware of the cannon. Quickly repair damage when the ship begins to charge for a shot. The ship can't perform any other actions while charging, so it's also an excellent time to demolish all four of the Kfuga Vally enemies.

## ENTERING LABYRINTHOS

Continue to follow the road after the battle. The road comes to a dead end and there is no way around this time. Destroy the barricade on the left, disembark from the E.S.s, and climb down the ladder to reach Labyrinthos.

## ENTERING LABYRINTHOS

Place Shion, Ziggy, and chaos in the battle party. Ziggy and chaos are effective against biological enemies in the area. Shion can devastate the mechanical enemies. Use Ziggy or chaos to Down mechanical opponents before Shion attacks to enable her to eliminate most of them with a quick ◎, ◎, ◎ combo.

The path is blocked by a gate. There's a control panel to the right, but it's on a higher level. Use the stairs near the start to drop down to the canal and climb the ladder in the water to reach the panel. Use the panel and backtrack through the gate to reach the next room.

## WATER PUZZLE

The room is flooded on one side and the water is blocking the party's progress. To clear the path, the water must be evened out. Notice the marks on the wall. The water on the right is at 3 while the water on the left is at -3. The water level must be at 0 on both sides to be passable. The control panels on the center divide control the water by adding units to the side they're on while taking the water from the opposite side. Solve the puzzle by using the consoles in the following order: 6, 5, 6, 2, and 2.

Pass through the halls to the shuttle and ride the shuttle car to the core area. Most of the halls that intersect with the core are blocked at this time, so enter the hall just to the left of the entrance to find a gate puzzle.

### SEGMENT ADDRESS NO. 05 AND DECODER 05

*Decoder 05 is located in the top fork of the core area. Grab it and hike back to Segment Address No. 05, which was in the previous area. Secret Key 20 is hidden inside the chest behind the door.*

## SPINNING WALL PUZZLE

The next room features a glass floor with a series of walls beneath it. The tumblers on top of the glass turn the walls to create a path to the exit and the two chests. Refer to the following directions and diagram (to the right) to reach all three. Reset the puzzle at any time by exiting the room in the southeast corner.

**Class Upgrade B (x6):** D (x1), B (x1), C (x2), E (x1)

**Boost Max:** E (x1), D (x3), B (x3), C (x1)

**Exit:** E (x1), A (x1), C (x1), D (x3), C (x1)

The next door leads back to a catwalk in the central area of the core. Press the button at the end to move the second wall section blocking the central elevator. Use the elevator at the other end of the catwalk to get to the ground floor, then step onto the glowing red elevator in the center of the room and take the elevator down the shaft.

## MAIN TERMINAL

Pass through the door at the bottom of the shaft to find Labyrinthos' main terminal. Ride the elevator on the left side of the central structure. Press the button on the bottom control panel to raise the structure up, then use the elevator to return to the bottom. Walk underneath the central structure and press the button for "Lock A". Ride the elevator once more and cross the top of the central structure. Press the button on the east side and walk down the stairs next to it. Walk around the structure and enter the large door on the south side.

Press the button at the back of the room to unlock "Lock B" after the cinema. Exit the structure and use the elevator on the right side to reach the ground. Go through the door at the back of the room and use the elevator to reach the Zohar Isolation Area. Save and fight through the doors at the back of the room to reach the boss.

## GATE PUZZLE

There are four gates in this area. Start by pressing switch A and passing through the first gate to get the **Rejuvenator E** from the back of the room. Return to the start and use switch B followed by switch A again. Cross the tops of the first two gates and the third one on the north side of room. Press switch C to open the gate behind the party. Finish by pressing switch D and return to the start via the stairs on the other side of the lowered gate. The path is now open to the next room in the northeast corner.

## BOX PUZZLE

Huge crates are stacked around this room. Attack the crates so that they fall in a pattern that creates a bridge. Follow the diagram (see below) to reach the exit and the chest in the northwest corner of the room.

The exit leads back to the core. Go to the end of the catwalk and press the button to remove half of the wall blocking the shaft in the center of the room that leads further down. It also activates the elevator at the opposite end of the catwalk. Return to the core's floor and enter the hall to the right of the start.

## STORAGE PUZZLE

The hallway leads to a huge storage room. Climb the ladder near the start. Pass through the glass to the right and climb down two floors to the bottom level. Pass through the next glass wall on the right and climb up to the top floor to find the exit.

# Ω SYSTEM

1

Talk to Captain Matthews in the Elsa.

2

Park the E.S.s and unlock the first gate.

3

Unlock the second gate and return to the E.S.s.

4

Pass through the hall to the A.M.W.S. Elevator.

5

Use the A.M.W.S. Elevator to reach the E.S.s.

6

Defeat Inversion.

7

Destroy the green glass boxes to reach the exit.

8

Create a bridge by destroying some of the colored boxes.

9

Conquer Cathedral.

10

Best the Patriarch.

11

Face Albedo.

# MARGULIS

Jr. and MOMO are essential for this battle. Place them in the first and second positions within the battle party. The third person can be any character, because Jin takes the third position automatically once the battle begins.

Stock up with all three characters so that they have three attacks each. Margulis has a four-hit Break as other bosses have had throughout the game, so two characters must work together to take advantage of his weakness. Wait until it's Jr.'s turn and no one else is in the queue, or boost Jr. during Margulis' turn. Have him perform a (Zone: C B) attack while Jin is boosting. Have Jin finish the combo with a second (Zone: C B) and three attacks. Boost Jr. as Jin attacks and use his Stocked attacks, too. Also, boost MOMO during Jr.'s second turn and unload with everything she has. The chain isn't enough to defeat Margulis, but it takes a huge chunk out of his HP. Repeat the combo until Margulis is nearly defeated.

Throughout the battle Margulis creates a shadow of himself. Ignore the shadow and keep pounding on Margulis, as he eventually eliminates the shadow on his own. It's possible to steal Awakening III from Margulis or the shadows during this battle. Take advantage of this fact and collect several of these valuable items.

As the battle winds down, Margulis starts to create a series of three seals. This is the most critical moment in the battle. Quickly Stock attacks and prepare for a final combo. Launch the combo by the time Margulis creates the second seal. If all three seals are created, the party loses the battle automatically and the game ends. Obviously, timing is critical.

Also, Jin is the only character who can deal the final blow to Margulis. Make sure that Jin is the one to defeat him when the SKL icon is showing to get the Skill Point Bonus.

## READY TO GO

Captain Matthews and the others are in the Elsa and ready to leave at any time. He can also shuttle the party between Second Militia and The Foundation for side events. Ask him to leave for the Omega System when you're ready to challenge the golden behemoth.

## CLEARING THE WAY

Walk down the hallway, destroy the partition, and use the elevator at the end. There are five floors. Take a moment to stop at each one on the way to the bottom. Jin should be in the E.S. Asher, so the Wings of Light Special Attack is available. The damage it causes can be devastating to

enemy units. Also, make sure chaos is in the E.S. Dinah so the Chained Blast Special Attack is available. Park the E.S.s on the depression along the west wall and enter the door next to it.

Go back into the hallway and enter the door prior to the stairs. Cross the bridge and turn left to find a second control panel. Press the switch to unlock the second gate. Return to the E.S.s and pass through the gates, which are to the north.

### SEGMENT ADDRESS NO. 17

*Segment Address No. 17 is located on the right side of the first stop. You will have to disembark from your E.S.s in order to access it.*

# INVERSION

Type	Mech
Break	—
W.ATK.	Physical
W.ATR.	Au/Fi
HP	49,600
EXP	52,000
S.Pts	—
C.Pts	—
N.Item	Auto Recover
R.Item	—

This is a simple battle if the party is prepared. Charge the E.S. Zebulun to 300 and unleash the Meteor Blast. Boost so the attack is used when the CTC or ETH icons are in the event slot to ensure the attack causes as much damage as possible. It should easily cause 10,000 or more points of

damage when timed properly. Repeat the attack over and over while the other E.S.s Boost and use their own Special Attacks in support of the E.S. Zebulun.

## GLASS BOX PUZZLE

Enter the hall at the back of the room after the battle. The next room is packed with strange boxes that have a green glassy side. To destroy these boxes, attack them from the green side. Position the E.S.s so they can shoot the green glass and slowly destroy all of the boxes to reach the door in the northwest corner. The E.S.s can shoot over the small walls that zigzag through the room, which is essential to finding a way through this straightforward maze.

## THE A.M.W.S. ELEVATOR

Break through the barricades and fight past the enemies to reach the door at the end of the hallway. Exit the E.S.s once again, pass through the door, and use the elevator on the other side.

Walk down the stairs to the very bottom and enter the door next to the save point. Use the elevator behind the door to reach the A.M.W.S. Elevator Power Switch.

Activate the switch and jump back on the elevator.

Return to the top of the stairs and use the switch in the corner to activate the elevator. Quickly run down the stairs to the next landing and press the flashing red switch to release the elevator lock bar next to it. Sprint downstairs once more to the next landing and press the second flashing red switch to release the

second lock bar. Get to the switches before the descending elevator hits the restraints, or it's forced to return to the top. Don't move too quickly; the lock bars only remain open for a short period of time. Open them too soon and they'll close before the elevator passes them.

Use the elevator at the bottom of the stairs to find the E.S.s in their new position. Prepare for battle by saving before boarding the E.S.s and making a few changes. Equip the E.S. Zebulun with the EMAX300 accessory to increase its charge cap to 300. Put Ziggy in the Zebulun so that it has the Meteor Blast Special Attack. If the EMAX300 isn't available, have Ziggy ride in the E.S. Asher or E.S. Dinah so a powerful fire-based Special Attack is available. Otherwise, place Jin in the E.S. Asher for the Wings of Light Special attack and chaos in the E.S. Dinah for the Chained Blast.

## CATHEDRAL

This boss has three different states: White Robe, Call to Arms, and Cry of the Rapture. The strategy changes slightly depending on which state the boss is in. White Robe (white aura) is

the normal state in which it uses a variety of negative status effects and a fairly weak area attack. The Call to Arms (red aura) is a physical state that launches powerful physical attacks, but leaves the Cathedral vulnerable to Ether-based attacks. Cry of the Rapture is this boss's Ether state that uses powerful Ethers to attack, while lowering its resistance to physical damage.

Ziggy, Jin, and Shion make a solid battle party at the start. Make sure all three have Medica 2 and Medica All, if at all possible. It also helps if they have the Focus I skill that enables them to restore lost EP while Stocking. Resistance to Stun and Poison are also important, but at least two of them should have access to Refresh L to remove negative status effects if the party is affected.

Stock up three bars with all three characters. It takes four hits to break the boss's defenses (☹, ☹, ☹, ☹), so the party must work together. Begin every assault with Jin and Boost Ziggy. Perform two ☹ (Zone: C C) attacks with Jin and stop. After doing so, have Ziggy perform the two additional ☹ (Zone: C C) attacks and unload with three ☹ attacks to Down the boss. Note that the boss resists the Air effect, which is why Jin must start the combo while Ziggy finishes it. Boost Jin while Ziggy is attacking and unleash his Stocked power. Shion can Boost while Jin is unloading on the boss and finish the assault with her devastating Beam attacks.

When the boss changes form, it may require changing the lineup. The Call to Arms state is weak to Ether-based attacks, so Jin should be replaced by chaos. Cry of the Rapture is weak against physical attacks, so replace Shion with KOS-MOS or Jr. temporarily. The strategy remains the same despite the change in personnel.

It is important to note that the red and blue forms each have a gender preference. The Call to Arms state prefers males, while the Cry of the Rapture prefers females. This is significant due to Cathedral's ability to counterboost and use its powerful Sodom Quake whenever it is attacked by the gender that it does not prefer. So, if a male character hits the blue form or a female character hits the red form, Cathedral will immediately counterboost and attack. This will interrupt any chained combos that the party is trying to perform.

## RED BOX PUZZLE

the option of completing a colored box puzzle and proceeding through the large door at the left end of the room. Choose on your preference between character battles and E.S.

the colored box puzzle, when one box is destroyed, all of the boxes of the same color are simultaneously destroyed. There are boxes from left to right. Destroy the boxes in the order listed to create a bridge from the east door to the west door:

**Column 1: 4th block up (blue)**

**Column 5: 6th block up (red)**

**Column 3: 1st block (blue)**

**Column 1: 1st block (yellow)**

**Column 3: 3rd block up (red)**

**Column 2: 3rd block up (yellow)**

**Column 2: 3rd block up (blue)**

**Column 6: 3rd block up (blue)**

**Column 9: 2nd block up (red)**

**Column 7: 3rd block up (yellow)**

**Column 10: 3rd block up (yellow)**

**Column 9: 3rd block up (red)**

in the room after the bridge is finished. Cross it and enter the east side. Fight to the end of the hallway and press the button to unlock the door next to it. Pass through and follow the hall to where enemies hiding inside the crystals along the path, but be very tough! Walk along the glass platform to the circular center. Destroy the huge golden object to reveal the last save of your game. Step onto the platform at the back of the circle and choose to move onward.

S.Pts	—
C.Pts	—
N.Item	Skill Upgrade E
R.Item	Awakening IV

## PATRIARCH

Jin, MOMO, and Jr. are perfect for this fight. Prepare for the battle by building up everyone's resistances to status effects.

Also, make sure all three characters have access to Medica 2 and Medica All. Equip them with the Aura Coat to cut down on the damage caused by Patriarch's attacks and have one character ready to cast Aura Veil.

This is a two-part battle. Stock up and launch an assault with Jr. leading the way. Have him fire off a ●, ● (Zone: B C) combo while Jin Boosts. Jin should follow Jr. with a ●, ● (Zone:

B B) and three ● attacks to Air the Patriarch. Boost Jr. during Jin's turn and empty everything he has while MOMO Boosts and prepares to do the same. This boss has a lot of HP, so it takes several assaults to finish him off.

The Patriarch becomes fiercer once his HP is depleted. His Break changes, which alters the preferred attack pattern. Stock up and open with MOMO this time and have her fire one shot into Patriarch while Jin Boosts. Follow MOMO's attack with a ●, ● attack (Zone: C C) and three ● attacks. Have Jr. Boost during Jin's turn and follow Jr. with MOMO.

Cast Aura Veil and keep the party's HP close to maxed out during the second half of the battle. As the Patriarch nears defeat, he begins using a devastating Aura attack that's often part of a 1000+ damage chain. Finish him off quickly!

## MIRROR OF TRUTH

The most devastating attack is the Mirror of Truth. It locks onto one of the three characters currently in the battle party, then a countdown begins after several turns have passed. When the countdown reaches zero, the victim is instantly eliminated. Avoid the attack by swapping the affected character for another character before the countdown reaches zero. The mirror will go dark and it will be safe for the victim to return to action.

## FINAL PREPARATIONS

Consider returning to the save point after the battle and restoring everyone. There are tougher battles to come and the party is likely a little beaten up from the Cathedral boss fight. Return to the controls when you're ready to carry on and choose to move the platform.

# GS CAMPAIGNS

## 01: SEND HIM MY LOVE!

**Location:** Second Miltia

**Client:** Jacqueline

**Client Location:** City Sector One (outside hospital)

**Goal:** Take Jacqueline's Love Letter to Sidney

**Reward:** Secret Key 1 (unlocks Level 1 Class H skill "Psycho Pocket")

**Timing:** After Moby Dick's Café event (with female leader)

Speak to Jacqueline with a female character leading the party, or she won't provide the necessary information. Jacqueline gives the party a love letter and asks that it be delivered to a man named Sidney. Find Sidney by catching a shuttle from the Space Port to the Durandal and a direct-flight launch from the Durandal to the Foundation. Walk to the Urban Area and look for Sidney at the Ironman Bar & Grill. He presents the party with a second letter. Return it to Jacqueline to complete the event.

## 02: GO POSTAL!

**Location:** Second Miltia

**Client:** Sikes

**Client Location:** Second Miltia Hospital

**Goal:** Deliver the four letters

**Reward:** Secret Key 2 (unlocks Level 1 Class H skill "Break B10")

**Timing:** After Moby Dick's Café event and GS 01

Speak to Sikes in the hospital after completing GS 01. Jacqueline has told Sikes about the party's letter delivering skills. He gives party four letters: **Spade Letter**, **Heart Letter**, **Club Letter**, and **Diamond Letter**. Visit the Area 40 Publishing Agency and deliver Spade Letter to Enrico. Take the Club Letter to the Space Port and deliver it to Ulrica. The Heart Letter goes to Eugene in the of the Durandal Park Area. Explore the Foundation's West Urban Area to find Patricia, the Diamond Letter's recipient, near the fountain in the back.

# ALBEDO

Travel to the park area in the Durandal to begin the final sequence. While walking along the anomaly, Jr. experiences a series of visions. At the end, he encounters Albedo. This is a simple battle; simply stock up and launch a full assault on the boss. His Break changes each time Jr. successfully performs it, so pay attention. Jr. is protected throughout the battle. His HP will never fall below 1 point. Focus on attacking and enjoy the ending!

WALKTHROUGH

APPENDICES

## 03: OPERATION SQUEAK SQUEAK!

**Location:** Kukai Foundation

**Client:** Sheila

**Client Location:** Lavare Dry Cleaning

**Goal:** Catch 10 mice in 1 minute 30 seconds

**Reward:** Secret Key 6 (unlocks Level 2 Class D skill "Rare+10")

**Timing:** After Moby Dick's Café event

Look for Sheila in the Lavare Dry Cleaning & Rental Costumes building in the Kukai Foundation's Urban Area West. The attic is overrun with mice and someone needs to do something about it. Climb the ladder at the back of the house to reach the attic. Speak to Amber, who's near the top of the ladder, to gain access to the attic.

Approach the mice and press the  button as soon as the lock-on appears. The mouse must remain close to the leader during the attack action or it will escape. Corner the mice to make the captures easier. There are three mouse holes that the mice can use to make this event difficult. Two are in the middle of the attic. Quickly climb the two staircases along the bottom as the event begins and attack the paintings hanging above the holes. The paintings drop and block the holes, making it easy to capture the mice that use those escape routes. The third hole is in the floor at the top of the third staircase. The mouse that uses this hole drops through the first time it's approached. Run back down the stairs and corner it by keeping it from going back up to the hole. The various boxes around the attic are empty. They merely throw off the VT's targeting when a mouse is near them; don't waste time destroying them.

Return to Sheila after catching the 10 mice and receiving the Secret Box from Amber. She rewards the party with Secret Key 6, which unlocks the Level 2 Class D skill "Rare +10".

Enrico

Ulrica

Eugene

Patricia

## 05: MY IDOL, DR. UZUKI

**Location:** Second Miltia

**Client:** Jun

**Client Location:** Uzuki Residence

**Goal:** Rearrange the bookshelves

**Reward:** Decoder 01, Archangel's Requiem Double Attack (Jr. and Shion)

**Timing:** After Uzuki Residence event

Jun has rearranged the bookcases and can't get them back in the proper order. Help out by rearranging the shelves so that the patterns on the shelves are lined up with the markings along the outside of the bookcases. This is an old-fashioned slide puzzle, which should be somewhat familiar to most people. The puzzles are random, so it's up to you to find the solution. Solve the first puzzle within 3 minutes to receive **Decoder 01** and the **Archangel's Requiem** Double Attack.

There are three more puzzles to solve, but they're optional. Conquer the level 4 puzzle to receive a bonus reward of 10 Skill Upgrade Ds and 10 Class Upgrade Cs. The trick to solving the larger puzzles is to quickly line up the books on the top and left sides of the puzzle until there's a small 3x3 section in the bottom-right corner. Then it's just a matter of solving that small section before time runs out. There's plenty of time with each of the puzzles, but save a few seconds by pausing the game when looking for the next tile.

## 06: ULTIMATE RECIPE

**Location:** Second Miltia

**Client:** Chop

**Client Location:** Moby Dick's Café (kitchen)

**Goal:** Help create "Quintessential Curry"

**Reward:** Decoder 17, Curry Recipe

**Timing:** After Ormus Stronghold (female leader)

Chop is attempting to make a new recipe, but needs help adding seasonings to the mix. Put in the correct seasoning 45 times in 1 minute and 30 seconds by pressing the button Chop calls out. This shouldn't be too difficult, since the button appears on the screen and there's plenty of time (2 seconds per button press), so it isn't necessary to go too quickly. The recipe fails when the wrong button is pressed, but it's possible to attempt the event again and again until it is done correctly. For an entertaining follow-up to the event, give the Curry Recipe to Punch over at the Ironman.

## 04: ZAZA'S GREAT ADVENTURE

**Location:** Elsa

**Client:** SPUMONI

**Client Location:** Elsa B1

**Goal:** Find ZAZA and the seven clues

**Reward:** Skill Upgrade D (x20), Rejuvenator E

**Timing:** After Ormus Stronghold

The robot ZAZA has disappeared. Talk to SPUMONI onboard the Elsa to get directions to the first person. Visit the seven people who have seen ZAZA in the following order to receive a clue that is placed in the Key Items. After talking to all seven people, go to the Launch area at the Kukai Foundation to find ZAZA crumpled on the ground. Inspect the seven clues to learn the password for ZAZA's self-repair system and enter the code "2587643" after talking to ZAZA. Return to the Elsa and speak to SPUMONI to collect the reward.

Visit these people in the following order:

- 1 Woody, in Vector's Second Division (hallway).
- 2 Mika, at the Kukai Foundation Fishing Lab.
- 3 Lorraine, inside the Area 40 Publishing Agency on Second Miltia.
- 4 Sean, at the Durandal Park Area.
- 5 Yolanda, south of Moby Dick's Café in Second Miltia.
- 6 Jessica, on the west side of the Kukai Foundation's urban area.
- 7 Sylvia, at the U.M.N. Control Center in Second Miltia.

## 07: POSTERS A GO-GO!

Second Miltia

Miguel

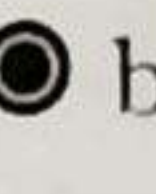

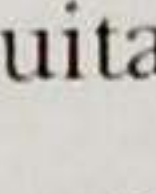

Location: Area 40 Publishing Agency stockroom

Help promote Miss Miltia by placing 20 posters around the city

Reward: Skill Upgrade D (x3), MOMO's Swimsuit, Jr.'s Swimsuit

Prerequisite: After Moby Dick's Café event

Speak to Miguel in the Area 40 stock room. He presents the party with 20 posters to place around the city. These posters can only be placed in spots that are large enough to hold the posters within the city. The surface doesn't have to be flat and there are some areas that are large enough to hold multiple posters in a row. Search walls to find suitable spots by pressing the  button, then press the  button again when a spot is found. There are 21 suitable spots and only 20 posters. The suitable poster locations are indicated on the following maps. Return to Miguel once the posters are placed to claim the rewards.

## 09: THE GREAT THIEF

**Location:** Second Miltia

**Client:** Maple

**Client Location:** Ramp outside hospital

**Goal:** Recover the lost teddy bear

**Reward:** Elemental Nocturne Double Attack (Jr. and chaos)

**Timing:** After Moby Dick's Café and GS 01

Speak to Maple at the base of the ramp outside the hospital in City Sector One. Go up the ramp after getting the mission and ride the escalators up. Go to the right to find Bonny, the thief. Follow her by running to the right all the way to the ramp at the end. Walk down the ramp to finally catch up with Bonny. She drops the bear next to the party leader. Inspect the glowing spot on the walkway to collect it. Return the bear to Maple to complete the event.

## 10: THE LEGENDARY BLUE FLOWER

**Location:** Second Miltia

**Client:** Luty

**Client Location:** Second Miltia Hospital

**Goal:** Plant the Spring Seed and make it grow

**Reward:** Secret Key 15 (Level 3 Class C skill "Last Revenge")

**Timing:** After Ormus Stronghold

Speak to Luty inside the hospital on Second Miltia. She needs help growing flowers and wants fertilizer and seeds. There are four seeds and five bags of Hyper Fertilizer that are in the possession of various NPCs. Collect the seeds and fertilizers and return to the hospital. Only the Spring Seed from DUBONNET on the Elsa is necessary, and Rosa in the Space Port can provide all of the fertilizer that is needed. Plant the Spring Seed in the planter behind Luty. Use Hyper Fertilizer on the plant four times to make the blue flower bloom. Speak to Luty to collect the reward.

Fertilizer locations are as follows:

**Padma (hospital)**

**Rosa (Space Port)**

**KINGSTON (Elsa/cabin area)**

**Althea (Kukai Foundation/Ironman)**

**Theodore (Kukai Foundation/Launch area)**

Seed locations are as follows:

**Hammond (Area 40/Winter Seed)**

**Atash (Space Port/Summer Seed)**

**DUBONNET (Elsa/cabin area/Spring Seed)**

**Kino (Kukai Foundation/Our Treasure Inn/Autumn Seed)**

## 3: MILITIAN CRISIS!

Second Militia

LIZZY

City Sector Two (outside power distribution facility)

Stabilize power distribution

Burst Veil Double Attack (Shion and MOMO)

After Moby Dick's Café event

There's a problem in the power distribution facility and someone needs to stabilize the power and fast. Speak to Lizzy to get the **Facility Key** and the mission, then enter the hatch next to him. The party has five minutes to reach the switch on the back wall of the room, but they must navigate a treacherous path to reach it.

Cross the conveyor belts to the left and stay on the yellow belts. Climb the ladder at the end and pass through the energy sawing devices. Avoid stepping into the electricity, or it will stun the party for a second and push them back. Watch the devices carefully; they sparkle for a moment before firing. Stop or get past quickly.

The next set of devices is trickier. The party can pass on the end opposite where the energy is coming out if they get as far to the side as possible, but it's easier to just go up one side or the other and wait for the devices on that side to stop firing before passing. The next set is the most dangerous part of this event. The party gets knocked onto the conveyor belt along the bottom if they're struck

by the energy, forcing them back to the very beginning. Stay between the machines and wait for the energy to stop completely before passing.

The next few obstacles are very similar to the first few. Pass through them to reach a ladder. Climb down to find a platform covered in boxes. Stay to the right and move up, destroying the boxes to create a path. Go left at the top to find a path to the switch at the back of the room. Some of the boxes contain items, but wait until the switch has been pressed before looking for those items. Backtrack through the area and speak to Lizzy again to claim the reward.

APPENDICES

[illegible]

## 12: MORE WATER WORKS WOE!

- [illegible]

# II: WATER WORKS WORRIES!

**Location:** Second Militia

**Client:** Ciaran

**Client Location:** City Sector Two (at base of ramp southeast of Moby Dick's Café)

**Goal:** Destroy the malfunctioning dispensers

**Reward:** Secret Key 11 (unlocks Level 2 Class H skill "ST Resist 20")

**Timing:** After Moby Dick's Café event

Speak to Ciaran to gain entrance to the water works, which is through the hatch next to him. Climb down and speak to Glenn at the base of the ladder to get a full explanation of the mission. There are 84 dispensers in the room, but not all of them are malfunctioning. Destroy only those that are malfunctioning by attacking them (press the  button near the red dispensers). Use the computer consoles around the room to determine which dispensers are bad, or refer to the map here (attack the red barrels). After destroying the dispensers, return to Ciaran for the reward.

City Sector One. Go up to the right to find the ramp at the end. The bear next to the party turn the bear to Maple to

## 14: THE SONGSTRESS' WISH

**Location:** Second Miltia

**Client:** Kate

**Client Location:** City Sector One (Stella's apartment)

**Goal:** Find Rod Blondel 14 years in the past

**Reward:** Secret Key 21 (unlocks the Level 3 Class H skill "Experience Up 10")

**Timing:** After visiting Old Miltia

Kate asks the party to locate Rod somewhere in Old Miltia, 14 years in the past. Use the U.M.N. Simulator to travel back in time and choose to explore the area on foot. Put chaos, Ziggy, and KOS-MOS into the party and explore the area near Segment Address No. 14 to find Rod.

This boss shouldn't be a challenge. It uses Poison attacks, so be ready to cure many L and H statuses and heal often. Use Ethers to strengthen the party's resistances at the start of the battle to save EP. chaos and Ziggy have an automatic advantage, but KOS-MOS needs the added bonus of Aura or Flame Sword. The boss has a complicated Break, too. Stock up and open with KOS-MOS and

perform a Ⓞ (Zone: B) attack while Boosting Ziggy. Have Ziggy perform a ⓐ ⓑ (Zone: B C) attack to finish the Break, then empty his Stock. Have KOS-MOS and chaos Boost and use their attacks while the enemy is in the Down state. It should only take a few of these combos to end the battle. Take the **Memory Locket**, which Rod drops, back to Kate to claim the reward.

Name	Type	Break	W.ATK.	W.ATR.	HP	EXP	S.Pts	C.Pts	N.Item	R.Item
Rod Blondel	Gnosis	B B C	—	Bm/Au/Fi	17,600	24,000	1200	1200	Skill Upgrade D	Skill Upgrade E

# A TINY WATER BUG

Second Militia

Glenn  
Water Works B1

Defeat the Wraith Virus

Decoder 08

After loading "Game Clear Data" from Xenosaga EPISODE II and GS 12

Go to Glenn near the elevator on floor B1 of the water works and get the **Water Conditioning Tank B Key**. Enter the door in the southwest corner of B2 to find the Wraith Virus. Shion and Ziggy are essential for this battle. Jr. and MOMO have an advantage (especially with the use of elemental Swords), but their low HP is problematic. Take Jin or KOS-MOS along instead.

The trick in this battle is to keep the party's HP as high as possible. The boss has a devastating combo that can cause nearly 2000 points of damage, which is difficult to defend. Stock up and attack. Use Flame Sword on KOS-MOS or Jin to power up their attacks. Shion and Ziggy already get a nice damage bonus. Ignore the Wraith Feelers and focus on the Wraith Virus. The feelers are revived if defeated, so there's no point in attacking them until the main body is destroyed. Speak to Glenn after the battle to claim the reward.

Name	Type	Break	W.ATK.	W.ATR.	HP	EXP	S.Pts	C.Pts	N.Item	R.Item
Wraith Virus	Gnosis	—	—	Bm/Th/Fi/Pc	25,600	30,000	2700	3000	—	—
Wraith Feeler	Gnosis	—	—	Bm/Th/Fi/SI	2400	1500	70	60	—	—

## 17: THE TROUBLE WITH BONNY

**Location:** Kukai Foundation

**Client:** Bonny

**Client Location:** Urban Area (west side, near the fountain)

**Goal:** Help Bonny find honest work

**Reward:** Dual Spell Ray Double Attack (Shion and chaos)

**Timing:** After visiting Old Miltia and GS 09 and 23

Bonny is trying to get a job at the Ironman, but needs a new outfit and a book on manners. Go to Lavare Dry Cleaners and talk to Nikita to get a **Pink Maid Uniform**. Talk to Adelaide on the second floor of Ironman to get the "Rules of High Society". After collecting both items, talk to Caito, standing behind the counter in the Ironman, to get Bonny the job and claim the reward.

## 15: THE BRIDE'S DILEMMA

Location: Kukai Foundation

Client: Mallory

Client Location: Our Treasure Inn 2F (urban area)

Find the lost wedding ring

Secret Key 17 (unlocks the Level 3 Class F skill "Break B15")

After visiting Old Miltia

Talk to Mallory and ask her about the lost ring's vibration pattern. Explore the urban area and look for glowing spots on the ground. Approach the spots to check their vibrations. The match is found in the Lavare Dry Cleaning. Set the match and return to Mallory to claim the reward.

## 16: THE MAESTRO PLAYS ON

Location: Kukai Foundation

Client: Margoyles

Client Location: Our Treasure Inn 2F (urban area)

Goal: Replace the broken music box

Reward: Iron 4 Sheet Music

Timing: After Labyrinthos

Talk to Margoyles and visit the East 6 garage on the west side of the urban area. Destroy the car in the middle of the shop and speak to Riggs, the man on the floor, to get the **Music Box**. Return it to Margoyles to get the **Iron 4 Sheet Music**. Take the sheet music next door to the Ironman and play the sheet music on the piano. The Iron 4 stand-up on the opposite side of the bar slides back to reveal **Segment Address No. 16**.

You found Segment Address No. 16!

APPENDICES

## 19: A PRECIOUS LIFE

**Location:** Kukai Foundation

**Client:** King

**Client Location:** Urban Area West (inside East 6)

**Goal:** Find a doctor for the sick cat

**Reward:** Revive DX (x2)

**Timing:** After Moby Dick's Café event

Hirad

Find King inside the East 6 garage within the Kukai Foundation's Urban Area West. Josephine the cat isn't feeling well and needs to see a doctor, but there aren't any at the Foundation. Travel to City Sector One of Second Miltia and check the hospital to find the right man for the job. Speak to Hirad about the cat and force him to go. Return to King to receive the reward.

## 20: A GRIMY HEART OF GOLD

**Location:** Kukai Foundation

**Client:** Kramer

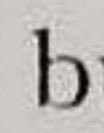

**Client Location:** Our Treasure Inn 2F

**Goal:** Clean nine windows in less than two minutes

**Reward:** King's Key

**Timing:** After visiting Old Miltia (female leader)

Speak to Kramer with a female leader about washing windows. He challenges the party to clean nine windows in less than two minutes, his personal best. Press the  button to inspect the windows, then rotate the right analog stick clockwise four times until the controller vibrates. Two minutes is a lot of time, so take it easy. The trick is to make full circles at an even pace. Keep in mind that there's no limit to the number of attempts. Kramer rewards the party with **King's Key** when the record is broken.

## MESSAGE FROM A HERO

Second Miltia

Janet

Other Professor's Lab

Find the missing architect and examine the statue

Unlock Code

After visiting Old Miltia

Go to Janet in the research facility within Sector One  
city area. She asks the party to track down Darrel, a  
missing architect. The architect is hiding somewhere on the  
west side of the Foundation's Urban Area. Demolish the car  
wash, the dry cleaners and talk to Darrel at the end of the  
hall to get the **Statue Blueprint**. Return the blueprint  
to Janet to get the **Unlock Code**. Backtrack to the statue in  
Urban Area West and use the code "3859" to reveal **Segment**  
Address No. 11.

## 22: CHALLAH AND CHUTZPAH

**Location:** Kukai Foundation

**Client:** Johnny

**Client Location:** Urban Area West (outside bakery)

**Goal:** Promote the bakery by winning games of Paper-Rock-Scissors

**Reward:** Cross Fist Double Attack (Ziggy and KOS-MOS)

**Timing:** After Ormus Stronghold

Johnny has devised an unusual promotion for the bakery. The party must challenge the 12 people on the street around the bakery (within the west side of the urban area) to a game of Paper-Rock-Scissors and defeat at least a few of them. Challenge all 12 and do your best to win a few games. Speak to Johnny at any time to see how many customers remain. When all 12 are complete, Johnny rewards the party if they won enough games.

## 23: STOLEN MEMORY

**Location:** Elsa

**Client:** PANACHE

**Client Location:** Elsa B1 (Robo-Foundry)

**Goal:** Help restore GIMLET's memory

**Reward:** Fiery Ritornelle Double Attack (Ziggy and Jr.)

**Timing:** After Ormus Stronghold

Use the key to find the "1857" password. Take the code to  
 and use it on the glowing switch to reveal a hidden room.  
 the man inside to find a secret area. Walk to the end of  
 and open the chest to collect **Skill Upgrade D** (x5).

## 21: HIDDEN THINGS IN HIDDEN PLACES

**Location:** Kukai Foundation

**Character:** Roy

**Location:** Urban Area West (next to Lavare Cleaners)

**Goal:** Recover the Pink Book

**Reward:** Skill Upgrade E (x6)

**Timing:** After loading "Game Clear Data" from Xenosaga EPISODE II

Roy asks the party to retrieve his time capsule, which is hidden inside the Factory. This is just one of three secret dungeons that can only be accessed once the Game Clear Data has been loaded. Follow the Robot Academy walkthrough (see page xx) to find the time capsule. It's located at the end of the Factory area after the fight with Dullea Soul. Solve the light puzzle and collect the **Pink Book**. Return the book to Roy to claim the reward.

APPENDICES

## 25: AN OLD DANCER REMINISCES

**Location:** Second Miltia

**Client:** Stella

**Client Location:** City Sector One (inside Ballet Award home)

**Goal:** Return the ballerina's precious items

**Reward:** Class Upgrade C (x2), chaos' Swimsuit, Shion's Swimsuit

**Timing:** After Uzuki Residence event

Stella wants three precious items returned to her. The three items are in the possession of local residents that are located in sector two. Anila is outside of the Area 40 Publishing Agency and he has **Stella's Hairpin** in his possession. Rachel, near the backdoor of Moby Dick's Café, is carrying **Stella's Corset**. Tess, who has **Stella's Shoes**, is located near the top of the ramp that leads to the water works. Return the items to Stella to receive the reward.

Anila

Rachel

Tess

PANACHE needs an alternate power source to check GIMLET's memory. Travel to Second Militia and visit Vector's Second Division. Speak to Narcissus in the first room to claim the **Power Battery**. Return to the Elsa and use the battery on the scanner next to PANACHE. The lights on the sides of the monitor begin to flash. When the light stops, the blocks of the same color on the monitor vanish. Each color must be hit once to restore the picture, so be prepared to return to Narcissus several times to recharge the battery. There's no way to influence where the light stops; just sit back and hope for the best. PANACHE rewards the party when the picture is completely revealed.

## 24: TRIVIA MASTER!

Kokai Foundation

Simon

Launch area

Win a game of Destroy Runner: Revenge

MAX300

After loading "Game Clear Data" for Xenosaga EPISODE II

Go back to Simon to receive a **Free Play Token**. Go to the Our Treasure Inn and use the token to play Destroy Runner: Revenge. The game asks a series of 20 very challenging questions that relate to the game. Get them all right and revisit Simon to get a reward. The answers to the questions are as follows:

## 27: THE MASTER BARTENDER

**Location:** Elsa

**Client:** ADONIS

**Client Location:** Elsa Diner

**Goal:** Mix a hangover remedy for Captain Matthews

**Reward:** Decoder 14

**Timing:** Once the Elsa is available

Bartender ADONIS needs help mixing a hangover remedy for Captain Matthews. There are three potential ingredients: orange juice, tomato juice, and coffee. The cure is seven portions of the three ingredients mixed together. Talk to the four robots huddled together to gather clues about the captain's taste in drinks, then speak to ADONIS again to mix the cure. The clues are:

**Clue 1:** *Likes fruity drinks like orange juice.*

**Clue 2:** *Likes tomato juice and coffee about the same.*

**Clue 3:** *Never drinks plain orange juice.*

**Clue 4:** *Balance is important.*

Speaking to ADONIS a second time brings up a small counter. Adjust the counter to read 3-2-2 (3 orange juice, 2 tomato juice, and 2 coffee). Take the mixed cure to the Matthews Robot at the top of the ramp, then return to ADONIS with the good news to get the reward.

# RESCUE!

Foundation

Launch Area

Henry from Toys Universe

Key 10 (unlocks the Level 2 Class H skill "Inner Peace")

Labyrinthos

was accidentally transported into the past. He's in Toys Universe in  
Miltia 14 years ago. Pitt provides the party with the **Toy Store Key**. Use  
M.N. Simulator to return to Old Miltia on foot and run to the Toys  
entrance, which is near the end of the area. Enter the code "4949"  
to unlock the door. Henry is inside the storeroom being attacked by a large

Shion and chaos make a decent party with KOS-MOS or Jin.  
Prepare for the battle by equipping Fire and status protection  
on each of the characters. Strengthen KOS-MOS' attack with  
Thunder Sword during the battle and attack the boss as a  
team. Also, use Flame Veil to cut down the damage from the  
boss's Ether attacks. Destroy the boxes to reach Henry after the  
battle, then return to Pitt to claim the reward.

## 29: A BIG FISH TALE

**Location:** Kukai Foundation

**Client:** Butch

**Client Location:** Fishing Lab

**Goal:** Catch Red Eye

**Reward:** Decoder 16 and Red Eye Fish Print

**Timing:** After Ormus Stronghold (male leader)

Talk to Butch near the dock with a male leader. He's looking for someone to catch a huge mutant fish known as Red Eye. Agree to help out and the party is given one minute to catch the fish. Run onto the dock (near the start is sufficient) and press the **○** button to cast the line, then spin the right analog stick clockwise at a steady pace. The controller vibrates when the reeling is done properly. Cast and reel in the line until the party catches the Red Eye, which is in a random spot each time. The party can attempt to catch the fish as often as possible; simply talk to Butch to attempt it again.

## 30: FIVE LITTLE KITTIES

**Location:** Kukai Foundation

**Client:** Clive

**Client Location:** East 6 2F

**Goal:** Find owners for the kittens

**Reward:** Cross Hilbert Double Attack (KOS-MOS and MOMO)

**Timing:** After visiting Old Miltia and GS 19

Speak to Clive on the second floor of East 6. There are five kittens in the building that need homes. Inspect each cat to determine its personality, then track down an owner that matches that particular personality. To make things easier, take all five kittens before searching for their owners.

Kitten	Owner
Loop	Valentino (Moby Dick's Café)
Newt	Agnese (Area 40 Publishing Agency)
Ollie	Marcela (Space Port)
Rebour	Kagari (Lavare Dry Cleaning)
Walker	Nastya (Ironman)

# IRONMAN RUMBLE

Foundation

Ironman (Urban Area West)

Mad Skelter

Ronde Double Attack (KOS-MOS and chaos)

Defeating Dark Erde Kaiser and GS 17

the party to defeat Mad Skelter. The enemy appears in Heaven's Ruins, which is unlocked in the Robot event. The party must face and defeat Dark Erde Kaiser before Mad Skelter appears in the ruins. Return to the after completing the Robot Academy event and climb to the top to find the boss. Remember to return to Caito after Mad Skelter to claim the reward. Mad Skelter takes on the attributes of the highest-level character in the battle. If that's a character like Shion, the boss will have a high Ether attack and low physical damage, while its defense will be high against Ethers and low against physical damage. A fighter like KOS-MOS provides a powerful physical attack and defense along with high Ether attacks and defense. Think about this before going into battle, because it has a huge effect on strategy. Attack with characters like KOS-MOS, Ziggy, and Jin if the boss becomes weak to physical damage, or use chaos, and MOMO if it's weak to Ethers. Use Flame Sword if attacking with physical attacks and use Flame Blast if Ethers are needed. Shion is probably the best choice for Mad Skelter to mimic, as she has the lowest parameters overall. Make sure she is the highest-level character at the start of the battle. After Mad Skelter copies her attributes, change the party members appropriately.

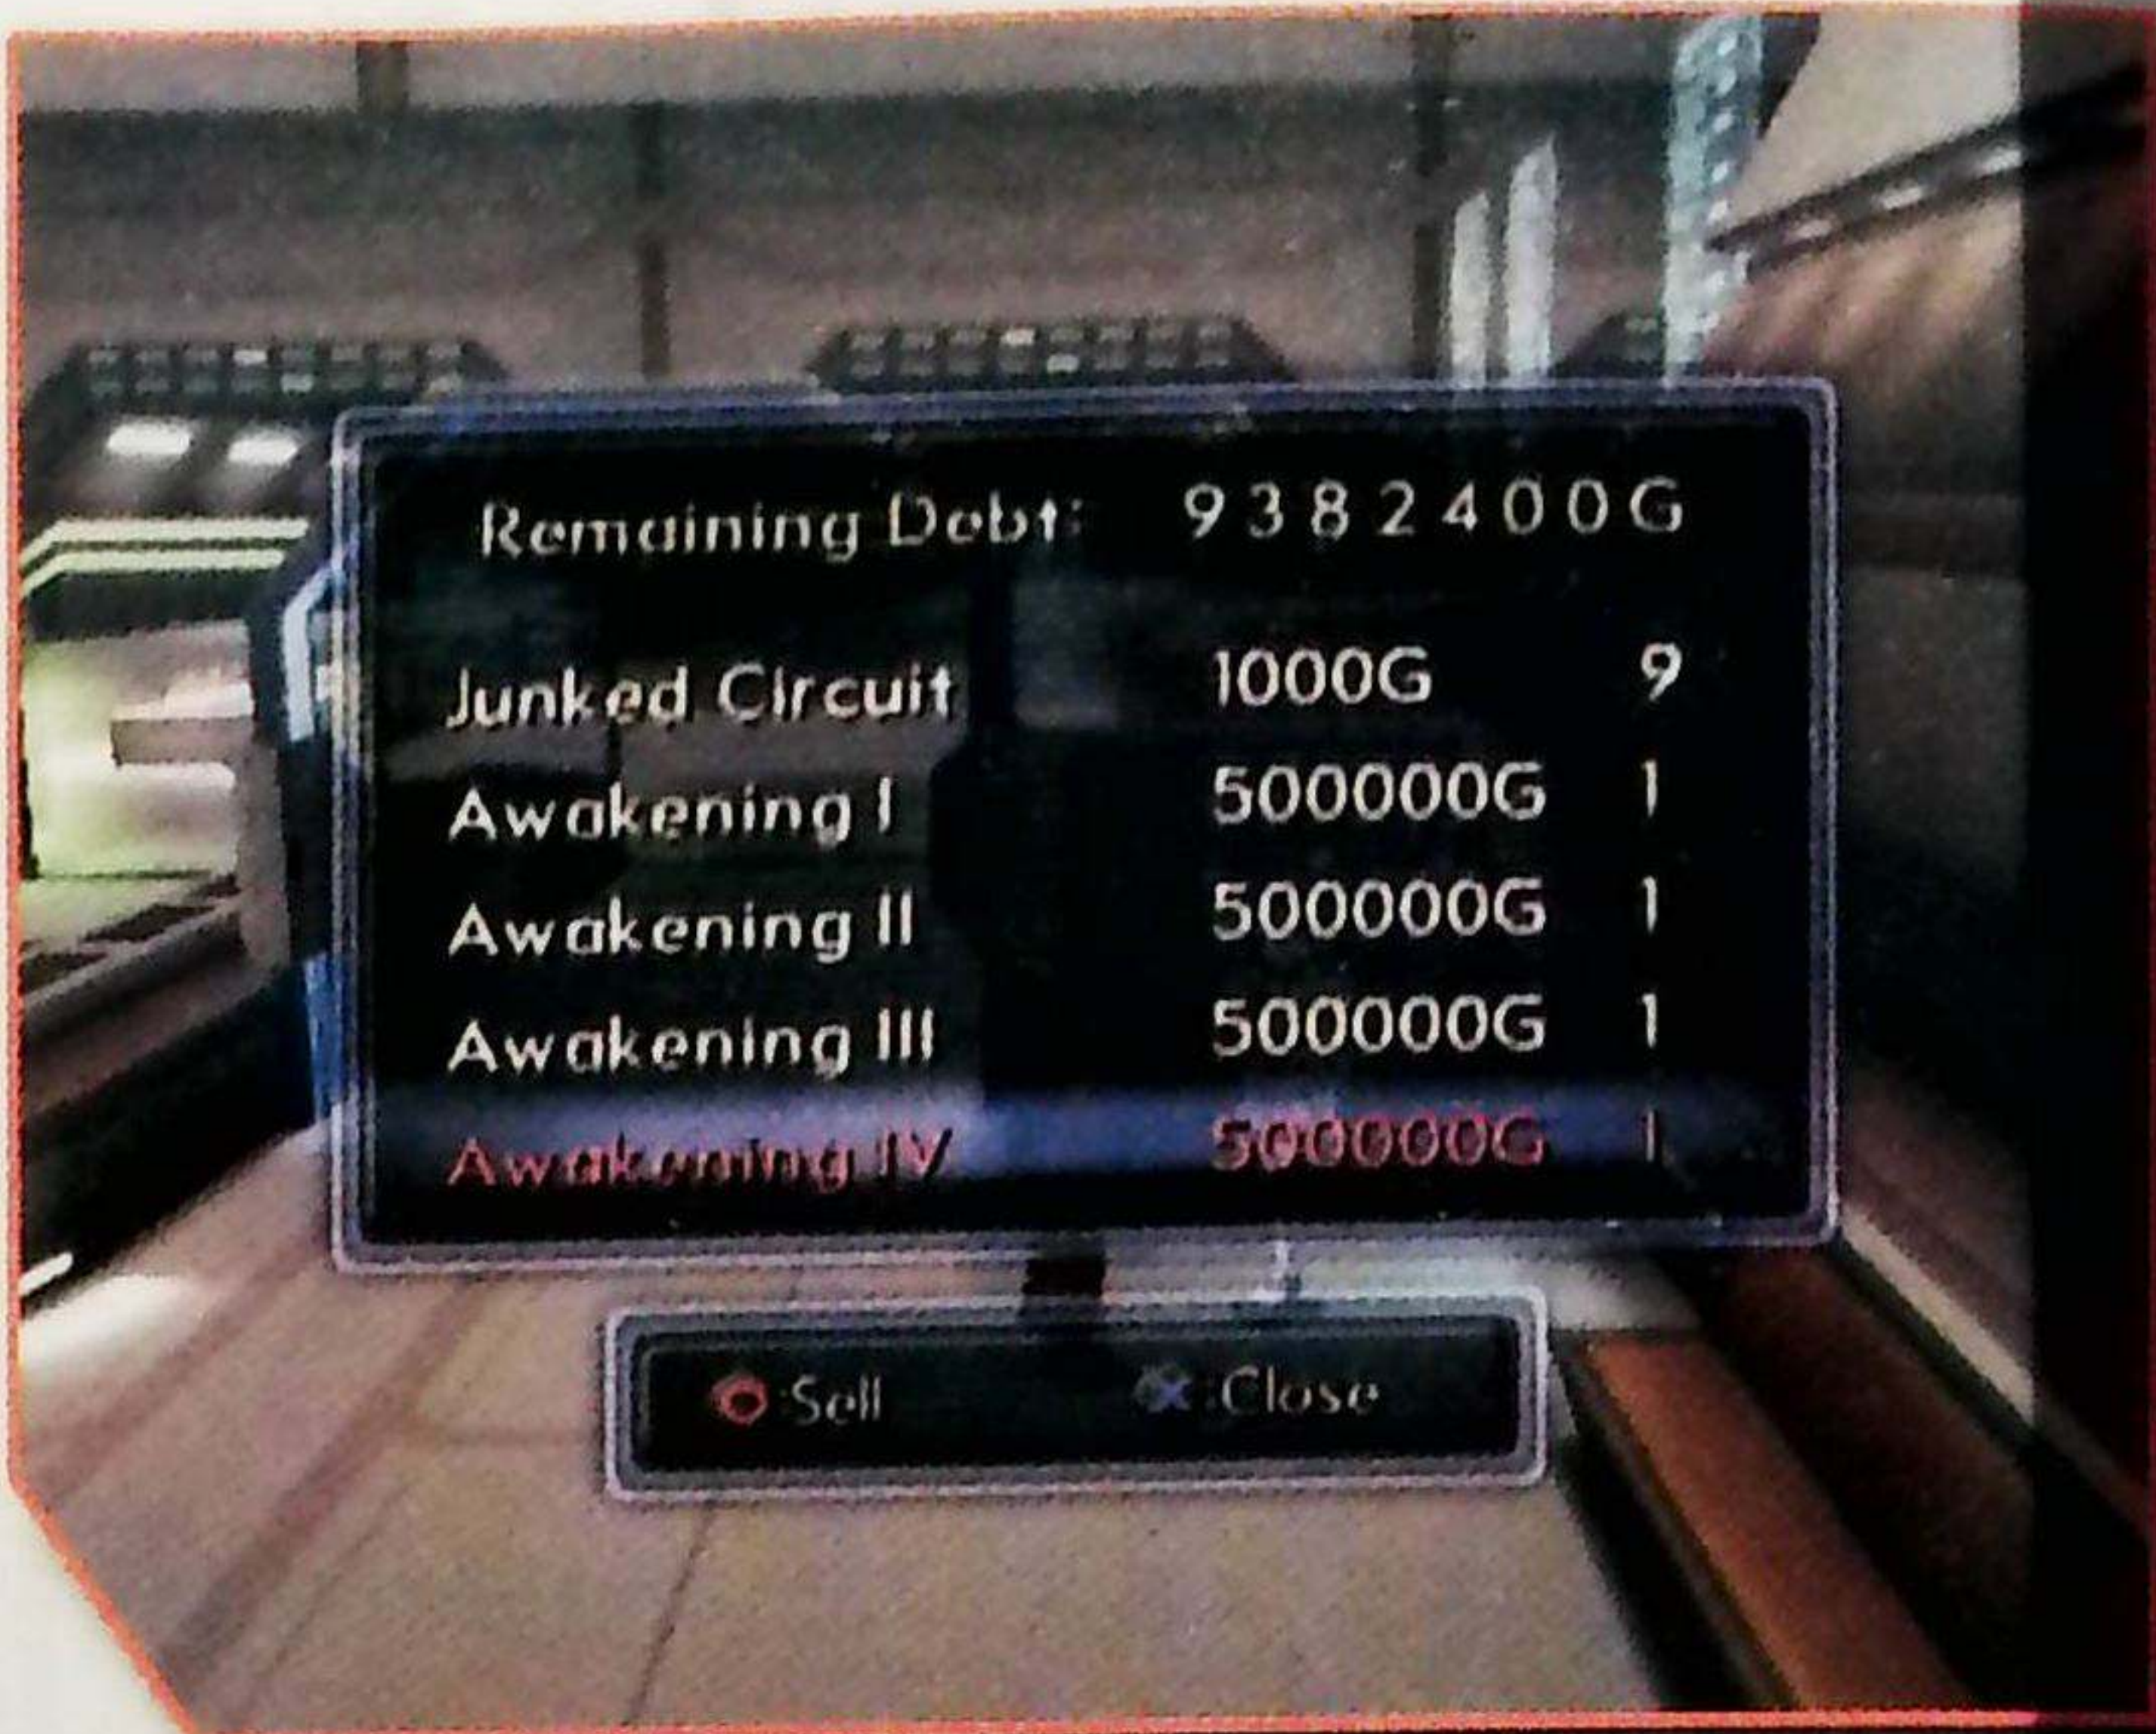

This is a challenging fight. The boss uses a ton of attacks that cause L type status effects that aren't worth removing, since they're replaced very quickly. The one status effect to worry about is the H effect, which must be removed immediately. If not, the boss attacks the character with an instant death shot that heals the boss for as much health as is stolen from the victim. Also, keep the party's health above 1500 as much as possible. The Pandora's Gate attack hits all party members and usually causes around 1400 points of damage. Save Erde Kaiser Fury until late in the fight. It causes a large hunk of damage that can possibly finish off the boss with about 10,000 HP remaining.

	Type	Break	W.ATK.	W.ATR.	HP	EXP	S.Pts	C.Pts	N.Item	R.Item
Mad Skelter	Gnosis	C B C B	—	Bm/Fi/SI	47,000 (varies slightly)	76,000	4200	5400	Skill Upgrade E	—

APPENDICES

The robots KAMIKAZE and K-2 want to open a store, but Captain Matthews won't allow it because of his tremendous debt. KAMIKAZE asks the party to give items to K-2 at the Second Militia Space Port. The items are then sold to help pay off the 10,000,000G owed. Obviously, it would take a ton of items to pay off the debt completely. The best way to pay it off is to proceed through the Omega System and face the Patriarch over and over. Use Psycho Pocket to steal Awakening IV from him each time, then sell them for 500,000G each. That means playing through the final area and watching the credits as many as 20 times, but there's no faster means of paying off the debt! You can reduce the number of Patriarch battles by stealing extra Awakenings from Orgulla and Margulis. Also, a few mech accessories, such as the EMAX300 and Auto Recover, sell for 500,000G as well. The upside of fighting the Patriarch so many times is that the party will earn a great deal of EXP, Skill Points, and Class Points. Refer to the Appendices (see page 207) for a complete rundown of prices.

### 33: ENCEPHALON ADVENTURE

**Location:** Kukai Foundation

**Client:** Hugo

**Client Location:** Launch area

**Goal:** Disable the Encephalon traps

**Reward:** Secret Key 18 (unlocks the Level 3 Class F skill "Rare +30")

**Timing:** After Ormus Stronghold

Hugo has hidden ten traps throughout Subconscious Domain (Summer). Use the U.M.N. Simulator to revisit the area. Several trap protection devices are scattered around the area. Use the clues to locate them all. The first clue is located in the bathroom near the dive-in point. Start there, then proceed to the first trap protection. Return to Hugo in the real world after receiving the reward. The protection devices are located in the following locations:

- 1 Behind the billboard  
 2 Red flowers on the path into the forest  
 3 White Flowers  
 4 Water Cave  
 5 Tree near Blue Flowers
- 6 Red Flowers near Shed  
 7 Hollow Log  
 8 Red Mushrooms  
 9 Boulder resembling a face  
 10 Giant Tree

## DARK PROFESSOR

After collecting the Robot Part Body, there's a second storyline that the game has been completed once. Talk to the Professor in the "Game Clear Data" from *Xenosaga EPISODE II*. He tells his "twin brother," the Dark Professor, who is creating Dark Erde also mentions that the party should talk to the Other Professor, who is in Second Miltia, about finding the Dark Professor.

The Other Professor in the research lab within Second Miltia City Sector gives the party **Sequencer B** to unlock the yellow Forbidden Device. He also opens the way to the green **Forbidden Device** in the research facility, but it requires **Sequencer A**.

Go to the local U.M.N. Simulator and revisit Ormus Stronghold. Look for the yellow Forbidden Device at the end of the east path from the first intersection. Activate the device to travel to the Desert area.

## SCARABEILLE

Prepare for battle by placing Ziggy in the E.S. Zebulun and equipping the robot with the EMAX300 accessory. Place Shion in the E.S. Asher with another EMAX300. Put other accessories on the robots that increase their agility, prevent Stun, and cure negative status effects.

Move behind the boss as soon as the battle begins and charge to 300 energy. Unleash the Meteor Blast and Odin Buster to take a big bite out of the boss's HP. Make sure to attack the boss in the back and Boost so the attacks fall on the CTC Event Slot for maximum damage. Beware of intercepts late in the battle. If the boss intercepts a 300 energy attack, it's almost always instant death for the party. Use lighter attacks until the threat passes.

Collect **Sequencer C** after the battle, use the yellow Encephalon Device to return to Ormus Stronghold, and exit the U.M.N. Simulator. Use the U.M.N. Simulator again, but choose the Subconscious Domain (Summer) this time. Locate the red **Forbidden Device** east of the start and inside the old shed in order to enter the Factory. However, before going there, make sure to start GS 21 by talking to Roy at Kukai Foundation Urban Area West. Otherwise, the party will have to backtrack through the entire dungeon to leave it once they reach the end.

## EXPLORING THE FACTORY

The path leads to a cable car that isn't working at the moment. Pass by it and go through the second door. Follow the catwalk around to a blue button on the wall. Cross the catwalk just before it to find a second blue button above the cable car. Use the button to activate the car, then return to the previous room and press the other blue button to lower a ladder. Climb down and use the cable car to reach the next section.

Follow the hall down and pass a ladder and an inactive elevator to reach an active elevator in the southeast corner. Use the elevator to go down a level. Ride the conveyor belt at the bottom and fight through the hall to the next elevator, which takes the party back up a level near the ladder that they passed earlier. Follow the catwalk to its end and a flashing blue button. Press the button to activate the elevator below, then backtrack to the ladder and lower it. Save at the save point below and travel south to the first elevator. Use it to drop down a level.

Walk the path and fight through the exit. Climb down the ladder on the other side to find a crane hanging from the catwalk. Press the button on the control panel to drop the crane into the crates below, which causes them to explode. Backtrack through the exit and climb down the nearby ladder. Pass the next elevator and enter the room that follows. Go around the north side of the area to reach the conveyor belts in the center. Press the blue switch next to the conveyor belts to lower the ladder, which can be used to hit the save point another time. Ride the conveyor belts down to face the boss.

ENEMY DATA  
WALKTHROUGH  
APPENDICES

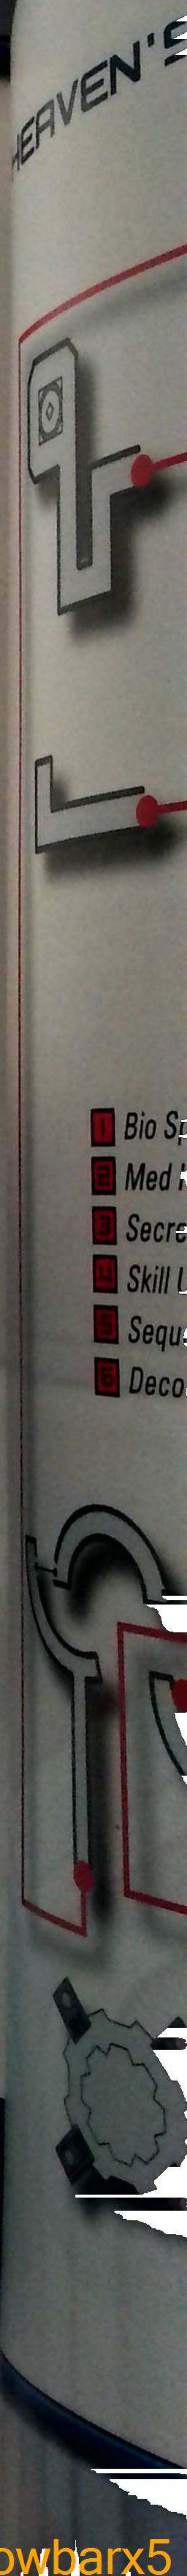

Go to the end of the hallway after the battle and use the blue switch to activate the elevator above it. Backtrack to that elevator and ride it down. The path leads to a room with eight colored boxes. The boxes correspond with the numbers the last boss was reciting:

<b>Blue Green</b>	<b>= 1</b>
<b>Yellow</b>	<b>= 3</b>
<b>Blue</b>	<b>= 5</b>
<b>Red</b>	<b>= 7</b>
<b>Orange</b>	<b>= -2</b>
<b>Gray</b>	<b>= -4</b>
<b>Purple</b>	<b>= -6</b>
<b>Green</b>	<b>= -8</b>

Attack five boxes in a row so their final sum is nine. The lights at the back of the room keep track of the sum. There are many different solutions to this puzzle. One such order is: Red, Orange, Gray, Blue, and Yellow ( $7 - 2 - 4 + 5 + 3 = 9$ ). The door in the back opens when the puzzle is solved. Check the chests to find **Sequencer A** and the **Pink Book**, then return to Subconscious Domain (Summer) and exit the U.M.N. Simulator. Travel to Second Miltia and the research lab in the city area. Use Sequencer A to enter the green Forbidden Device.

# DULLER SOUL

Type	Gnosis
Break	B C C C
W.ATK.	—
W.ATR.	Ice/Pc
HP	57,600
EXP	72,000
S.Pts	3600
C.Pts	5400
N.Item	Skill Upgrade E
R.Item	—

MOMO, Jr., and KOS-MOS are an excellent party for this battle. Make sure all three characters have the Ice Sword skill before challenging the boss. It's used with all three characters to power-up their attacks.

Begin the battle by Stocking to three bars with each character. Pound on the enemy with short combos until the boss's HP reaches roughly 38,000. At this point, the boss begins to rattle off a list of codes. Begin the first assault before the boss starts shouting out numbers. Cast Ice Sword on all three characters, then have Jr. open with a (Zone: B C) while KOS-MOS Boosts. Have KOS-MOS follow with (Zone: C C) and to put the opponent into the air. Boost MOMO and Jr. to take advantage of the situation. When the dust settles, the boss should have around 16,000 HP remaining.

As the boss begins to shout out the codes, Stock up attacks once again and recast Ice Sword. Begin the second assault just after the fourth set of codes is revealed. Follow the same pattern with Jr. opening and KOS-MOS knocking the enemy into the air.

Empty everything into the boss to hopefully prevent it from using its deadly Methane Gas attacks.

## ANYTHING BUT HEAVEN

Enter the ruins and walk to the end to find an ornate door that is sealed tight. Destroy the east block that's just south of the door. Follow the twisting walkway around to the southwest corner and defeat Svarozic; this creature's weakness is Ice. Run to the ledge just above Svarozic after the battle and destroy the red orb. Take a moment to go north from Svarozic's position and hang a right at the second intersection. This path leads to a large block with a red spot on one side. The only way to destroy the block is to attack it on the red side. Smash it now and save your game before moving onward.

## DEFEATING THE MINI BOSSES

There are several mini-bosses in this stage. Each one has a different weakness, but the strategy for defeating them is essentially the same. Use the *Sword Ether* that matches the enemy's weakness on Jin, KOS-MOS, and MOMO (i.e. *Ice Sword*, *Aura Sword*). Move one character behind the boss and *Stock* to three bars with each of the characters. Have Jin or KOS-MOS open the assault with a *Break* attack after casting the correct *Sword* on the entire party. Have the other two characters *Boost* and use their attacks. The damage from one round may be enough to finish off the mini-boss if two of the characters attack from the back. *Boost* until the *Boost Gauge* runs out or the boss collapses. Even single attacks can be very effective when coupled with the damage bonus from a long chain. Also, the *Ether* skills *Misty* and *Infection* can be very helpful here. Give these skills to MOMO. Cast *Infection* first, then *Misty* to prevent the boss from healing itself.

# HEAVEN'S RUINS

The second landing is the reverse of the first. There are two Azazels and an Armaros. The same approach works at the start of the battle, but the party must quickly eliminate one of the two Azazels to avoid being overcome by their powerful Ether attacks. Use Stock 1 and Aura Sword to quickly prepare KOS-MOS for another assault. Lay into whichever of the two Azazels is weakest. If they can quickly eliminate the first two enemies, the battle is simple from that point forward.

## SEGMENT ADDRESS NO. 12

*Don't miss Segment Address No. 12 inside the tower. It's buried inside the wall and there's nothing to identify it other than the targeting cursor. Watch for a small flash while walking on the inside ramps.*

When both landings are clear, a small creature appears on the elevator at the top of the tower. Engage the creature to battle five Zwerg Kape enemies. Fighting a lone Zwerg Kape isn't much of a challenge, but a group of them is much more challenging. Their hits tend to launch the target into the air, which gives one of their brethren a chance to score an extra hit with a damage bonus. The easiest way to win this battle is to use Shion's Erde Kaiser Fury, which can wipe out all five in one shot. Without it, use Fire and Beam attacks to eliminate the creatures quickly or they'll begin to reappear. After eliminating all of them, the elevator becomes active and rises into the air. Walk out of the center and back to ride the elevator back down and save before challenging the boss.

Leave the main area through the door in the southeast corner. Defeat Perun on the small northeast ledge. Perun's weakness is Aura, so use Aura Sword to strengthen the party's attack. Check out the ledge above Perun's location after the battle to find a yellow orb and smash it. Also, explore the path through the northwest door. Go to the end and blast the block across the small gap. Backtrack to the save point and rest again.

Wind around to the northwest door in the central area. If you didn't destroy the two blocks with a red side, do so now or it's impossible to reach the door. Walk up the ramp and challenge

Stribog; its weakness can be exploited through the use of Flame Sword.

Backtrack to the main room and enter the door on the southwest side. The path leads to a blue orb. Smash it and return to the gate in the center, which has vanished now that the three orbs have been eliminated. Save and bravely enter the hall.

Climb the ramp to the tower and stop at the landings along the way. The party must defeat the enemies on each landing. These aren't easy battles, but the party can escape if things don't go well. The first battle features a pair

of speedy Armaroses and an Azazel. The easiest way to eliminate these enemies is to take Shion, KOS-MOS, and Jin. Put

the First Combo skill on Jin and KOS-MOS so they begin the battle with one bar in the Stock meter. Cast Ether Spear and Aura Sword on Shion, as this will significantly increase the effectiveness of Erde Kaiser Fury in a few moments. Attack one of the Armaroses with Jin or KOS-MOS and knock the enemy into the air. Boost whichever character did *not* attack and do the same thing to the second Armaros so that both are airborne at the same time. Have Shion Boost behind them and use Erde Kaiser Fury. The extra damage should be enough to eliminate or nearly eliminate the Armaroses. Use the Aura Sword and a physical attack to finish off the Azazel.

## SPACE COLISEUM

Return to Ormus Stronghold and enter the yellow Forbidden Device to travel to the Desert. Hike to the back of the area, save, and park the E.S.s at the ledge next to the second yellow Forbidden Device. Follow the path to the multi-colored Forbidden Device at the end, which takes the party to the Space Coliseum.

The Professors are waiting in the center of the coliseum. Speak to them to initiate the battle of the behemoths: Erde Kaiser Fury vs. Dark Erde Kaiser.

# NEPOS RIGAS

Type	Gnosis
Break	C B C C
W.ATK.	Ether
W.ATR.	Bm/Au
HP	59,000
EXP	84,000
S.Pts	4800
C.Pts	5400
N.Item	Skill Upgrade E
R.Item	—

This is a tough one, so come prepared. Nepos Rigas is weak against Beam and Aura, but neither chaos nor Shion are the best offensive characters. It's usually better to take Jin and KOS-MOS with Shion and use Aura Sword on them. Put Spear Coats on each party member, too. Make sure two of the party members have the Refresh H and everyone else has Medica 2 and Revert. It also helps if everyone has Focus 1 or Focus 2. Shion should definitely have Focus 2, since she's the best healer in the group.

The battle starts off simple. Have KOS-MOS and Jin work together to create Breaks while pounding away at the boss's seemingly endless HP. About halfway through the battle, the boss creates a shield that prevents Breaks. Stock up with Jin and KOS-MOS, cast Aura Sword on both, and attack the shield with six or more consecutive Aura-based attacks and it falls. Be ready to launch an assault as soon as this occurs, since the window of opportunity is very small. Pay close attention to all three fighters; in particular, keep a close eye on Shion's HP. Cast Flame Veil on her to lessen the damage taken from the boss's most devastating attacks.

When the battle is nearly over, the action pauses and the boss challenges the party to go one-on-one the rest of the way. It's impossible to cause the Break state now, since the boss immediately counterattacks when hit. The counterattack is devastating; don't even bother trying to defend against it. If Erde Kaiser Fury or any Double Attacks are available, this is the time to use one. Otherwise, cast Ether Spear on KOS-MOS and use her Dragon Blade special attack to finish the battle. If the boss manages to knock out any party members, be sure to revive them before it's over.

After the battle, grab Decoder 12 from the chest and go back downstairs to Segment Address No. 12 before departing. Sequencer D is hidden behind the door and it's vital for reaching the next area. Use the Forbidden Device at the top of the tower to depart.

# COMPARATIVE TECHNIQUE TABLES

The following tables list the techniques performed by each of the main characters and the E.S.s. The purpose is to make it easy to quickly compare the techniques performed by the various party members in the heat of battle, or before facing a major enemy. Use the table to decide who should be in the battle party when facing a tough enemy, or when the current battle party proves to be ineffective. The various Double Attacks are listed on page 205 of this strategy guide.

## SINGLE ATTACKS

### CHAOS

Name	Command	Target	Zone	Type	Range	Attribute	Condition	Effect
Spirit Touch	□□	Single	BB	Physical	Short	Strike/Aura	—	—
Angel Blast	□△	Single	BC	Physical	Short	Strike/Aura	—	—
Divine Seal	△△	Single	CC	Physical	Short	Strike/Aura	—	—
Spirit Cross	△□	Single	CB	Physical	Short	Strike/Aura	—	—
Spirit Strike	◎	Single	B/C	Physical	Short	Strike/Aura	—	Down
Angel Shot	○	Single	C	Physical	Short	Strike/Aura	Down only	—
Heaven's Wrath	○○	Single	CC	Physical	Short	Strike/Aura	Down only	—

### JIN

Name	Command	Target	Zone	Type	Range	Attribute	Condition	Effect
Tempest Blade	□□	Single	BB	Physical	Short	Slash	—	—
Wind Blade	□△	Single	BC	Physical	Short	Slash	—	—
Spinning Blade	△△	Single	CC	Physical	Short	Slash	—	—
Rising Blade	△□	Single	CB	Physical	Short	Slash	—	—

Soaring Blade	○	Single	A	Physical	Short	Slash	—	—
Raptor	○○	Single	AA	Physical	Short	Slash	—	—

### JR.

Name	Command	Target	Zone	Type	Range	Attribute	Condition	Effect
Quick Draw	□□	Single	BB	Physical	Long	Pierce	—	—
Quick Turn	□△	Single	BC	Physical	Long	Pierce	—	—
Quick Drop	△△	Single	CC	Physical	Long	Pierce	—	—
Quick Shot	△□	Single	CB	Physical	Long	Pierce	—	—
Cross Hand	◎	Single	B/C	Physical	Long	Pierce	—	—
Crossover	○	Single	A	Physical	Long	Pierce	—	—
Killing Sky	○○	Single	AA	Physical	Long	Pierce	—	—

# DARK ERDE KAISER

Type	Mech
Break	AAAA
W.ATK.	Ether
W.ATR.	Varies
HP	192,000
EXP	96,000
S.Pts	9000
C.Pts	5400
N.Item	Skill Upgrade E
R.Item	—

Dark Erde Kaiser has a weakness to Ether attacks, so include both MOMO and Shion in the party. The third spot should be taken by someone who can Down the enemy, since the robot is too big to get knocked into the air. Ziggy is the better choice over chaos based on HP. Equip all three characters with Blade Coats. Also, ensure that they have Refresh H, Medica 2, Medica All, and Revert. Each character should also have Focus 2 for this battle. It's going to be a very long fight and they'll need a constant supply of EP.

This fight is basically like other bosses, but the attack pattern is a little different. This boss has an A A A Break, which is perfect for Shion and MOMO. Note, however, that Ziggy *can't* hit the A Zone. Both female characters can cause a Break on their own, but doing so wastes some of their attack power. Stock up with all three characters, cast Ether Spear on Shion and MOMO, and begin the assault with either female character. Shoot the A Zone twice while the second female character Boosts. Shoot the A Zone two more times with the second female character to cause the Break, but have Ziggy Boost next. He can perform any full combo and put the robot in the Down position. Boost Shion while Ziggy is pounding away. Have her empty her Stocked attacks while MOMO Boosts and does the same. If Shion has the Annihilation skill, let her Boost once more and finish the combo with it. It's often the strongest hit. Once Dark Erde Kaiser is down to about 150,000 HP, he will cast either Flame Veil or Aura Veil. If he casts Flame Veil, he becomes weak to Ice, and if it's Aura Veil, he's weak to Thunder. Use an appropriate Sword Ether on MOMO for a damage bonus.

At about 125,000 HP, the boss raises a very effective damage shield (which also erases the weakness to Ice or Thunder). Trigger Shion's Erde Kaiser Fury to smash the shield and return damage to normal. Otherwise, this battle takes a very long time to win, as five Double Attacks are required to break the shield. Once the shield is down, the giant mech becomes weak to every attribute (Bm/Au/Th/Fi/Ic/Pc/Si/St), making the rest of the fight go very fast.

## IRON MAN RUMBLE

Now that Dark Erde Kaiser has been defeated, it's possible to complete GS 28, a battle that takes place at the top of Heaven's Ruins.

### E.S. ASHER
